FAIR VALUE MEASUREMENT

In accordance with *Financial Accounting Standards Board's Accounting Standards Codification, Section 820-10, Fair Value Measurements and Disclosures* ("ASC 820-10"), fair value is defined as the price that each Fund would receive to sell an investment or pay to transfer a liability in an orderly transaction with an independent buyer in the principal market, or in the absence of a principal market, the most advantageous market for the investment or liability. ASC 820-10 establishes three different categories for valuations. Level 1 valuation are those based upon quoted prices in active markets. Level 2 valuations are those based upon quoted prices in inactive markets or based upon significant observable inputs (e.g., yield curves; benchmark interest rates; indices). Level 3 valuations are those based upon unobservable inputs (e.g., discounted cash flow analysis; non-market based methods used to determine fair valuation).

The Funds value Level 1 securities using readily available market quotations in active markets. The Funds value Level 2 fixed income securities using independent pricing providers who employ matrix pricing models utilizing market prices, broker quotes and prices of securities with comparable maturities and qualities. The Funds value Level 2 equity securities using various observable market inputs in accordance with procedures established in good faith by management. For Level 3 securities, the Funds estimate fair value based upon a variety of observable and non-observable inputs using procedures established in good faith by management. The Funds' procedures are approved by the Board of Trustees.

The following tables represent the Funds' investments carried on the Portfolio of Investments by caption and by Level within the fair value hierarchy as of June 30, 2017:
