

DESTRA MULTI-ALTERNATIVE FUND

January 10, 2022

Supplement to the Prospectus and Statement of Additional Information, Each dated June 23, 2021, as supplemented

Shares of the Destra Multi-Alternative Fund (the “Fund”) are expected to begin trading on the New York Stock Exchange (“NYSE”) on or about January 13, 2022 under proposed NYSE ticker symbol “DMA.” To facilitate the listing of the Fund’s shares on the NYSE, the Fund redesignated its Class A, Class C and Class T shares as Class I shares and subsequently eliminated all share class designations. Consequently, the Fund’s shares will be referred to as shares of beneficial interest or common shares (the “Common Shares”). Shareholders will not receive fractional shares but instead will receive a number of shares, rounded down to a whole number. Shareholders will receive a check related to the fractional portion of their shares. Such checks were mailed on or about January 5, 2022.

After listing, the Fund’s shares will generally only be available for purchase in the secondary market at prevailing market prices rather than at net asset value (“NAV”). The listing may also make the Fund’s shares more widely available. The Fund will no longer conduct annual repurchase offers for at least 5% and up to 25% of the outstanding Common Shares at NAV in connection with the Fund’s listing on the NYSE.

The listing of the Common Shares on the NYSE is expected to increase investor liquidity. As is often the case with common shares of closed-end management investment companies traded on a securities exchange, the Fund’s Common Shares may frequently trade at a discount to NAV. This characteristic is a risk separate and distinct from the risk that the Fund’s NAV per Common Share could decrease as a result of its investment activities. The market price of the Common Shares will be affected by factors such as the Fund’s NAV, dividend and distribution levels and their stability, supply of and demand for the Common Shares in the market, trading volume of the Common Shares, general market, interest rate and economic conditions, and other factors beyond the Fund’s control.

Additionally, effective January 10, 2022, American Stock Transfer & Trust Company, LLC (“AST”) serves as the Fund’s transfer agent and dividend disbursing agent, and all shareholder records have been transferred to AST. Shareholders may obtain more information on the shareholder services offered to the Fund by calling AST at the Fund’s designated toll-free number at 800-591-8238.

Also effective with the Fund’s listing on the NYSE, the Fund’s Dividend Reinvestment Plan (“DRP”) will be amended. Pursuant to the DRP, unless the registered owner of the Fund’s Common Shares elects otherwise by contacting AST, all dividends declared on the Common Shares will be automatically reinvested in additional Common Shares by AST. Common Shareholders who elect not to participate in the DRP will receive all dividends and other

distributions in cash paid by check mailed directly to the shareholder of record. After the Common Shares are listed on the NYSE, whenever the Fund declares a dividend payable in cash on such Common Shares, non-participants in the DRP will receive cash and participants in the DRP will receive the equivalent in additional Common Shares. The shares will be acquired by AST for the participants' accounts, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized shares from the Fund or (ii) by purchasing outstanding shares on the open market on the NYSE or elsewhere. If, on the payment date for any dividend, the closing market price plus estimated brokerage commissions per share is equal to or greater than the NAV per share, AST will invest the dividend amount in newly issued shares. The number of newly issued shares to be credited to each participant's account will be determined by dividing the dollar amount of the dividend by the Fund's NAV per share on the payment date. If, on the payment date for any dividend, the NAV per share is greater than the closing market value plus estimated brokerage commissions (i.e., the Fund's shares are trading at a discount), AST will invest the dividend amount in shares acquired in open-market purchases.

In the event of a market discount on the payment date for any dividend, AST will have until the last business day before the next date on which the Common Shares trade on an "ex-dividend" basis or 30 days after the payment date for such dividend, whichever is sooner, to invest the dividend amount in shares acquired in open-market purchases. It is contemplated that the Fund will pay monthly income dividends. If, before AST has completed its open-market purchases, the market price per share exceeds the NAV per share, the average per share purchase price paid by AST may exceed the NAV of the shares, resulting in the acquisition of fewer shares than if the dividend had been paid in newly issued shares on the dividend payment date. Because of the foregoing difficulty with respect to open-market purchases, the DRP provides that if AST is unable to invest the full dividend amount in open-market purchases during the purchase period or if the market discount shifts to a market premium during the purchase period, AST may cease making open-market purchases and may invest the uninvested portion of the dividend amount in newly issued shares at the NAV per share at the close of business on the last purchase date. All correspondence or questions concerning the Plan should be directed to the Plan Administrator at American Stock Transfer & Trust Company, LLC - Plan Administration Department, P.O. Box 922 Wall Street Station, New York NY 10269-0560.

Destra Multi-Alternative Fund (the “Fund”) is a Delaware statutory trust that is registered under the Investment Company Act of 1940, as amended (the “1940 Act”), as a non-diversified, closed-end management investment company and operates as an interval fund.

	Price to Public ⁽¹⁾	Sales Load ⁽²⁾	Proceeds to the Fund ⁽³⁾
Per Class I Share	At current NAV	N/A	Amount invested at current NAV
Per Class A Share	At current NAV, plus a sales load of up to 5.75%	5.75%	Amount invested at current purchase price, less applicable Sales Load
Per Class T Share	At current NAV, plus a sales load of up to 3.00%	3.00%	Amount invested at current purchase price, less applicable Sales Load
Per Class C Share	At current NAV	N/A	Amount invested at current purchase price
Total	Up to \$276,080,000	Up to 5.75%	Up to \$276,080,000 ⁽⁴⁾

- (1) Shares are sold at a public offering price equal to the then-current NAV per Share of the applicable class, plus applicable Sales Load. See “Distribution of Shares.”
- (2) “Sales Load” includes up to 5.75% of the public offering price for Class A Shares and up to 3.00% of the public offering price of Class T Shares. See “Distribution of Shares.”
- (3) Destra Capital Advisors LLC (the “Adviser”) has contractually agreed to reduce its fees and/or absorb expenses of the Fund, until at least November 30, 2022, to ensure that total annual Fund operating expenses after fee waiver and/or reimbursement (excluding any front-end or contingent deferred loads, brokerage fees and commissions, acquired fund fees and expenses, fees and expenses associated with instruments in other collective investment vehicles or derivative instruments, borrowing costs (such as interest and dividend expense on securities sold short), taxes and extraordinary expenses, such as litigation expenses) will not exceed 1.95% for Class A Shares, 2.45% for Class T Shares, 2.70% for Class C Shares and 1.70% for Class I Shares of each class’s net assets, respectively (the “Expense Limitation”). In consideration of Destra’s agreement to limit the Fund’s expenses, the Fund has agreed to repay Destra pro rata in the amount of any Fund expense paid or waived by Destra, subject to the limitations that: (1) the reimbursement for expenses will be made only if payable not more than three years following the date such payment or waiver was made; and (2) the reimbursement may not be made if it would cause the Fund’s then-current Expense Limitation, if any, and the Expense Limitation that was in effect at the time when Destra reimbursed, paid or absorbed the operating expenses that are the subject of the repayment, to be exceeded. The Expense Limitation agreement may be terminated before November 30, 2022 only by the Fund’s Board of Trustees, on 60 days’ written notice to the Adviser.
- (4) Total Proceeds to the Fund assume the sale of all Shares registered under this registration statement, and that all Shares sold will be Class I Shares.

This prospectus concisely provides the information that a prospective investor should know about the Fund before investing. Investors are advised to read this prospectus carefully and to retain it for future reference. Additional information about the Fund, including the Fund’s statement of additional information dated June 23, 2021 (the “Statement of Additional Information”), has been filed with the SEC and is

incorporated by reference in its entirety into this prospectus. Investors are advised to read the Statement of Additional Information in its entirety. The Statement of Additional Information and the Fund's annual and semi-annual reports to holders of Shares ("Shareholders") can be obtained upon request and without charge by writing to the Fund at Destra Multi-Alternative Fund c/o UMB Fund Services, Inc., 235 W. Galena Street, Milwaukee, WI 53212, by calling toll free 844-9DESTRA (933-7872) or by accessing the Fund's "Literature" page on Destra's website at www.destracapital.com. The information on Destra's website is not incorporated by reference into this prospectus and investors should not consider it a part of this prospectus. In addition, the contact information provided above may be used to request additional information about the Fund and make Shareholder inquiries. The Statement of Additional Information, other material incorporated by reference into this prospectus and other information about the Fund is also available on the SEC's website at <http://www.sec.gov>. The address of the SEC's website is provided solely for the information of prospective investors and is not intended to be an active link.

Investment Objective. The Fund's investment objective is to seek returns from capital appreciation and income with an emphasis on income generation.

There can be no assurance that the Fund will be able to achieve its investment objective.

Risks. An investment in the Fund involves a high degree of risk. In particular:

- **The Fund's Shares are not listed on an exchange. Although the Fund intends to list the Shares on an exchange upon meeting applicable listing eligibility requirements, the Fund's Shares might not be listed on an exchange in the foreseeable future, if at all. Unless the Fund's Shares are listed on an exchange, it is not anticipated that a secondary market for the Shares will develop and an investment in the Fund is not suitable for investors who may need the money they invest within a specified timeframe.**
- **The Fund is suitable only for investors who can bear the risks associated with the Fund's limited liquidity and should be viewed as a long-term investment.**
- **The amount of distributions that the Fund may pay, if any, is uncertain.**
- **The Fund invests a substantial portion of its assets in securities of unlisted public and private real estate investment funds, business development companies, and funds commonly known as hedge funds. These investments are illiquid and expose the Fund to real estate-related risks.**

Summary of Investment Strategy. The Fund utilizes similar principles to the Endowment Model approach to investing. The Endowment Model is a form of the strategic asset allocation model of portfolio construction that involves diversifying investments across strategies, asset classes and investment horizons, as opposed to the standard long-only stock and bond model. The Fund provides access to, and actively manages, a multi-asset portfolio primarily consisting of illiquid investments with limited availability to provide a core alternatives solution. The Fund pursues its investment objective by investing primarily in the following income-producing securities: (1) public and private real estate securities (including securities issued by real estate funds), (2) alternative investment funds ("AIFs"), which include business development companies ("BDCs") as well as funds commonly known as "hedge funds" and other private investment funds, which may also include funds that primarily hold real estate investments, (3) master limited partnerships ("MLPs"), (4) common and preferred stocks, and (5) structured notes, notes, bonds and asset-backed securities. The Fund also executes investments in the preceding types of securities through index-linked or actively managed exchange-traded funds ("ETFs"), mutual funds and closed-end funds.

Investment Adviser. The Fund's investment adviser is Destra Capital Advisors LLC ("Destra") and the Fund's sub-adviser is Validus Growth Investors, LLC, doing business as Validus Investment Advisors, ("Validus" or the "Sub-Adviser") (Validus together with Destra, are referred to herein as the "Advisers"). Destra is a wholly-owned subsidiary of Destra Capital Management LLC. Destra oversees the management of the

Fund's activities and is responsible for developing investment guidelines with Validus and overseeing investment decisions for the Fund's portfolio. Validus acts as the Fund's investment sub-adviser and makes investment decisions for the Fund's portfolio, subject to the oversight of Destra. Each of Destra and Validus is an investment adviser registered with the Securities and Exchange Commission (the "SEC") under the Investment Advisers Act of 1940, as amended.

Interval Fund. The Fund is operated as an interval fund. Pursuant to the Fund's interval fund structure, the Fund will conduct annual repurchase offers, at net asset value ("NAV"), of no less than 5% and no more than 25% of the Fund's outstanding shares. Typically, the Fund will conduct such annual repurchase offers for 5% of the Fund's outstanding shares. Repurchase offers in excess of 5% are made solely at the discretion of the Fund's board of trustees and investors should not rely on any expectation of repurchase offers in excess of 5%. It is also possible that a repurchase offer may be oversubscribed, with the result that Shareholders may only be able to have a portion of their shares repurchased. Accordingly, as the Fund will make annual repurchase offers, investors should consider the Fund's shares to be of limited liquidity. The time between notification to Shareholders and the date the repurchase offer ends ("Repurchase Request Deadline") may vary from no more than forty-two (42) days to no less than twenty-one (21) days. Shares will be repurchased at the NAV per share determined as of the close of regular trading on the NYSE no later than the 14th day after the Repurchase Request Deadline, or the next business day if the 14th day is not a business day (each a "Repurchase Pricing Date"). Payment pursuant to the repurchase will be made by checks to the Shareholder's address of record, or credited directly to a predetermined bank account on the purchase payment date (each a "Purchase Payment Date"), which will be no more than seven (7) days after the Repurchase Pricing Date.

Investors will pay offering expenses and, with regard to those share classes that impose a front-end sales load, a sales load of up to 5.75% for Class A Shares, up to 3.00% for Class T Shares, while Class C Shares and Class I Shares are not subject to sales charges. You will have to receive a total return at least in excess of these expenses to receive an actual return on your investment.

See "Types of Investments and Related Risks" beginning on page 31 of this prospectus.

Securities Offered. The Fund engages in a continuous offering of four classes of shares of beneficial interest of the Fund ("Shares"). The Fund is offering Class I Shares, Class A Shares, Class T Shares and Class C Shares. The Fund has registered 18,666,666.66 shares (6,666,666.66 in 2011 and 12,000,000.00 in 2013) and is authorized as a Delaware statutory trust to issue an unlimited number of Shares. The Fund is offering to sell, through its distributor, Destra Capital Investments, LLC (the "Distributor"), under the terms of this prospectus, 18,666,666.66 Shares (less Shares previously sold) of beneficial interest at NAV per Share of the relevant Share class, plus, in the case of Class A Shares and Class T Shares, any applicable Sales Load. In addition, certain institutions (including banks, trust companies, brokers and investment advisers) may be authorized to accept, on behalf of the Fund, purchase and exchange orders and repurchase requests placed by or on behalf of their customers, and if approved by the Fund, may designate other financial intermediaries to accept such orders. The Distributor is not required to sell any specific number or dollar amount of the Fund's Shares, but will use its best efforts to solicit orders for the sale of the Shares.

The minimum initial investment by a Shareholder is \$1,000,000 for Class I Shares and \$2,500 for Class A Shares, Class T Shares and Class C Shares (these minimums may be waived in certain circumstances). There is no minimum for subsequent investments. All Share purchases are subject to approval by Destra. The minimum investment requirement may be waived in the Fund's sole discretion. During the continuous public offering, Shares will be sold at the then-current NAV per Share of the applicable class, plus, in the case of Class A Shares and Class T Shares, the applicable Sales Load. The Fund's continuous public offering is expected to continue in reliance on Rule 415 under the Securities Act of 1933, as amended, until the Fund has sold Shares in an amount equal to approximately 18,666,666.66 Shares.

The Shares have no history of public trading. No secondary market is expected to develop for the Fund's Shares unless the Shares are listed on a securities exchange, if at all. Liquidity for the Shares will be provided only through annual repurchase offers for no less than 5% and no more than 25% of the Shares at net asset value, and there is no guarantee that an investor will be able to sell all the Shares that the investor desires to sell in the repurchase offer. Due to these restrictions, an investor should consider an investment in the Fund to be of limited liquidity. Investing in the Fund's Shares may be speculative and involves a high degree of risk, including the risks associated with leverage. See "Types of Investments and Related Risks" below in this prospectus.

Shares are not deposits or obligations of, and are not guaranteed or endorsed by, any bank or other insured depository institution, and Shares are not insured by the Federal Deposit Insurance Corporation, the Board of Governors of the Federal Reserve System or any other government agency.

Neither the SEC nor any state securities commission has approved or disapproved these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

As permitted by SEC regulations, paper copies of the Fund's shareholder reports will not be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you hold shares at the Fund's transfer agent, you may elect to receive shareholder reports and other communications from the Fund electronically anytime by contacting your financial intermediary (such as a broker-dealer or bank), through the Fund's transfer agent by calling the Fund toll-free at 844-9DESTRA (933-7872), or if you are a direct investor, by enrolling at www.destracapital.com. You may elect to receive all future reports in paper free of charge.

You can inform the Fund or your financial intermediary, as applicable, that you wish to receive paper copies of your shareholder reports by contacting them directly. Your election to receive reports in paper will apply to the Fund and all funds held through your financial intermediary, as applicable.

SUMMARY OF TERMS

This is only a summary and does not contain all of the information that a prospective investor should consider before investing in Destra Multi-Alternative Fund (the “Fund”). Each prospective investor should carefully read the more detailed information appearing elsewhere in this prospectus and the statement of additional information dated June 23, 2021 (the “Statement of Additional Information”).

THE FUND

The Fund is a Delaware statutory trust that is registered under the Investment Company Act of 1940, as amended (the “1940 Act”), as a non-diversified, closed-end management investment company. The Fund is an interval fund that will provide limited liquidity by offering to make annual repurchases of its Shares at net asset value (“NAV”), which is calculated on a daily basis. See “Annual Repurchases of Shares” and “Determination of Net Asset Value.”

THE ADVISER

Destra Capital Advisors LLC (“Destra” or the “Adviser”) serves as the Fund’s investment adviser. Destra is registered as an investment adviser with the U.S. Securities and Exchange Commission (the “SEC”) under the Investment Advisers Act of 1940, as amended (the “Advisers Act”). Destra oversees the management of the Fund’s activities and is responsible for developing investment guidelines with Validus (as defined below) and overseeing investment decisions for the Fund’s portfolio.

Destra is a subsidiary of Destra Capital Management LLC, a sponsor of investment funds.

THE SUB-ADVISER

Validus Growth Investors, LLC, doing business as Validus Investment Advisors, (“Validus” or the “Sub-Adviser”) serves as the investment sub-adviser to the Fund. The Sub-Adviser is registered with the SEC as an investment adviser under the Advisers Act. The Sub-Adviser was established in June 2012 for the purpose of providing investment advisory services based on a fundamental, bottom-up, stock specific research process, anchored by a proprietary ranking system, and founded on pre-existing principles. The firm provides separately managed account services as well as model strategies to institutional parties.

INVESTMENT OBJECTIVE

The Fund’s investment objective is to seek returns from capital appreciation and income with an emphasis on income generation.

There can be no assurance that the Fund will be able to achieve its investment objective.

INVESTMENT STRATEGIES AND POLICIES

The Fund utilizes similar principles to the Endowment Model approach to investing. The Endowment Model is a form of the strategic asset allocation model of portfolio construction that involves diversifying investments across strategies, asset classes and investment horizons, as opposed to the standard long-only stock and bond model. The Fund provides access to, and actively manages, a multi-asset portfolio primarily consisting of illiquid investments with limited availability to provide a core alternatives solution. The Fund pursues its investment objective by investing primarily in the following income-producing securities: (1) public and private real estate securities (including securities issued by real estate funds), (2) alternative investment funds (“AIFs”), which include business development companies (“BDCs”) as well as funds commonly known as “hedge funds” and other private investment funds, which may also include funds that primarily hold real estate investments, (3) master limited partnerships (“MLPs”), (4) common and preferred stocks, and (5) structured notes, notes, bonds and asset-backed securities. The Fund also executes investments in the preceding types of securities through index-linked or actively managed exchange-traded funds (“ETFs”), mutual funds and closed-end funds (collectively “Underlying Funds”). The Fund defines AIFs as BDCs, real estate property funds, limited partnerships and limited liability companies that pursue investment strategies linked to real estate, small businesses or other investments that serve as alternatives to investments in traditional stocks and bonds (which could include any type of investment that is consistent with the

investment strategy and not a traditional stock or bond). In general, the Fund defines an alternative strategy as one that is different from seeking returns from buying and holding traditional stocks and bonds. The Fund invests in securities of issuers without restriction as to market capitalization. The majority of the Fund's investments are not listed on an exchange or traded in over-the-counter markets; consequently, the majority of the Fund's investments are illiquid. The Fund's investments may include investments in non-U.S. securities.

Under normal circumstances, the Fund invests over 25% of its net assets in the real estate industry, which the Fund defines to include interests, debt or equity of both publicly traded and private companies engaged in the real estate industry, including, but not limited to, REITs, mortgage backed securities, interest in pooled investment entities, and other forms of securities relating to or involving real estate. This policy is fundamental and may not be changed without prior approval of the holders of the Fund's Shares (the "Shareholders").

The Fund may employ leverage, including borrowing from banks in an amount up to 33-1/3% of the Fund's assets (defined as net assets plus borrowing for investment purposes). Leverage is primarily used to increase the size of the Fund's portfolio of securities.

For a further discussion of the Fund's principal investment strategies, see "Investment Objective, Opportunities and Strategies."

Unless otherwise stated herein or in the Statement of Additional Information, the Fund's investment policies are non-fundamental policies and may be changed by the Fund's board of trustees (the "Board") without prior approval of Shareholders.

The Adviser has delegated management of the Fund's portfolio to the Sub-Adviser, meaning that the Sub-Adviser (i) manages the portfolio, (ii) makes all investment decisions for the Fund, and (iii) is responsible for all the Fund's trading, portfolio constructions and investment operations. However, the Adviser is responsible for ongoing performance evaluation, monitoring, and due diligence with respect to the Sub-Adviser and ensuring that the Fund is managed in accordance with limitations under the 1940 Act and the Fund's registration statement.

SUB-ADVISER'S STRATEGY

The Sub-Adviser pursues an investment strategy aimed to achieve the Fund's overall investment objective by utilizing a selection of securities believed to have relatively low volatility and generally will not be highly correlated to each other or to the broad equity or fixed income markets. The Sub-Adviser typically selects private, fair valued securities primarily invested in real estate securities and AIFs as a significant percentage of the Fund's overall asset allocation.

The Sub-Adviser manages the Fund based upon a model allocation consisting of individual public and private securities. The model is created by taking into account several factors, such as historical performance, portfolio liquidity, income and capital appreciation potential, volatility and correlation. In addition, the model must meet certain diversification tests in order to comply with the Internal Revenue Code and is regularly tested by the Sub-Adviser to ensure compliance with such requirements. Ongoing investments are generally invested according to the model. Depending on certain conditions, the Sub-Adviser may overweight or underweight new allocations. The Sub-Adviser will update the model allocation and rebalance as needed to reflect the Sub-Adviser's outlook. The Sub-Adviser manages investments over a long-term time horizon while being mindful of the historical context of the markets. When the Sub-Adviser believes market conditions are unfavorable, it may temporarily invest a portion of Fund assets in ETFs linked to stock market volatility or inversely linked to a stock market index to reduce investment risk.

The Sub-Adviser employs a regimen of qualitative and quantitative criteria when selecting securities. Certain securities may occasionally be "blind pool" investments (investment vehicles which have no operating history and have not identified the assets that will be purchased by the company) and initially require significant reliance on qualitative factors while over time quantitative factors are utilized to monitor the investment strategy performance. The Sub-Adviser utilizes a proprietary quantitative screening process and a qualitative selection process when selecting securities for investment by the Fund in connection with its strategy. Generally, securities are first selected with the highest expected income or total return expectations

from a sector peer group of issuers with similar market capitalization credit quality and/or other risk-adjusted metrics. Secondly, the potential for capital appreciation over time is considered. No assurance can be given that any or all investment strategies, or the Fund's investment program, will be successful.

Real Estate Securities. Under normal circumstances, the Fund will invest more than 25% of its net assets in the real estate industry, which it defines to include interests, debt or equity of both publicly traded and private companies engaged in the real estate industry, including, but not limited to, REITs, mortgage backed securities, interest in pooled investment entities, and other forms of securities relating to or involving real estate. This policy is fundamental and may not be changed without Shareholder approval. The real estate securities in which the Fund invests may be focused in various sectors of the commercial real estate market consisting of the office, retail, multifamily, hotel, healthcare and self-storage sectors.

Alternative Investment Funds. The managers of AIFs employ a variety of "alternative" investment strategies to achieve attractive risk-adjusted returns (i.e., returns adjusted to take into account the volatility of those returns) with low correlation to the broad equity and fixed-income markets. AIFs selected by the Sub-Adviser include real estate property funds, private equity and other alternative private placements (which could include any type of investment that is consistent with the investment strategy and offered as a private placement as opposed to a public sale), BDCs, and private debt securities, each of which may pay performance-based fees to their managers. Securities of real estate property funds are typically privately placed and are not traded on an exchange. A BDC is a form of investment company that is required to invest at least 70% of its total assets in securities (typically debt) of private companies, thinly traded U.S. public companies, or short-term high-quality debt securities. Private and non-traded BDCs are illiquid and it may not be possible for the Fund to redeem its investments or to do so without paying a substantial penalty. Publicly-traded BDCs usually trade at a discount to their NAV because they typically invest in unlisted securities and often have limited access to capital markets. Additionally, the Fund may invest up to 15% of its net assets in securities of certain AIFs commonly known as "hedge funds," which are typically privately placed with investors without registration with the SEC, employ leverage and hedging strategies and pay their managers performance fees on gains. In selecting AIFs, the Sub-Adviser assesses the likely risks and returns of the different alternative investment strategies utilized by the AIFs, and evaluates the potential correlation among the AIF investment strategies under consideration. The Sub-Adviser generally seeks to invest in AIFs whose expected risk-adjusted returns are determined to be attractive and likely to have low correlations among each other or with the broad equity and fixed-income markets.

Master Limited Partnerships. An MLP is a publicly traded or privately offered limited partnership or limited liability company. MLPs are typically engaged in one or more aspects of the exploration, production, processing, transmission, marketing, storage or delivery of energy-related commodities such as natural gas, natural gas liquids, coal, crude oil or refined petroleum products. An investment in MLP units differs from an investment in the securities of a corporation. Holders of MLP units have limited control and voting rights on matters affecting the partnership. In addition, there are certain tax risks associated with an investment in MLP units and conflicts of interest that exist between common unit holders and the general partner, including those arising from incentive distribution payments. The Sub-Adviser considers a variety of factors, including but not limited to, market capitalization, liquidity, growth, credit rating, source of qualifying income, business focus and structure when selecting MLPs.

Common and Preferred Stocks. The Sub-Adviser selects dividend-paying common and preferred stocks, as well as certain alternative strategies that it believes have the potential for strong future total returns. It also considers the sustainability and growth of a company's dividend. The Sub-Adviser reviews company-specific factors consisting of dividend yield, historical dividend growth and return on capital. The Sub-Adviser may also engage in opportunistic trading strategies with securities that may not pay a dividend but have been identified as having potential short-term pricing inefficiencies.

Structured Notes. A structured note is a debt security making interest and/or principal payments determined by a formula tied to the movement of a single security, interest rate, stock index, commodity, currency or basket of such reference assets (each a "reference index"). For example, a structured note may use a reference index, such as the S&P 500, to determine the amount of the interest payment. The Sub-Adviser selects structured notes of any maturity issued by entities it believes to be creditworthy. The Sub-Adviser uses structured notes as a substitute for investing in the assets that make up the reference index.

Debt Securities. Debt securities are notes, bonds and asset-backed securities (“ABS”). ABS represent interests in pools of loans, leases or receivables originated by private lenders, some of which may be government approved, or affiliated lenders. Typically, an ABS security is issued by a special purpose vehicle (“SPV”), such as a business trust or limited liability company, whose value and income payments are derived from and collateralized (i.e. backed) by a specified pool of underlying assets. The Fund invests without limit in fixed rate or floating rate debt instruments of any maturity that the Sub-Adviser believes are creditworthy (interest and principal will be paid on schedule) or have acceptable recovery value in the event of default (through restructuring in or outside of bankruptcy) regardless of rating, if any, including lower-quality debt securities commonly known as “high yield” or “junk” bonds. The Sub-Adviser employs measurers consisting of debt-to-assets, debt service coverage ratio asset liquidation value and other metrics to assess credit quality. Junk bonds are generally rated lower than Baa3 by Moody’s Investors Service (“Moody’s”) or lower than BBB- by S&P Global Ratings (“S&P”). The Fund will not invest more than 25% of its net assets in junk bonds. However, the Fund does not invest in debt instruments that are in default. The Sub-Adviser selects debt securities based upon their expected yield and other measures when compared to a peer group with similar maturity and credit quality.

Underlying Funds. The Fund also invests in index-linked or actively managed ETFs, mutual funds and closed-end funds that each invest in real estate securities, AIFs, common and preferred stocks, structured notes or other types of debt securities when the Sub-Adviser believes Underlying Funds offer more efficient execution of the Fund’s strategy, such as when ample individual investments are not readily available.

LEVERAGE

The Fund may use leverage to pursue its investment objective, including by borrowing funds from banks or other financial institutions, investing in derivative instruments with leverage embedded in them (including short positions), and/or issuing debt securities. The Fund may borrow money or issue debt securities in an amount up to 33 1/3% of its total assets (50% of its net assets). The Fund may use leverage opportunistically and may choose to increase or decrease its leverage, or use different types or combinations of leveraging instruments, at any time based on the Fund’s assessment of market conditions and the investment environment.

MANAGEMENT FEES

Under the Fund’s Investment Management Agreement (the “Investment Management Agreement”), Destra is entitled to a management fee, calculated and payable monthly in arrears, at the annual rate of 1.35% of the Fund’s average daily net assets during such period (the “Management Fee”).

The Fund’s Sub-Advisory Agreement (the “Sub-Advisory Agreement”) provides that Validus is entitled to receive an annual sub-advisory fee from Destra equal to 50% of the net revenue received by Destra after any fee waivers, subject to a maximum of 0.675% of the Fund’s average daily net assets.

Validus is paid by Destra out of the Management Fee Destra is paid by the Fund.

EXPENSE LIMITATION AGREEMENT

Destra and the Fund have entered into an expense limitation agreement (the “Expense Limitation Agreement”) under which, until November 30, 2022, Destra has agreed to reduce its fees and/or absorb expenses of the Fund to ensure that total fund operating expenses after fee waiver and/or reimbursement (excluding any front-end or contingent deferred loads, brokerage fees and commissions, acquired fund fees and expenses, fees and expenses associated with instruments in other collective investment vehicles or derivative instruments (including, for example, options and swap fees and expenses), borrowing costs (such as interest and dividend expense on securities sold short), taxes and extraordinary expenses, such as litigation expenses (which may include indemnification of Fund officers and Trustees and contractual indemnification of Fund service providers (other than the Adviser)) will not exceed 1.95% of Class A Shares’ net assets, 2.45% of Class T Shares’ net assets, 2.70% of Class C Shares’ net assets, and 1.70% of Class I Shares’ net assets (the “Expense Limitation”). In consideration of Destra’s agreement to limit the Fund’s expenses, the Fund has agreed to repay Destra pro rata in the amount of any Fund expense paid or waived by Destra, subject to the limitations that: (1) the reimbursement for expenses will be made only if payable not more

than three years following the date such payment or waiver was made; and (2) the reimbursement may not be made if it would cause the Fund's then-current Expense Limitation, if any, and the Expense Limitation that was in effect at the time when Destra reimbursed, paid or absorbed the ordinary operating expenses that are the subject of the repayment, to be exceeded. The Expense Limitation agreement may be terminated before November 30, 2022 only by the Board, on 60 days' written notice to the Adviser.

ADMINISTRATION

The Fund has retained UMB Fund Services, Inc., to provide it with certain administrative services, including performing all actions related to the issuance and repurchase of Shares of the Fund. In consideration for these services, the Fund pays the Administrator a minimum monthly administration fee of \$5,750, or \$69,000 on an annualized basis. The administration fee is paid to the Administrator out of the assets of the Fund and therefore decreases the net profits or increases the net losses of the Fund. The Administrator is also reimbursed by the Fund for out-of-pocket expenses relating to services provided to the Fund, and receives a fee for transfer agency services, fund accounting and tax services. The administration fee and the other terms of the Fund's administration agreement may change from time to time as may be agreed to by the Fund and the Administrator. See "Summary of Fees and Expenses."

OPERATING EXPENSES

The Fund bears all expenses incurred in its operation, including amounts that the Fund reimburses to the Administrator under the Administration Agreement. See "Summary of Fees and Expenses" and "Fund Expenses."

DISTRIBUTIONS

Subject to the discretion of the Board and applicable legal restrictions, distributions will be paid monthly on the Shares in amounts representing substantially all of the net investment income. The level of monthly distributions (including any return of capital) is not fixed, but is expected to represent an annual rate of approximately 6.00% of the Fund's current NAV per Share. Distributions will be paid at least annually on the Shares in amounts representing substantially all of the net capital gains, if any, earned each year. From time to time, to maintain a stable level of distributions, the Fund may also pay distributions from offering proceeds or borrowings. A distribution from offering proceeds is treated as a return of capital (Shareholders' original investment in the Fund) and generally will reduce a Shareholder's basis in his or her Shares, which may increase the capital gain or reduce the capital loss realized upon the sale of such Shares. Any amounts received in excess of a Shareholder's basis are generally treated as capital gain, assuming the Shares are held as capital assets.

Subject to the Board's discretion and applicable legal restrictions, the Fund from time to time may also pay special interim distributions in the form of cash or Shares. At least annually, the Fund intends to authorize and declare special cash distributions of net long-term capital gains, if any.

Each Shareholder whose Shares are registered in its own name will automatically be a participant under the Fund's dividend reinvestment program (the "DRP") and have all income dividends and/or capital gains distributions automatically reinvested in the same class of Shares priced at the then-current NAV of the applicable class unless such Shareholder, at any time, specifically elects to receive income dividends and/or capital gains distributions in cash.

A Shareholder receiving Shares under the DRP instead of cash distributions may still owe taxes and, because Fund Shares are generally illiquid, may need other sources of funds to pay any taxes due.

All correspondence or requests for additional information regarding the DRP, including inquiries and elections to receive income dividends and/or capital gains distributions in cash, should be directed to the Fund at Destra Multi-Alternative Fund, c/o UMB Fund Services, Inc., 235 W. Galena Street, Milwaukee, WI 53212. Shareholders who hold their Shares in the name of a broker or dealer participating in the offering should contact the broker or dealer to determine whether and how they may participate in, or opt out of, the DRP. See "Distributions."

BOARD OF TRUSTEES

The Board has overall responsibility for monitoring and overseeing the Fund's management and operations. A majority of the Trustees are considered independent and are not "interested persons" (as defined in the 1940 Act) of the Fund or the Advisers (collectively, "Independent Trustees"). See "Management of the Fund."

THE OFFERING

The Fund is offering on a continuous basis up to 18,666,666.66 Shares in multiple classes in this offering (the "Offering"). Shares are offered through the Fund's distributor, Destra Capital Investments LLC (the "Distributor"), at a public offering price equal to the then-current NAV per Share of the applicable class, plus, in the case of Class A Shares and Class T Shares, the applicable Sales Load. "Sales Load" includes selling commissions of up to 5.75% for Class A Shares and up to 3.00% for Class T Shares. Shares may be purchased on a daily basis on each day that the New York Stock Exchange (the "NYSE") is open for business.

The Fund has been granted exemptive relief by the SEC permitting it to offer multiple classes of Shares. This offering currently includes the following classes: Class I Shares, Class A Shares, Class T Shares and Class C Shares. In the future, other classes of Shares may be registered and included in this Offering.

OFFERING EXPENSES

Under the Administration Agreement, the Fund, either directly or through reimbursement to Destra or its affiliates, is responsible for its offering costs. Offering costs primarily include legal, accounting, printing and other expenses relating to this Offering, including costs associated with technology integration between the Fund's systems and those of its distribution partners, marketing expenses, salaries and direct expenses of Destra's and Validus' personnel, employees of their affiliates and others while engaged in registering and marketing the Shares, including the development of marketing materials and presentations, training and educational meetings, and generally coordinating the marketing process for the Fund.

INVESTOR SUITABILITY

Before making your investment decision, you should (i) consider the suitability of this investment with respect to your investment objectives and personal financial situation and (ii) consider factors such as your personal net worth, income, age, risk tolerance and liquidity needs. An investment in the Fund should not be viewed as a complete investment program.

ERISA PLANS AND OTHER TAX-EXEMPT ENTITIES

Investors subject to the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), and other tax-exempt entities, including employee benefit plans, IRAs, 401(k) plans and Keogh plans, may purchase Shares. Because the Fund is registered as an investment company under the 1940 Act, the underlying assets of the Fund will not be considered to be "plan assets" of the ERISA plans investing in the Fund for purposes of ERISA's fiduciary responsibility and prohibited transaction rules. Thus, none of the Fund nor Destra nor Validus will be a fiduciary under and within the meaning of ERISA with respect to the assets of any ERISA plan that becomes a Shareholder, solely as a result of the ERISA plan's investment in the Fund. See "ERISA Considerations."

SHAREHOLDER SERVICING FEES

Class A Shares, Class T Shares and Class C Shares are subject to a monthly shareholder servicing fee at an annual rate of up to 0.25% of the average daily net assets of the Fund attributable to the respective Share class. Class I Shares are not subject to a shareholder servicing fee. See "Distribution of Shares."

DISTRIBUTION FEES

The Class T and Class C Shares pay to the Distributor a distribution fee (the "Distribution Fee"). The Distribution Fee accrues at annual rates equal to 0.50% for Class T Shares and 0.75% for Class C Shares of

the Fund's average net assets attributable to the respective Share class and is payable on a monthly basis. Class A and Class I Shares are not subject to a Distribution Fee. See "Distribution of Shares."

TRANSFER AGENT AND FUND ADMINISTRATOR

UMB Fund Services, Inc. serves as the transfer agent and administrator (the "Administrator") of the Fund. See "Management of the Fund."

CLOSED-END INTERVAL STRUCTURE

The Fund has been organized as a closed-end management investment company structured as an "interval fund" pursuant to Rule 23c-3 under the 1940 Act. Closed-end funds differ from open-end management investment companies (commonly known as mutual funds) in that investors in a closed-end fund do not have the right to redeem their shares on a daily basis. In addition, unlike most closed-end funds, which typically list their shares on a securities exchange, the Fund does not list the Shares for trading on any securities exchange at this time. Although the

Fund intends to list the Shares on a securities exchange upon meeting applicable listing eligibility requirements, the Fund's Shares might not be listed on an exchange in the foreseeable future, if at all. Unless the Fund's Shares are listed on an exchange, the Fund does not expect any secondary market to develop for the Shares. Therefore, an investment in the Fund, unlike an investment in a mutual fund or a listed closed-end fund, is not a liquid investment. Instead, the Fund will provide limited liquidity to Shareholders by offering to repurchase a limited amount of the Fund's Shares quarterly.

ANNUAL REPURCHASE OF SHARES

The Fund has adopted a fundamental policy to make annual repurchase offers, at NAV, of no less than 5% and no more than 25% of the Fund's Shares outstanding. Typically, the Fund will seek to conduct annual repurchase offers for 5% of the Fund's Shares outstanding. Repurchase offers in excess of 5% will be made solely at the discretion of the Board. There is no guarantee that Shareholders will be able to sell all of the Shares they desire to sell in an annual repurchase offer. See "Annual Repurchases of Shares."

SHARE CLASSES

The Fund offers four different classes of Shares: Class I Shares, Class A Shares, Class T Shares and Class C Shares. The Fund began continuously offering its common shares on March 5, 2012. As of July 1, 2014, the Fund simultaneously redesignated its issued and outstanding common shares as Class A Shares and created its Class L, Class C and Class I Shares. As of July 1, 2019, the Fund redesignated its issued and outstanding Class L Shares as Class T Shares. An investment in any Share class of the Fund represents an investment in the same assets of the Fund. However, the purchase restrictions and ongoing fees and expenses for each Share class are different. The fees and expenses for the Fund are set forth in "Summary of Fees and Expenses." If an investor has hired an intermediary and is eligible to invest in more than one Share class, the intermediary may help determine which Share class is appropriate for that investor. When selecting a Share class, you should consider which Share classes are available to you, how much you intend to invest, how long you expect to own Shares, and the total costs and expenses associated with a particular Share class.

Each investor's financial considerations are different. You should speak with your financial advisor to help you decide which Share class is best for you. The Distributor also may enter into agreements with financial intermediaries and their agents that have made arrangements with the Fund and are authorized to buy and sell Shares of the Fund (collectively, "Financial Intermediaries") for the sale and servicing of Shares. Not all Financial Intermediaries offer all classes of Shares. If your Financial Intermediary offers more than one class of Shares, you should carefully consider which Share class to purchase.

VALUATIONS

Destra determines the values of the Fund's assets in good faith pursuant to the Fund's valuation policy and consistently applied valuation process, which was developed by the Board's audit committee and approved by the Board. Portfolio securities and other assets for which market quotes are readily available are

valued at market value. In circumstances where market quotes are not readily available, the Board has adopted methods for determining the fair value of such securities and other assets, and has delegated the responsibility for applying the valuation methods to Destra. On a quarterly basis, the Board reviews the valuation determinations made with respect to the Fund's investments during the preceding quarter and evaluates whether such determinations were made in a manner consistent with the Fund's valuation process. See "Determination of Net Asset Value."

SUMMARY OF TAXATION

The Fund has elected to be treated for U.S. federal income tax purposes, and intends to qualify annually, as a Regulated Investment Company ("RIC") under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"). Accordingly, the Fund generally will not be subject to corporate-level U.S. federal income taxes on any net ordinary income or capital gains that are currently distributed to Shareholders. To qualify and maintain its qualification as a RIC for U.S. federal income tax purposes, the Fund must, among other things, meet certain specified source-of-income and asset diversification requirements and distribute annually at least 90% of the sum of its "investment company taxable income" (which includes its net ordinary income and the excess, if any, of its net short-term capital gains over its net long-term capital losses) and its net tax-exempt interest income, if any. See "Distributions" and "Tax Aspects."

FISCAL YEAR

For accounting purposes, the Fund's fiscal year is the 12-month period ending on February 28 (or, in applicable years, February 29).

REPORTS TO SHAREHOLDERS

After the end of each calendar year, the Fund will furnish to Shareholders a statement on Form 1099-DIV identifying the sources of the distributions paid by the Fund to Shareholders for U.S. federal income tax purposes. In addition, the Fund will make available to Shareholders an unaudited semi-annual and an audited annual report within 60 days after the close of the fiscal period for which the report is being made, or as otherwise required by the 1940 Act.

RISK FACTORS

Investing in the Fund involves risks, including the risk that a Shareholder may receive little or no return on their investment or that a Shareholder may lose part or all of its investment.

Below is a list of the principal risks of investing in the Fund. Different risks may be more significant at different times, depending on market conditions. **For a more complete discussion of the risks of investment in the Fund, see "Types of Investments and Related Risks."**

- **Alternative Investment Funds (AIFs) Risk.** AIFs are subject to management and other expenses, which will be indirectly paid by the Fund. As a result, the cost of investing in the Fund will be higher than the cost of investing directly in AIFs and also may be higher than other funds that invest directly in stocks and bonds. Each AIF is subject to specific risks, depending on the nature of its investment strategy. The Fund may invest in private investment funds and/or hedge funds, which may pursue alternative investment strategies. Hedge funds often engage in speculative investment practices such as leverage, short-selling, arbitrage, hedging, derivatives, and other strategies that may increase investment loss. Private funds and hedge funds can be highly illiquid, and often charge high fees that can erode performance.
- **BDC Risk.** BDCs have little or no operating history and may carry risks similar to those of a private equity or venture capital fund. To the extent a BDC focuses its investments in a specific sector, the BDC will be susceptible to adverse conditions and economic or regulatory occurrences affecting the specific sector or industry group, which tends to increase volatility and result in higher risk. Private and public non-traded BDCs are illiquid and it may not be possible to redeem shares or to do so without paying a substantial penalty. Publicly-traded BDCs usually trade at a discount to their NAV because they generally invest in unlisted securities and typically have limited access to capital

markets. A significant portion of a BDC's investments are recorded at fair value as determined by its board of directors which may create uncertainty as to the value of the BDC's investments.

- **Credit Risk.** Credit risk is the risk that an issuer of a security may be unable or unwilling to make dividend, interest and principal payments when due and the related risk that the value of a security may decline because of concerns about the issuer's ability or willingness to make such payments. Credit risk may be heightened for the Fund because it will invest in below investment grade securities.
- **Distribution Risk.** The Fund's distribution policy is expected to result in distributions that equal a fixed percentage of the Fund's NAV per share. All or a portion of a distribution may consist of a return of capital. Shareholders should not assume that the source of a distribution from the Fund is net profit. Shareholders should note that return of capital will reduce the tax basis of their Shares and potentially increase the taxable gain, if any, upon disposition of their Shares.
- **Equity Risk.** To the extent the Fund invests in common stocks, preferred stocks, convertible securities, rights and warrants, it will be exposed to equity risk. Equity markets may experience volatility and the value of equity securities may move in opposite directions from each other and from other equity markets generally. Preferred stocks often behave more like fixed income securities. If interest rates rise, the value of preferred stocks having a fixed dividend rate tends to fall. The value of convertible securities fluctuates with the value of the underlying stock or the issuer's credit rating. Rights and warrants do not necessarily move in parallel with the price of the underlying stock and the market for rights and warrants may be limited.
- **Interest Rate Risk.** If interest rates increase, the value of the Fund's investments generally will decline. Securities with longer maturities tend to produce higher yields, but are more sensitive to changes in interest rates and are subject to greater fluctuations in value. The risks associated with increasing interest rates are heightened given that interest rates are near historic lows, but are expected to increase in the future with unpredictable effects on the markets and the Fund's investments.
- **Below Investment Grade Rating Risk.** Debt instruments that are rated below investment grade are often referred to as "high yield" securities or "junk bonds." Junk bonds and similar instruments often are considered to be speculative with respect to the capacity of the borrower to timely repay principal and pay interest or dividends in accordance with the terms of the obligation and may have more credit risk than higher rated securities. These instruments may be particularly susceptible to economic downturns.
- **Leverage Risk.** The use of leverage, such as borrowing money to purchase securities, will cause the Fund to incur additional expenses and magnify the Fund's gains or losses.
- **Liquidity Risk.** The Fund may invest in investments that, at the time of investment are illiquid. The Fund may also invest in restricted securities. Illiquid investments and restricted securities may be difficult to dispose of at a fair price at the times when the Fund believes it is desirable to do so. The market price of illiquid investments and restricted securities generally is more volatile than that of more liquid investments, which may adversely affect the price that the Fund pays for or recovers upon the sale of such securities. In addition, less liquid investments that the Fund may want to invest in may be difficult or impossible to purchase.
- **Management Risk.** The Sub-Adviser's judgments about the attractiveness, value and potential appreciation of particular asset classes or securities in which the Fund invests may prove to be incorrect and may not produce the desired results.
- **Investment and Market Risk.** An investment in the Shares is subject to investment risk, including the possible loss of the entire principal amount invested. An investment in the Shares represents an indirect investment in the portfolio of securities and investments owned by the Fund, and the value of these securities may fluctuate, sometimes rapidly and unpredictably.
- **MLP Risk.** Investments in MLPs involve risks different from those of investing in common stock including risks related to limited control and limited rights to vote on matters affecting the MLP, risks related to potential conflicts of interest between the MLP and the MLP's general partner, cash flow risks, dilution risks and risks related to the general partner's limited call right. MLPs, typically, do not pay U.S. federal income tax at the partnership level. Instead, each partner is allocated a share of the

partnership's income, gains, losses, deductions and expenses. A change in current tax law or in the underlying business mix of a given MLP could result in an MLP being treated as a corporation for U.S. federal income tax purposes, which would result in such MLP being required to pay U.S. federal income tax on its taxable income. MLPs are generally considered interest-rate sensitive investments.

- **Medium and Small Company Risk.** The earnings and prospects of medium and small companies are more volatile than those of larger companies. Medium and small companies also may experience higher failure rates than large companies. In addition, the securities of medium and small companies may trade less frequently and in smaller volumes than the securities of large companies, which may disproportionately affect their market price, tending to make them less liquid and fall more in response to selling pressure than is the case with large companies. Finally, medium and small companies may have limited markets, product lines or financial resources and may lack management experience.
- **Pandemic Risk.** The spread of an infectious illness caused by a novel strain of coronavirus (known as COVID-19) has caused volatility, severe market dislocations and liquidity constraints in many markets, including securities the Fund holds, and may adversely affect the Fund's investments and operations. The outbreak has resulted in travel and border restrictions, quarantines, curfews, restrictions on large gatherings, cancellations, lower consumer activity, diminished demand for a wide range of products and services, disruption in manufacturing and supply chains and general public concern and uncertainty. While governments have taken unprecedented actions to limit disruption to the financial system caused by COVID-19, global financial markets have experienced, and may continue to experience, significant losses in value, volatility and liquidity constraints resulting from the spread of the disease. The future impact of COVID-19 is currently unknown, and it may exacerbate other risks that apply to the Fund, including political, social and economic risks. Any such impact could adversely affect the Fund's performance and the performance of the securities in which the Fund invests, and may lead to losses on your investment in the Fund. The full extent of the impact of COVID-19 on the Fund's performance cannot be determined at this time and will depend on future developments, including the duration and the continued spread of the disease. Like COVID-19, other infectious illness outbreaks, epidemics or pandemics that may arise in the future, could adversely affect the economies of many nations or the entire global economy, the financial performance of individual issuers, borrowers and sectors, the health of the markets generally, and the Fund's performance in potentially significant and unforeseen ways.
- **Real Estate Industry Concentration Risk.** The Fund concentrates its investments in the real estate industry and its portfolio may be significantly impacted by the performance of the real estate market and may experience more volatility and be exposed to greater risk than a more diversified portfolio. The value of the Fund's shares is affected by factors affecting the value of real estate and the earnings of companies engaged in the real estate industry. These factors include, among others: (i) changes in general economic and market conditions; (ii) changes in the value of real estate properties; (iii) risks related to local economic conditions, overbuilding and increased competition; (iv) increases in property taxes and operating expenses; (v) changes in zoning laws; (vi) casualty and condemnation losses; (vii) variations in rental income, neighborhood values or the appeal of property to tenants; (viii) the availability of financing, and (ix) changes in interest rates. Many real estate companies utilize leverage, which increases investment risk and could adversely affect a company's operations and market value in periods of rising interest rates. The value of securities of companies in the real estate industry may go through cycles of relative under-performance and over-performance in comparison to equity securities markets in general. To the extent that the Fund invests in real estate securities designated as REITs, if a court were to disregard the limited liability legal structure of a REIT, the Fund could be liable for a portion of claims in excess of that REIT's assets, such as claims arising from environmental problems. Failure to qualify as a REIT under the Internal Revenue Code would increase the REIT's tax liability thereby reducing the REIT's net income available for investment or distribution; additionally, certain preferred tax treatment of distributions would no longer be passed through to investors.
- **Repurchase Policy Risk.** Annual repurchases by the Fund of its Shares typically are funded from available cash or sales of portfolio securities. The sale of securities to fund repurchases could reduce the market price of those securities, which in turn would reduce the Fund's NAV.

- **Structured Note Risk.** The value of a structured note will be influenced by time to maturity, level of supply and demand for the type of note; interest rates, commodity, currency or relevant index market volatility; changes in the issuer's credit quality rating; and economic, legal, political or geographic events that affect the reference index. In addition, there may be a lag between a change in the value of the reference index and the value of the structured note. The Fund may also be exposed to increased transaction costs when it seeks to sell such notes in the secondary market. In the event that the issuer of the structured note defaults, it is possible that the Fund could lose its entire investment.
- **Underlying Funds Risk.** The Fund will incur higher and duplicative expenses, including advisory fees, when it invests in ETFs, mutual funds, closed-end funds and AIFs. There is also the risk that the Fund may suffer losses due to the investment practices of the Underlying Funds (such as the use of derivatives). The Underlying Funds in which the Fund invests that attempt to track an index may not be able to replicate exactly the performance of the indices they track, due to transactions costs and other expenses of the Underlying Funds. The shares of closed-end funds frequently trade at a discount to their net asset value. There can be no assurance that the market discount on shares of any closed-end fund purchased by the Fund will ever decrease, and it is possible that the discount may increase.
- **Valuation Risk.** Illiquid investments must be valued by the Fund using fair value procedures. Fair valuation involves subjective judgments, and it is possible that the fair value determined for a security may differ materially from the value that could be realized upon the sale of the security.

Additional risks relating to the Fund include risks resulting from:

- **Closed-End Interval Fund Structure; Liquidity Risks.** Closed-end funds differ from open-end management investment companies (commonly known as mutual funds) in that investors in a closed-end fund do not have the right to redeem their shares on a daily basis. Unlike most closed-end funds, which typically list their shares on a securities exchange, the Fund does not list the Shares for trading on any securities exchange, and, unless the Shares are listed on a securities exchange, the Fund does not expect any secondary market to develop for the Shares.
- **Non-Diversification Risk.** The Fund is classified as "non-diversified" under the 1940 Act. As a result, it can invest a greater portion of its assets in obligations of a single issuer than a "diversified" fund. The Fund may therefore be more susceptible than a diversified fund to being adversely affected by any single corporate, economic, political or regulatory occurrence.
- **Risks Relating to the Fund's RIC Status.** If the Fund fails to qualify for taxation as a RIC for any reason, it would be subject to regular corporate-level U.S. federal income taxes on all of its taxable income and gains, and the resulting corporate taxes could substantially reduce its net assets, the amount of income available for distribution and the amount of its distributions.

Accordingly, the Fund should be considered a speculative investment that entails substantial risks, and prospective investors should invest in the Fund only if they can sustain a complete loss of their investments.

SUMMARY OF FEES AND EXPENSES

The following table illustrates the aggregate fees and expenses that the Fund expects to incur and that holders of Shares can expect to bear directly or indirectly.

Shareholder Fees	Class I	Class A	Class T	Class C
Maximum Sales Load Imposed on Purchases (as a percentage of offering price)	None	5.75%	3.00%	None
Annual Fund Expenses⁽¹⁾ (as a percentage of average net assets attributable to Shares)				
Management Fee	1.35%	1.35%	1.35%	1.35%
Interest Payments on Borrowed Funds ⁽²⁾	0.58%	0.58%	0.58%	0.58%
Other Expenses				
Shareholder Servicing Fee ⁽³⁾	None	0.25%	0.25%	0.25%
Distribution Fee ⁽³⁾	None	None	0.50%	0.75%
Remaining Other Expenses	0.92%	0.92%	0.92%	0.92%
Acquired Fund Fees and Expenses ⁽⁴⁾	1.41%	1.41%	1.41%	1.41%
Total Annual Fund Operating Expenses	4.26%	4.51%	5.01%	5.26%
Fee Waiver and/or Expense Reimbursement ⁽⁵⁾	-0.57%	-0.57%	-0.57%	-0.57%
Total Annual Fund Operating Expenses (after Fee Waiver and/or Expense Reimbursement) ⁽⁵⁾	<u>3.69%</u>	<u>3.94%</u>	<u>4.44%</u>	<u>4.69%</u>

- (1) The operating expenses in this fee table will not correlate to the expense ratio in the Fund's financial highlights because this fee table reflects the Fund's current Management Fee and only the direct operating expenses incurred by the Fund and not Acquired Fund Fees and Expenses.
- (2) Interest Payments on Borrowed Funds are based on estimated amounts for the current fiscal year.
- (3) Class A Shares, Class T Shares and Class C Shares are subject to a monthly shareholder servicing fee at an annual rate of up to 0.25% of the average daily net assets of the Fund attributable to the respective share class. Class T Shares and Class C Shares will pay the Distributor a Distribution Fee that will accrue at an annual rate equal to 0.50% for Class T Shares and 0.75% for Class C Shares of the average daily net assets attributable to the respective share class and will be payable on a monthly basis. See "Distribution of Shares."
- (4) Acquired Fund Fees and Expenses are the indirect costs of investing in other investment companies, including private funds, but does not include REITs.
- (5) Destra has contractually agreed to reduce its fees and/or absorb expenses of the Fund, until at least November 30, 2022, to ensure that total annual Fund operating expenses after fee waiver and/or reimbursement (excluding any front-end or contingent deferred loads, brokerage fees and commissions, acquired fund fees and expenses, fees and expenses associated with instruments in other collective investment vehicles or derivative instruments (including for example options and swap fees and expenses), borrowing costs (such as interest and dividend expense on securities sold short), taxes and extraordinary expenses, such as litigation expenses (which may include indemnification of Fund officers and Trustees and contractual indemnification of Fund service providers (other than the Adviser)) will not exceed 1.95% for Class A Shares, 2.45% for Class T Shares, 2.70% for Class C Shares and 1.70% for Class I Shares of each class's net assets, respectively (the "Expense Limitation"). In consideration of Destra's agreement to limit the Fund's expenses, the Fund has agreed to repay Destra pro rata in the amount of any Fund expense paid or waived by Destra, subject to the limitations that: (1) the reimbursement for expenses will be made only if payable not more than three years following the date such payment or waiver was made; and (2) the reimbursement may not be made if it would cause the Fund's then-current Expense Limitation, if any, and the Expense Limitation that was in effect at the time when Destra reimbursed, paid or absorbed the ordinary operating expenses that are the subject of the repayment, to be exceeded. Destra may not terminate the Expense Limitation Agreement during

the initial term. The Expense Limitation agreement may be terminated before November 30, 2022 only by the Fund's Board of Trustees, on 60 days' written notice to the Adviser.

The Fees and Fund Expenses Table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund. More information about sales load discounts that may apply to purchases of Class A Shares and Class T Shares is available from your financial professional. More information about management fees, fee waivers and other expenses is available in "Management of the Fund" starting on page 58 of this prospectus.

Examples:

The following examples demonstrate the projected dollar amount of total expenses that would be incurred over various periods with respect to a \$1,000 investment assuming the Fund's direct and indirect annual operating expenses would remain at the percentage levels set forth in the table above and Shares earn a 5.0% annual return (the example assumes the Fund's current Expense Limitation will remain in effect until November 30, 2022):

Share Class	1 Year	3 Years	5 Years	10 Years
Class I	\$37	\$124	\$212	\$439
Class A	\$95	\$181	\$268	\$490
Class T	\$73	\$171	\$269	\$513
Class C	\$47	\$152	\$257	\$516

The Examples above should not be considered a representation of the Fund's future expenses, and actual expenses may be greater or less than those shown. For example, although the table above assumes the Fund's current Expense Limitation will remain in effect until November 30, 2022, the Fund currently expects to maintain an Expense Limitation for the life of the Fund. While the Examples assume a 5.0% annual return, as required by the SEC, the Fund's performance will vary and may result in a return greater or less than 5.0%. In addition, the Examples assume reinvestment of all distributions pursuant to the Dividend Reinvestment Plan ("DRP"). If Shareholders request repurchase proceeds be paid by wire transfer, such Shareholders will be assessed an outgoing wire transfer fee at prevailing rates charged by UMB Fund Services, Inc. (the "Administrator"). If a Shareholder requests an expedited payment by wire transfer, the applicable outgoing wire transfer fee may be deducted from the Shareholder's repurchase proceeds. For a more complete description of the various fees and expenses borne directly and indirectly by the Fund, see "Fund Expenses," "Management Fee" and "Purchases of Shares."

The financial highlights tables are intended to help you understand the Fund's financial performance. The total returns in the tables represent the rate that an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions). This information has been derived from the Fund's financial statements, found in the Fund's annual report for the year ended February 28, 2021 ("Annual Report"), which has been audited by Cohen & Company, Ltd., an independent registered public accounting firm, whose report, along with the Fund's financial statements and notes thereto, appears in the Fund's Annual Report. The Fund's Annual Report, which is incorporated by reference into this Prospectus, is available upon request and without charge from the Fund by calling 844-9DESTRA (933-7872), accessing the Fund's "Literature" page on the Fund's website at destracapital.com or by following this hyperlink: https://www.sec.gov/Archives/edgar/data/0001523289/000182912621003603/destramultialter_ncsr.htm. The information for the periods ended February 28, 2019, February 28, 2018 and February 28, 2017 was audited by the Fund's former independent registered public accounting firm. The information in the tables below should be read in conjunction with each of those financial statements and the notes thereto.

(1) The information for the periods prior to 2020 was audited by the Fund's former independent registered public accounting firm.

(2) Based on average shares outstanding during the period.

(3) Based on the net asset value as of period end. Assumes an investment at net asset value at the beginning of the period, reinvestment of all distributions during the period and does not include payment of the maximum sales charge. The return would have been lower if certain expenses had not been waived or reimbursed by the investment adviser. Total returns for periods less than one year are not annualized.

(4) Annualized for periods less than one year.

(5) Ratios do not include expenses of the underlying Alternative Investment Funds in which the Fund invests.

(6) The contractual fee and expense waiver is reflected in both the net expense and net investment income (loss) ratios.

(7) Recognition of net investment income by the Fund is affected by the timing of the declaration of dividends by the underlying Alternative Investment Funds in which the Fund invests. Ratios do not include net investment income of the Alternative Investment Funds in which the Fund invests.

(8) Not annualized.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

Some of the statements in this prospectus constitute forward-looking statements because they relate to future events or the Fund's future performance or financial condition. The forward-looking statements contained in this prospectus may include statements as to:

- the Fund's future operating results;
- the Fund's business prospects and the prospects of the companies in which the Fund may invest;
- the impact of the investments that the Fund expects to make;
- the ability of the Fund's portfolio companies to achieve their objectives;
- the Fund's current and expected financing arrangements and investments;
- changes in the general interest rate environment;
- the adequacy of the Fund's cash resources, financing sources and working capital;
- the timing and amount of cash flows, distributions and dividends, if any, from the Fund's portfolio companies;
- the Fund's contractual arrangements and relationships with third parties;
- actual and potential conflicts of interest with other accounts managed by Destra and Validus, or any of their affiliates;
- the dependence of the Fund's future success on the general economy and its effects on the industries in which the Fund may invest;
- the Fund's use of financial leverage, if any;
- the ability of the Advisers to locate suitable investments for the Fund and to monitor and administer the Fund's investments;
- the ability of the Advisers or their affiliates to attract and retain highly talented professionals;
- the Fund's ability to maintain its qualification as a RIC;
- the impact on the Fund's business of The Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") and the rules and regulations thereunder;
- the effect of changes to tax legislation and the Fund's tax position; and

- the tax status of the enterprises in which the Fund may invest.

In addition, words such as “anticipate,” “believe,” “expect” and “intend” indicate a forward-looking statement, although not all forward-looking statements include these words. The forward-looking statements contained in this prospectus involve risks and uncertainties. The Fund’s actual results could differ materially from those implied or expressed in the forward-looking statements for any reason, including the factors set forth in “Types of Investments and Related Risks” and elsewhere in this prospectus. Other factors that could cause actual results to differ materially include:

- changes in the economy, including material changes in interest rates or credit spreads;
- risks associated with possible disruption in the Fund’s operations or the economy generally due to terrorism or natural disasters; and
- future changes in laws or regulations and conditions in the Fund’s operating areas.

The Fund has based the forward-looking statements included in this prospectus on information available to the Fund on the date of this prospectus. Except as required by the federal securities laws, the Fund undertakes no obligation to revise or update any forward-looking statements, whether as a result of new information, future events or otherwise. Prospective investors are advised to consult any additional disclosures that the Fund may make directly to such prospective investors or through reports that the Fund may file in the future with the SEC. The forward-looking statements and projections contained in this prospectus are excluded from the safe harbor protection provided by Section 27A of the Securities Act of 1933, as amended (the “Securities Act”) and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”).

THE FUND

The Fund is a continuously offered, non-diversified, closed-end management investment company that is operated as an interval fund and registered under the 1940 Act. The Fund was organized as a Delaware statutory trust on June 3, 2011 and commenced operations on March 16, 2012. The Fund’s principal office is located at c/o Destra Capital Advisors LLC, 444 West Lake Street, Suite 1700, Chicago, IL 60606, and its telephone number is 844-9DESTRA (933-7872).

Destra is the investment adviser to the Fund. Destra oversees the management of the Fund’s activities and is responsible for developing investment guidelines with Validus and overseeing investment decisions for the Fund’s portfolio. See “The Adviser.” Destra has engaged Validus to act as the Fund’s investment sub-adviser and make investment decisions for the Fund’s portfolio, subject to the oversight of Destra. Validus identifies investment opportunities and executes on its trading strategies subject to guidelines agreed to by Destra and Validus. See “The Sub-Adviser.” Responsibility for monitoring and overseeing the Fund’s management and operation is vested in the individuals who serve on the Board. See “Management of the Fund.”

THE ADVISER

Destra Capital Advisors LLC, an investment adviser registered with the SEC under the Advisers Act, serves as the Fund’s investment adviser. Destra has responsibility for the overall management of the Fund. It is also responsible for managing the Fund’s business affairs and providing day-to-day administrative services to the Fund. The principal office of Destra is located at 444 West Lake Street, Suite 1700, Chicago, Illinois 60606. As of May 31, 2021, Destra had approximately \$475 million in assets under management.

Destra is a wholly-owned subsidiary of Destra Capital Management LLC, a sponsor of investment funds.

Please see “Management of the Fund” for information on the Key Personnel of Destra.

THE SUB-ADVISER

Validus acts as the Fund’s investment sub-adviser and makes investment decisions for the Fund’s portfolio subject to the oversight of Destra. Prior to August 3, 2020, Pinhook Capital, LLC (“Pinhook”),

an affiliate of Validus, served as the Fund's sub-adviser. Validus was established in June 2012 for the purpose of providing investment advisory services based on a fundamental, bottom-up, stock specific research process, anchored by a proprietary ranking system, and founded on pre-existing principles. The firm provides separately managed account services as well as model strategies to institutional parties. The Fund has filed a notice of eligibility for exclusion from the definition of the term "commodity pool operator" with the U.S. Commodity Futures Trading Commission (the "CFTC") and the National Futures Association, which regulate trading in the futures markets. Pursuant to CFTC Regulation 4.5, the Fund is not subject to regulation as a commodity pool under The Commodity Exchange Act (the "CEA"). Validus is operated by a person who has claimed an exclusion from the definition of the term "commodity pool operator" under the 1940 Act and, therefore, not subject to registration or regulation as a pool operator under the 1940 Act. Validus is located at 13520 Evening Creek Drive N., Suite 300, San Diego, CA 92128. As of May 31, 2021, Validus had approximately \$240 million in assets under management. Validus uses both a quantitative screening process and a qualitative selection process when selecting securities for investment by the Fund in connection with the Fund's strategy. An optimized asset allocation model is used to quantify targeted exposure ranges for various alternative sectors. Validus manages investments over a long-term time horizon, while being mindful of the historical context of the markets. Validus employs a regimen of quantitative and qualitative criteria to arrive at a universe of investments which it considers to be "best-of-breed." Validus is paid by Destra out of the advisory fee Destra is paid by the Fund. Please see "Management of the Fund" for information on the Key Personnel of Validus.

USE OF PROCEEDS

The net proceeds of the Fund's continuous offering of Shares, after payment of any sales load, will be invested in accordance with the Fund's investment objective and policies (as stated below) as soon as practicable after receipt, except to the extent proceeds are held in cash to pay dividends or expenses, satisfy repurchase offers or for temporary defensive purposes. Pending investment of the net proceeds in accordance with the Fund's investment objective and policies, the Fund will invest in money market or short-term fixed income mutual funds.

INVESTMENT OBJECTIVE, OPPORTUNITIES AND STRATEGIES

Investment Objective

The Fund's investment objective is to seek returns from capital appreciation and income with an emphasis on income generation. There can be no assurance that the Fund will be able to achieve its investment objective.

Investment Opportunities and Strategies

General Investment Strategy. The Fund pursues its investment objective by investing primarily in income-producing securities, including: (1) public and private real estate securities (including securities issued by real estate funds), (2) AIFs, which include BDCs, funds commonly known as "hedge funds" and other private investment funds, which may also include funds that primarily hold real estate investments, (3) master limited partnerships, (4) common and preferred stocks, and (5) structured notes, notes, bonds and asset-backed securities. The Fund defines AIFs as BDCs, real estate property funds, limited partnerships and limited liability companies that pursue investment strategies linked to real estate, small businesses or other investments that serve as alternatives to investments in traditional stocks and bonds (which could include any type of investment that is consistent with the investment strategy and not a traditional stock or bond). The Fund invests in securities of issuers without restriction as to market capitalization. The majority of the Fund's investments are not traded on an exchange or in over-the-counter markets; consequently, the majority of the Fund's investments are illiquid. The Fund's investments may include investments in non-U.S. securities.

The Fund provides investors with access to an actively managed portfolio of liquid and illiquid alternative investments, many of which are unavailable to the typical individual investor due to high minimum investment and accredited/qualified investor requirements. The Sub-Adviser employs a similar multi-asset approach to the Endowment Model while actively managing individual holdings and generating

significant non-correlated income. The Endowment Model is a form of the strategic asset allocation model of portfolio construction that involves diversifying investments across strategies, asset classes and investment horizons, as opposed to the standard long-only stock and bond model. To that end, the Fund seeks to:

- Deliver current income to investors with low correlation to traditional equity and fixed-income investments by pursuing securities in asset classes considered non-traditional in nature;
- Seek illiquidity premiums, as the Fund has no finite life and therefore can pursue less liquid strategies as part of an overall portfolio, subject to near-term investor liquidity needs;
- Proactively manage security selection and asset class exposures through cutting-edge research capability, rigorous due diligence efforts, and a consistently applied investment process; and
- Provide institutional access on favorable terms; as the Sub-Adviser has added to the depth of the portfolio management team, the Fund has benefited from enhanced security selection capabilities and industry relationships in sourcing institutional-quality investments.

Under normal circumstances, the Fund invests over 25% of its net assets in the real estate industry, which it defines to include interests, debt or equity of both publicly traded and private companies engaged in the real estate industry, including, but not limited to, REITs, mortgage backed securities, interest in pooled investment entities, and other forms of securities relating to or involving real estate. This policy is fundamental and may not be changed without Shareholder approval. Real estate funds are pooled investment vehicles that invest primarily in income-producing real estate or real estate-related loans or interests. The Statement of Additional Information contains a list of the fundamental (those that may not be changed without a Shareholder vote) and non-fundamental investment policies of the Fund under the heading “INVESTMENT RESTRICTIONS.”

Validus uses both a quantitative screening process and a qualitative selection process when selecting securities for investment by the Fund in connection with the Fund’s strategy. An optimized asset allocation model is used to quantify targeted exposure ranges for various alternative sectors. No assurance can be given that any or all investment strategies, or the Fund’s investment program, will be successful. The Sub-Adviser utilizes a clearly defined philosophy which provides a disciplined investment strategy. When determining an asset allocation, the Sub-Adviser typically reviews at least the last ten years (if available) of market data history, which the Sub-Adviser regards as the most relevant for market forecasting purposes. The Sub-Adviser may strategically rebalance its asset allocation according to the current market conditions, but will remain true to its fundamental analysis with respect to real estate asset class and sector risk over time. The Sub-Adviser manages investments over a long-term time horizon, while being mindful of the historical context of the markets. The Sub-Adviser employs a regimen of quantitative and qualitative criteria to arrive at a universe of investments which it considers to be “best-of-breed.” The Sub-Adviser primarily selects securities with the highest expected income from a sector peer group of issuers with similar market capitalization, credit quality and/or risk-adjusted metrics. Secondly, the Sub-Adviser considers securities’ potential for capital appreciation. When constructing the Fund’s portfolio, the Sub-Adviser selects securities from sectors that it believes have relatively low volatility and will not be highly correlated to each other or to the equity or fixed income markets, generally. The Sub-Adviser considers low to moderate correlation or volatility strategies to be those which are expected to have 75% or less of the volatility of, or correlation to, the relevant market or index.

Unless otherwise stated herein or in the SAI, the Fund’s investment policies are non-fundamental policies and may be changed by the Fund’s Board of Trustees without prior approval of the Fund’s Shareholders.

Portfolio Composition

Real Estate Securities

There are three main vehicles used to execute the Fund’s real estate-related investments:

- **Private and/or Non-Listed Real Estate Securities:** This investment vehicle will be used to generate current income, and/or capital appreciation that is generally less volatile than other types of real estate securities. Investment criteria will include evaluating the strength of the sponsor and management.

From an operations perspective, the Sub-Adviser will focus on the attractiveness of the specific property type; stability of income; distribution yield and distribution coverage from operations. From a financing perspective, the Sub-Adviser will focus on availability of debt and equity financing and target leverage levels. Finally, the Sub-Adviser will focus on a value-add liquidity event following the close of the offering.

- **Listed (Traded) Real Estate Securities Equities:** Investment criteria on a macro level will include: relative attractiveness to the broader stock market, the impact of the debt capital markets on real estate securities, the supply and demand for commercial real estate overall, and the supply and demand for specific property types. On a micro level, the Sub-Adviser will focus on: the attractiveness of a specific property type, quality and historic success of management, relative value price-to-earnings, price-to-cash flow or funds-from-operations within a sector, whether the security is trading at a premium or discount to its NAV, and both internal (e.g., same store growth) and external (e.g., acquisitions and development) growth prospects to drive total earnings growth.
- **Real Estate Debt:** In this investment vehicle, the Sub-Adviser will look at both current income opportunities and the ability to acquire debt or preferred stock (which the Fund defines to be a form of debt with respect to real estate) at a discount to face value. This vehicle could include, but is not limited to, secured property level debt, unsecured notes, unsecured notes and preferred equity convertible into common equity and preferred equity. Preferred equity historically trades at a higher yield and has a lower risk profile than its common equity, but also has lower capital gain potential unless it trades at a discount to par. This portion of the Sub-Adviser's debt strategy will focus on quality of management, sustainability of the business model, coverage of the common dividend and liquidity of the instrument.

Alternative Investment Funds

AIFs selected by the Sub-Adviser include BDCs, funds that invest in private debt securities, hedge funds and other issuers of private placement securities each of which may pay performance-based fees to their managers. A BDC is a form of investment company that is required to invest at least 70% of its total assets in securities (typically debt) of private companies, thinly traded U.S. public companies, or short-term high-quality debt securities. Private or non-traded BDCs are illiquid and it may not be possible for the Fund to redeem shares or to do so without paying a substantial penalty. Publicly-traded BDCs usually trade at a discount to their NAV because they invest in unlisted securities and have limited access to capital markets. Additionally, the Fund may invest up to 15% of its net assets in securities of issuers commonly known as "hedge funds," which are typically privately placed with investors without registration with the SEC, employ leverage and hedging strategies as well as pay their managers performance fees on gains. These performance fees may create an incentive for the manager of a hedge fund to enter into investments that are riskier or more speculative than would otherwise be the case. The Sub-Adviser generally seeks to invest in AIFs whose expected risk-adjusted returns are determined to be attractive and likely to have low correlations among each other or with the broad equity and fixed-income markets. The Sub-Adviser uses both a quantitative screening process and a qualitative selection process when selecting AIF securities for investment by the Fund in conjunction with its AIF strategy. To analyze AIFs, the Sub-Adviser relies on both proprietary research and research provided by third parties. The Sub-Adviser reviews each AIF's management team, operations staff, past performance, philosophy, current holdings and investment process. Specific market opportunities, competitive advantages, relative strengths and weaknesses, and other important factors are also analyzed. Once an investment is made, the new AIF is re-evaluated and tracked on a monthly or quarterly basis. An AIF may be liquidated based on manager drift in style, underperformance, change in management team, deviation from risk management discipline and change in the AIF's investment opportunity set or strategy, or any other factor that the Sub-Adviser feels will impact future performance. Depending on the terms of the Fund's investment in an AIF, the Sub-Adviser may or may not be able to liquidate a certain AIF when it desires to do so. When using Underlying Funds to execute the Fund's AIF strategy, the Sub-Adviser will consider each Underlying Fund's expenses and quality of management in addition to analyzing the AIF securities held by the Underlying Fund.

Master Limited Partnerships

An MLP is a publicly traded or privately offered limited partnership or limited liability company. MLPs are typically engaged in one or more aspects of the exploration, production, processing, transmission,

marketing, storage or delivery of energy-related commodities such as natural gas, natural gas liquids, coal, crude oil or refined petroleum products. An investment in MLP units differ from an investment in the securities of a corporation. An investment in MLP units involves certain risks which differ from an investment in the securities of a corporation. Holders of MLP units have limited control and voting rights on matters affecting the partnership. In addition, there are certain tax risks associated with an investment in MLP units and conflicts of interest exist between common unit holders and the general partner, including those arising from incentive distribution payments. As a partnership, an MLP has no tax liability at the entity level. If, as a result of a change in current law or a change in an MLP's business, an MLP were treated as a corporation for federal income tax purposes, such an MLP would be obligated to pay federal income tax on its income at the corporate tax rate. If an MLP were classified as a corporation for federal income tax purposes, the amount of cash available for distribution by the MLP would be reduced and distributions received by investors would be taxed under federal income tax laws applicable to corporate dividends (as dividend income, return of capital, or capital gain). Therefore, treatment of an MLP as a corporation for federal income tax purposes would result in a reduction in the after-tax return to investors, as compared to an MLP that is not taxed as a corporation, likely causing a reduction in the value of Fund shares. In constructing the model, the Sub-Adviser considers a variety of factors, including but not limited to, market capitalization, liquidity, growth, credit rating, source of qualifying income, business focus, and structure of the MLPs. The Sub-Adviser may also further evaluate MLP investments on potential tax liabilities, trading costs, cash requirements and other factors, including the relative valuation of related MLP or other competing investments.

Common and Preferred Stocks

Stocks are selected by the Sub-Adviser using a proprietary stock selection model that ranks all dividend-payers using specific fundamental characteristics that the Sub-Adviser believes are predictive of strong future total returns, dividend sustainability and dividend growth. These characteristics include the ability-to-pay ratio, dividend payout ratio, dividend yield, historical sales and dividend growth, cash flow conversion ratio, earnings momentum and return on capital. In addition, the Sub-Adviser eliminates stocks that violate specific ability-to-pay, payout ratio, and dividend yield thresholds that vary by sector. The Sub-Adviser may also engage in opportunistic trading strategies with securities that may not pay a dividend but have been identified as having potential short-term pricing inefficiencies.

Structured Notes

Structured notes are selected by the Sub-Adviser to generate interest income and as an economic substitute for the reference index, currency or commodity to which the structured note payments are linked. The Sub-Adviser also may use structured notes to meet specific investment or risk management goals that cannot be met from the standardized financial instruments available in the markets. Structured products can be used as an alternative to a direct investment, as part of the asset allocation process to reduce risk exposure of the Fund's portfolio or to capitalize on a current market trend. The Sub-Adviser selects structured notes of any maturity issued by an entity that the Sub-Adviser considers creditworthy.

Debt Securities

Other debt securities are selected by the Sub-Adviser to generate interest income and diversify the Fund's portfolio returns against equity market risks. The Fund invests without limit in fixed rate or floating rate debt instruments of any maturity that the Sub-Adviser believes are creditworthy or have acceptable recovery value in the event of default (through restructuring in or outside of bankruptcy) regardless of rating, including lower-quality debt securities commonly known as "high yield" or "junk" bonds. The Sub-Adviser employs measurers consisting of debt-to-assets, debt service coverage ratio and asset liquidation values and other metrics to assess credit quality. The Sub-Adviser selects ABS when it believes these securities offer higher yield or better prospects for capital preservation or appreciation than competing investments in traditional debt instruments.

Underlying Funds

The Sub-Adviser will invest in Underlying Funds when it wishes the Fund to have representation in a certain sector or security type, but cannot find sufficient or suitable individual securities that meet its

investment criteria. The Sub-Adviser ranks Underlying Funds on relative expenses, past performance and strategy fit for the Fund. In general, the Sub-Adviser selects Underlying Funds that it believes offer more efficient execution of the Fund's strategy, such as when ample individual investments are not readily available or the available investments do not meet the selection criteria of the Sub-Adviser, the Sub-Adviser may seek to invest in an Underlying Fund in order to gain indirect exposure to a particular sector or class of securities.

Other Information Regarding the Investment Strategy

The Fund may, from time to time, take defensive positions that are inconsistent with the Fund's principal investment strategy in attempting to respond to adverse market, economic, political or other conditions. During such times, the Sub-Adviser may determine that the Fund should invest up to 100% of its assets in cash or cash equivalents, including money market instruments, prime commercial paper, repurchase agreements, Treasury bills and other short-term obligations of the U.S. Government, its agencies or instrumentalities. In these and in other cases, the Fund may not achieve its investment objective. The Sub-Adviser may invest the Fund's cash balances in any investments it deems appropriate. The Sub-Adviser expects that such investments will be made, without limitation and as permitted under the 1940 Act, in money market funds, repurchase agreements, U.S. Treasury and U.S. agency securities, municipal bonds and bank accounts. Any income earned from such investments is ordinarily reinvested by the Fund in accordance with its investment program. Many of the considerations entering into recommendations and decisions of the Sub-Adviser and the Fund's portfolio managers are subjective.

The frequency and amount of portfolio purchases and sales (known as the "portfolio turnover rate") will vary from year to year. The portfolio turnover rate is not expected to exceed 100% for the current fiscal year but may vary greatly from year to year and will not be a limiting factor when the Sub-Adviser deems portfolio changes appropriate. Although the Fund generally does not intend to trade for short-term profits, the Fund may engage in short-term trading strategies, and securities may be sold without regard to the length of time held when, in the opinion of the Sub-Adviser, investment considerations warrant such action. These policies may have the effect of increasing the annual rate of portfolio turnover of the Fund. Higher rates of portfolio turnover would likely result in higher brokerage commissions and may generate short-term capital gains taxable as ordinary income. If securities are not held for the applicable holding periods, dividends paid on them will not qualify for the advantageous federal tax rates.

There is no assurance what portion, if any, of the Fund's investments will qualify for the reduced federal income tax rates applicable to qualified dividends under the Code. As a result, there can be no assurance as to what portion of the Fund's distributions will be designated as qualified dividend income. See "TAX ASPECTS — The Fund's Investments."

Other Characteristics

Real Estate Securities

Real Estate Investment Trusts. The Fund will invest in public and private real estate investment trusts. REITs are pooled investment vehicles that invest primarily in income-producing real estate or real estate-related loans or interests. REITs may or may not be publicly-traded and the Fund may invest, without limitation, in REITs which are not publicly-traded. The market value of REIT shares and the ability of REITs to distribute income may be adversely affected by numerous factors, including rising interest rates, changes in the national, state and local economic climate and real estate conditions, perceptions of prospective tenants of the safety, convenience and attractiveness of the properties, the ability of the owners to provide adequate management, maintenance and insurance costs, the cost of complying with the Americans with Disabilities Act, increasing competition and compliance with environmental laws, changes in real estate taxes and other operating expenses, adverse changes in governmental rules and fiscal policies, adverse changes in zoning laws, and other factors beyond the control of the issuers. In addition, distributions received by the Fund from REITs may consist of dividends, capital gains and/or return of capital.

Distributions paid by REITs will generally not qualify for the reduced federal income tax rates applicable to qualified dividend income under the Code. Such dividends, however, may qualify as Section 199A dividends. See "TAX ASPECTS — The Fund's Investments."

Real Estate LPs, LLCs, Private Funds. The Fund will invest in public and private real estate LPs, LLCs, and other private funds. These public and private funds are often pooled investment vehicles that invest primarily in income-producing real estate or real estate-related loans or interests. The funds may or may not be publicly-traded and the Fund may invest, without limitation, in funds which are not publicly-traded. The market value of the private fund shares and their ability to distribute income may be affected by numerous factors, including rising interest rates, changes in the national, state and local economic climate and real estate conditions, perceptions of prospective tenants of the safety, convenience and attractiveness of the properties, the ability of the owners to provide adequate management, maintenance and insurance costs, the cost of complying with the Americans with Disabilities Act, increasing competition and compliance with environmental laws, changes in real estate taxes and other operating expenses, adverse changes in governmental rules and fiscal policies, adverse changes in zoning laws, and other factors beyond the control of the issuers. In addition, distributions received by the Fund from these funds may consist of dividends, capital gains and/or return of capital.

Preferred Stocks. The Fund may invest in preferred stocks of real estate companies. Preferred stocks are securities that pay dividends at a specified rate and have a preference over common stocks in the payment of dividends and the liquidation of assets. This means that an issuer must pay dividends on its preferred stock prior to paying dividends on its common stock. In addition, in the event a company is liquidated, preferred shareholders must be fully repaid on their investments before common shareholders can receive any money from the company. Preferred shareholders, however, usually have no right to vote for a company's directors or on other corporate matters. Preferred stocks pay a fixed stream of income to investors, and this income stream is a primary source of the long-term investment return on preferred stocks. As a result, the market value of preferred stocks is generally more sensitive to changes in interest rates than the market value of common stocks. In this respect, preferred stocks share many investment characteristics with debt securities.

Convertible Securities

Convertible bonds and convertible preferred stocks are generally obligations of a company that can be converted into a predetermined number of shares of common stock of the company issuing the security. Convertible securities generally offer both defensive characteristics (i.e., provide income during periods when the market price of the underlying common stock declines) and upside potential (i.e., may provide capital appreciation when the market price of the underlying common stock rises).

The Fund may invest in securities that have been privately placed but are eligible for purchase and sale by certain qualified institutional buyers such as the Fund under Rule 144A under the Securities Act of 1933.

Alternative Investment Funds

The managers of AIFs employ a variety of "alternative" investment strategies to achieve attractive risk-adjusted returns (i.e., returns adjusted to take into account the volatility of those returns) with low correlation (expected to be less than 75%) to the broad equity and fixed-income markets. "Alternative" investment strategies, unlike pure "relative return strategies," are generally managed without reference to the performance of equity, debt and other markets. AIFs selected by the Sub-Adviser include BDCs, funds that invest in private debt and or equity securities, hedge funds and other issuers of private placement securities, each of which may pay performance-based fees to their managers.

With respect to BDCs, federal securities laws impose certain restraints upon the organization and operations of BDCs. For example, BDCs are required to invest at least 70% of their total assets primarily in securities of private companies or in thinly traded U.S. public companies, cash, cash equivalents, U.S. government securities and high-quality debt instruments that mature in one year or less. BDCs may have performance-based incentive fees and frequently trade at a discount.

The Sub-Adviser expects to invest in other forms of AIFs that employ non-traditional strategies such as investing in defaulted debt securities or in the securities of companies undergoing a merger, business spin-off or other form of restructuring.

Additionally, the Fund may invest up to 15% of its net assets in securities of certain AIFs commonly known as "hedge funds," which are typically privately placed with investors without registration with the

SEC, employ leverage and hedging strategies as well as pay their managers performance fees on gains. These fees may create an incentive for the manager of a hedge fund to enter into investments that are riskier or more speculative than would otherwise be the case. The Sub-Adviser intends to allocate the Fund's assets among AIFs that, in the view of the Sub-Adviser, represent attractive investment opportunities. In selecting AIFs, the Sub-Adviser (with the aid of research services employed by the Sub-Adviser), assesses the likely risks and returns of the different alternative investment strategies utilized by the AIFs, and evaluates the potential correlation among the investment strategies under consideration. The Sub-Adviser generally seeks to invest in AIFs whose expected risk-adjusted returns are determined to be attractive and likely to have low correlations among each other or with the broad equity and fixed-income markets.

Leverage

The Fund intends to use leverage to pursue its investment objective, including by borrowing funds from banks or other financial institutions, investing in derivative instruments with leverage embedded in them, and/or issuing debt securities. The Fund may borrow money or issue debt securities in an amount up to 33 1/3% of its total assets (50% of its net assets). The Fund intends to use leverage opportunistically and may choose to increase or decrease its leverage, or use different types or combinations of leveraging instruments, at any time based on the Fund's assessment of market conditions and the investment environment. The Fund may also use leverage to fund distributions and its annual repurchase offers.

The use of leverage can create risks. Changes in the value of the Fund's portfolio, including securities bought with the proceeds of leverage, will be borne entirely by the Shareholders. If there is a net decrease or increase in the value of the Fund's investment portfolio, leverage will decrease or increase, as the case may be, the NAV per Share to a greater extent than if the Fund did not utilize leverage. A reduction in the Fund's NAV may cause a reduction in the market price of the Shares. The Fund's leverage strategy may not be successful.

Certain types of leverage by the Fund may result in the Fund being subject to covenants relating to asset coverage and portfolio composition requirements. The Fund may be subject to certain restrictions on investments imposed by one or more lenders or by guidelines of one or more rating agencies, which may issue ratings for any short-term debt securities issued by the Fund. These guidelines may impose asset coverage or portfolio composition requirements that are more stringent than those imposed by the 1940 Act. Destra does not believe that these covenants or guidelines will impede it from managing the Fund's portfolio in accordance with its investment objective and policies if the Fund were to use leverage.

Under the 1940 Act, the Fund is not permitted to issue senior securities if, immediately after the issuance of such senior securities, the Fund would have an asset coverage ratio (as defined in the 1940 Act) of less than 300% with respect to senior securities representing indebtedness (*i.e.*, for every dollar of indebtedness outstanding, the Fund is required to have at least three dollars of assets). The 1940 Act also provides that the Fund may not declare distributions, or purchase its stock (including through share repurchases), if immediately after doing so it will have an asset coverage ratio of less than 300%. Under the 1940 Act, certain short-term borrowings (such as for cash management purposes) are not subject to these limitations if (i) repaid within 60 days, (ii) not extended or renewed and (iii) not in excess of 5% of the total assets of the Fund.

The Fund may leverage its portfolio by entering into one or more credit facilities. On January 16, 2018, the Fund entered into a secured, revolving line of credit facility with Barclays Bank PLC (the "Credit Facility"). Effective January 8, 2021, the Credit Agreement was extended for an additional nine month term expiring on September 30, 2021. The Fund may borrow an amount up to the lesser of the Credit Facility maximum commitment financing of \$30,000,000 or one-third of the value of its total assets.

The Fund may also use derivative strategies that have economic leverage embedded in them. The Fund may also borrow money as a temporary measure for extraordinary or emergency purposes, including the payment of dividends and the settlement of securities transactions which otherwise might require untimely dispositions of Fund securities.

For risks associated with the Fund's leverage strategies and the transactions associated therewith, see "Types of Investments and Related Risks."

Temporary Investments

The Fund may, from time to time, take defensive positions that are inconsistent with the Fund's principal investment strategy in attempting to respond to adverse market, economic, political or other conditions. During such times, the Sub-Adviser may determine that the Fund should invest up to 100% of its assets in cash or cash equivalents, including money market instruments, prime commercial paper, repurchase agreements, Treasury bills and other short-term obligations of the U.S. Government, its agencies or instrumentalities. In these and in other cases, the Fund may not achieve its investment objective. The Sub-Adviser may invest the Fund's cash balances in any investments it deems appropriate. The Sub-Adviser expects that such investments will be made, without limitation and as permitted under the 1940 Act, in money market funds, repurchase agreements, U.S. Treasury and U.S. agency securities, municipal bonds and bank accounts. Any income earned from such investments is ordinarily reinvested by the Fund in accordance with its investment program. Many of the considerations entering into recommendations and decisions of the Sub-Adviser and the Fund's portfolio managers are subjective.

Segregation and Cover Requirements

As a closed-end investment company registered with the SEC, the Fund is subject to the federal securities laws, including the 1940 Act, the rules thereunder, and various SEC and SEC staff interpretive positions. In accordance with these laws, rules and positions, the Fund may "set aside" liquid assets (often referred to as "asset segregation"), or engage in other SEC- or staff-approved measures, to "cover" open positions with respect to certain kinds of derivatives and certain other portfolio transactions that could be considered "senior securities" as defined in Section 18(g) of the 1940 Act. With respect to certain derivatives that are contractually required to cash settle, for example, the Fund is permitted to set aside liquid assets in an amount equal to the Fund's daily marked-to-market net obligations (*i.e.*, the Fund's daily net liability) under the contracts, if any, rather than such contracts' full notional value. The Fund reserves the right to modify its asset segregation policies in the future to comply with any changes in the positions from time to time announced by the SEC or its staff regarding asset segregation. These segregation and coverage requirements could result in the Fund's maintaining securities positions that it would otherwise liquidate, segregating assets at a time when it might be disadvantageous to do so or otherwise restricting portfolio management. Such segregation and cover requirements will not limit or offset losses on related positions.

Portfolio Turnover

The Fund is actively managed, and accordingly, it is possible that the portfolio turnover rate may exceed 100% in any fiscal year. The Fund's portfolio turnover rate is calculated by dividing the lesser of purchases or sales of portfolio securities for the particular fiscal year by the monthly average of the value of the portfolio securities owned by the Fund during the particular fiscal year. Portfolio turnover may have certain adverse tax consequences for Shareholders.

TYPES OF INVESTMENTS AND RELATED RISKS

Investing in the Fund involves risks, including the risk that an investor may receive little or no return on his, her or its investment or that an investor may lose part or all of such investment. Therefore, investors should consider carefully the following principal risks before investing in the Fund. The risks described below are not, and are not intended to be, a complete enumeration or explanation of the risks involved in an investment in the Fund and the Shares. Prospective investors should read this entire prospectus and consult with their own advisers before deciding whether to invest in the Fund. In addition, as the investment program of the Fund changes or develops over time, an investment in the Fund may be subject to risks not described in this prospectus and different risks may be more significant at different times. During the pendency of this Offering, the Fund will update this prospectus to account for any material changes in the risks involved with an investment in the Fund. In this section, the term "Advisers" refers to both Destra and/or Validus, as applicable.

Principal Risks Relating to Investment Strategies and Fund Investments

Pandemic Risk. A recent outbreak of respiratory disease caused by a novel coronavirus was first detected in China in December 2019 and has spread internationally. The outbreak has resulted in closing borders and quarantines, enhanced health screenings, cancellations, disrupted supply chains and customer activity, and has produced general concern and uncertainty. The impact of this coronavirus, and other epidemics and pandemics that may arise in the future, could affect national and global economies, individual companies and the market in general in a manner that cannot be foreseen at the present time. Health crises caused by the recent outbreak may heighten other pre-existing political, social and economic risks in a country or region. In the event of a pandemic or an outbreak, there can be no assurance that the Fund and its service providers will be able to maintain normal business operations for an extended period of time or will not lose the services of key personnel on a temporary or long-term basis due to illness or other reasons. The full impacts of a pandemic or disease outbreak are unknown, resulting in a high degree of uncertainty for potentially extended periods of time.

Private and Hedge Fund Risk. When the Fund invests in securities issued by private investment funds and hedge funds, it will bear its *pro rata* portion of the funds' expenses. These expenses are in addition to the direct expenses of the Fund's own operations, thereby increasing indirect costs and potentially reducing returns to Shareholders. A fund in which the Fund invests has its own investment risks, and those risks can affect the value of the private fund's or hedge fund's shares and therefore the value of the Fund's investments. There can be no assurance that the investment objective of a private fund or hedge fund will be achieved. A private investment fund or hedge fund may change its investment objective or policies without the Fund's approval, which could force the Fund to withdraw its investment from such fund at a time that is unfavorable. In addition, one private fund or hedge fund may buy the same securities that another investment fund sells. Therefore, the Fund would indirectly bear the costs of these trades without accomplishing any investment purpose. Hedge funds often engage in speculative investment practices such as leverage, short-selling, arbitrage, hedging, derivatives, and other strategies that may increase investment loss. Hedge funds can be highly illiquid and often charge high fees that can erode performance. Additionally, private funds and hedge funds may involve complex tax structures and delays in distributing tax information.

BDC Risk. BDCs typically invest in small and medium-sized private and certain public companies that may not have access to public equity or debt markets for capital raising. As a result, a BDC's portfolio typically will include a substantial amount of securities purchased in private placements, and its portfolio may carry risks similar to those of a private equity or venture capital fund. Securities that are not publicly registered may be difficult to value and may be difficult to sell at a price representative of their intrinsic value. Small and medium-sized companies also may have fewer lines of business so that changes in any one line of business may have a greater impact on the value of their stock than is the case with a larger company. To the extent a BDC focuses its investments in a specific sector, the BDC will be susceptible to adverse conditions and economic or regulatory occurrences affecting the specific sector or industry group, which tends to increase volatility and result in higher risk. Investments in BDCs are subject to various risks, including management's ability to meet the BDC's investment objective and to manage the BDC's portfolio when the underlying securities are redeemed or sold, during periods of market turmoil and as investors' perceptions regarding a BDC or its underlying investments change. Private BDCs are illiquid investments, and there is no guarantee the Fund will be able to liquidate or sell its private BDC investments.

Certain BDCs may use leverage in their portfolios through borrowings or the issuance of preferred stock. While leverage may increase the yield and total return of a BDC, it also subjects the BDC to increased risks, including magnification of any investment losses and increased volatility. In addition, a BDC's income may fall if the interest rate on any borrowings of the BDC rises.

Investment and Market Risk. An investment in the Shares is subject to investment risk, including the possible loss of the entire principal amount invested. An investment in the Shares represents an indirect investment in the portfolio of securities and investments owned by the Fund, and the value of these securities and loans may fluctuate, sometimes rapidly and unpredictably. For instance, during periods of global economic downturn, the secondary markets for corporate bonds and investments with similar economic characteristics can experience sudden and sharp price swings, which can be exacerbated by large or sustained sales by major investors in these markets, a high-profile default by a major borrower, movements in indices tied to these markets or related securities or investments, or a change in the market's perception of bonds and investments with similar economic characteristics (such as second lien loans and unsecured loans) and corporate bonds. At any point in time, an investment in the Shares may be worth less than the original amount invested, even after taking into account distributions paid by the Fund, if any, and the ability of Shareholders to reinvest dividends. The Fund anticipates using leverage, which will magnify the Fund's risks and, in turn, the risks to the Shareholders. Use of leverage is subject to the risks described below under "— Risks Relating to the Fund's Investment Program — Leverage Risk."

Credit Risk. Credit risk is the risk that an issuer of a security may be unable or unwilling to make dividend, interest and principal payments when due and the related risk that the value of a security may decline because of concerns about the issuer's ability or willingness to make such payments. Credit risk may be heightened for the Fund because it and Underlying Funds may invest in below investment grade securities, which are commonly referred to as "junk" and "high yield" securities; such securities, while generally offering the potential for higher yields than investment grade securities with similar maturities, involve greater risks, including the possibility of dividend or interest deferral, default or bankruptcy, and are regarded as predominantly speculative with respect to the issuer's capacity to pay dividends or interest and repay principal.

Some investments are not readily marketable and may be subject to restrictions on resale. When a secondary market exists, the market may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods. The Fund has no limitation on the amount of its assets that may be invested in securities that are not readily marketable or are subject to restrictions on resale. Further, the lack of an established secondary market for illiquid investments may make it more difficult to value such securities, which may negatively affect the price the Fund would receive upon disposition of such securities. The Adviser's judgment may play a greater role in the valuation process. See "Valuation Risk."

Interest Rate Risk. The Fund is subject to financial market risks, including changes in interest rates. General interest rate fluctuations may have a substantial negative impact on the Fund's investments and investment opportunities and, accordingly, have a material adverse effect on the Fund's investment objective and the Fund's rate of return on invested capital. In addition, an increase in interest rates would make it more expensive to use debt for the Fund's financing needs, if any.

Interest rates have recently been at or near historic lows. The historically low interest rate environment increases the risks associated with rising interest rates, including the potential for periods of volatility. The Fund currently faces a heightened level of interest rate risk, especially since the Federal Reserve Board has ended its quantitative easing program and has begun to increase certain benchmark interest rates. In the event of a rising interest rate environment, payments under floating rate debt instruments would rise and there may be a significant number of issuers of such floating rate debt instruments that would be unable or unwilling to pay such increased interest costs and may otherwise be unable to repay their loans. Investments in floating rate debt instruments may also decline in value in response to rising interest rates if the interest rates of such investments do not rise as much, or as quickly, as market interest rates in general. Similarly, during periods of rising interest rates, fixed rate debt instruments may decline in value because the fixed rates of interest paid thereunder may be below market interest rates.

Below Investment Grade Rating Risk. Debt instruments that are rated below investment grade are often referred to as "high yield" securities or "junk bonds." Below investment grade bonds, high-yield

securities and other similar instruments are rated “Ba1” or lower by Moody’s, “BB+” or lower by S&P or “BB+” or lower by Fitch or, if unrated, are judged by the Advisers to be of comparable credit quality. While generally providing greater income and opportunity for gain, below investment grade debt instruments may be subject to greater risks than securities or instruments that have higher credit ratings, including a higher risk of default. The credit rating of a corporate bond that is rated below investment grade does not necessarily address its market value risk, and ratings may from time to time change, positively or negatively, to reflect developments regarding the borrower’s financial condition. Below investment grade corporate bonds and similar instruments often are considered to be speculative with respect to the capacity of the borrower to timely repay principal and pay interest or dividends in accordance with the terms of the obligation and may have more credit risk than higher rated securities. Lower grade securities and similar debt instruments may be particularly susceptible to economic downturns. It is likely that a prolonged or deepening economic recession could adversely affect the ability of some borrowers issuing such corporate bonds and similar debt instruments to repay principal and pay interest on the instrument, increase the incidence of default and severely disrupt the market value of the securities and similar debt instruments.

The secondary market for below investment grade corporate bonds and similar instruments may be less liquid than that for higher rated instruments. Because unrated securities may not have an active trading market or may be difficult to value, the Fund might have difficulty selling them promptly at an acceptable price. To the extent that the Fund invests in unrated securities, the Fund’s ability to achieve its investment objectives will be more dependent on the Adviser’s credit analysis than would be the case when the Fund invests in rated securities.

Distribution Policy Risk. The Fund’s distribution policy is expected to result in distributions that equal a fixed percentage of the Fund’s current NAV per share. Shareholders receiving periodic payments from the Fund may be under the impression that they are receiving net profits. However, all or a portion of a distribution may consist of a return of capital. Return of capital is the portion of a distribution that is a return of your original investment dollars in the Fund. Shareholders should not assume that the source of a distribution from the Fund is net profit. Shareholders should note that return of capital will reduce the tax basis of their shares and potentially increase the taxable gain, if any, upon disposition of their shares.

Inflation/Deflation Risk. Inflation risk is the risk that the value of certain assets or income from the Fund’s investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of investments and distributions can decline. In addition, during any periods of rising inflation, the dividend rates or borrowing costs associated with the Fund’s use of leverage would likely increase, which would tend to further reduce returns to the Shareholders. Deflation risk is the risk that prices throughout the economy decline over time — the opposite of inflation. Deflation may have an adverse effect on the creditworthiness of borrowers and may make borrower defaults more likely, which may result in a decline in the value of the Fund’s portfolio.

Structured Products Risk. General. The Fund may invest in structured products, including, without limitation, structured notes. Holders of structured products bear risks of the underlying investments, index or reference obligation and are subject to counterparty risk.

The Fund may have the right to receive payments only from the structured product and generally does not have direct rights against the issuer or the entity that sold the assets to be securitized. While certain structured products enable the investor to acquire interests in a pool of securities without the brokerage and other expenses associated with directly holding the same assets, investors in structured products generally pay their share of the structured product’s administrative and other expenses. Although it is difficult to predict whether the prices of indices and securities underlying structured products will rise or fall, these prices (and, therefore, the prices of structured products) will be influenced by the same types of political and economic events that affect issuers of securities and capital markets generally. If the issuer of a structured product uses shorter-term financing to purchase longer-term securities, the issuer may be forced to sell its securities at below market prices if it experiences difficulty in obtaining short-term financing, which may adversely affect the value of the structured products owned by the Fund.

Investments in structured products involve risks, including credit risk and market risk. Certain structured products may be thinly traded or have a limited trading market. Where the Fund’s investments in structured products are based upon the movement of one or more factors, including currency exchange

rates, interest rates, reference bonds (or loans) and stock indices, depending on the factor used and the use of multipliers or deflators, changes in interest rates and movement of any factor may cause significant price fluctuations. Additionally, changes in the reference instrument or security may cause the interest rate on a structured product to be reduced to zero, and any further changes in the reference instrument may then reduce the principal amount payable on maturity of the structured product. Structured products may be less liquid than other types of securities and more volatile than the reference instrument or security underlying the product.

The Fund may invest in structured products collateralized by below investment grade or distressed loans or securities. Investments in such structured products are subject to the risks associated with below investment grade securities, described above under “— Below Investment Grade Rating Risk.” Such securities are characterized by high risk. It is likely that an economic recession could severely disrupt the market for such securities and may have an adverse impact on the value of such securities.

Structured Notes Risk. Investments in structured notes involve risks, including credit risk and market risk. Where the Fund’s investments in structured notes are based upon the movement of one or more factors, including currency exchange rates, interest rates, referenced bonds and stock indices, depending on the factor used and the use of multipliers or deflators, changes in interest rates and movement of the factor may cause significant price fluctuations. Additionally, changes in the reference instrument or security may cause the interest rate on the structured note to be reduced to zero, and any further changes in the reference instrument may then reduce the principal amount payable on maturity. Structured notes may be less liquid than other types of securities and more volatile than the reference instrument or security underlying the note.

Non-U.S. Securities Risk. Investments in certain non-U.S. securities involve factors not typically associated with investing in the United States or other developed countries, including risks relating to: (i) differences between U.S. and non-U.S. securities markets, including potential price volatility in and relative illiquidity of some non-U.S. securities markets; the absence of uniform accounting, auditing and financial reporting standards, practices, and disclosure requirements; and less government supervision and regulation; (ii) other differences in law and regulation, including fewer investor protections, less stringent fiduciary duties, less developed bankruptcy laws and difficulty in enforcing contractual obligations; (iii) certain economic and political risks, including potential economic, political or social instability; exchange control regulations; restrictions on foreign investment and repatriation of capital, possibly requiring government approval; expropriation or confiscatory taxation; other government restrictions by the United States or other governments; higher rates of inflation; higher transaction costs; and reliance on a more limited number of commodity inputs, service providers, and/or distribution mechanisms; and (iv) the possible imposition of local taxes on income and gains recognized with respect to securities and assets. Certain non-U.S. markets may rely heavily on particular industries or non-U.S. capital and are more vulnerable to diplomatic developments, the imposition of economic sanctions against a particular country or countries, organizations, entities and/or individuals, changes in international trading patterns, trade barriers, and other protectionist or retaliatory measures. International trade barriers or economic sanctions against non-U.S. countries, organizations, entities and/or individuals may adversely affect the Fund’s non-U.S. holdings or exposures. Certain non-U.S. investments may become less liquid in response to social, political or market developments or adverse investor perceptions, or become illiquid after purchase by the Fund, particularly during periods of market turmoil. Certain non-U.S. investments may become illiquid when, for instance, there are few, if any, interested buyers and sellers or when dealers are unwilling to make a market for certain securities. When the Fund holds illiquid investments, its portfolio may be harder to value, especially in changing markets. The risks of investments in emerging markets, as described below and including the risks described above, are usually greater than the risks involved in investing in more developed markets. Because non-U.S. securities may trade on days when the Shares are not priced, the Fund’s NAV may change at times when Shares cannot be sold.

Rules adopted under the 1940 Act permit the Fund to maintain its non-U.S. securities and foreign currency in the custody of certain eligible non-U.S. banks and securities depositories, and the Fund generally holds its non-U.S. securities and foreign currency in foreign banks and securities depositories. Some foreign banks and securities depositories may be recently organized or new to the foreign custody business. In addition, there may be limited or no regulatory oversight of their operations. Also, the laws of certain countries limit the Fund’s ability to recover its assets if a foreign bank, depository or issuer of a

security, or any of their agents, goes bankrupt. In addition, it is often more expensive for the Fund to buy, sell and hold securities in certain foreign markets than in the United States. The increased expense of investing in foreign markets reduces the amount the Fund can earn on its investments and typically results in a higher operating expense ratio for the Fund than for investment companies invested only in the United States.

Certain banks in foreign countries may not be eligible sub-custodians for the Fund, in which event the Fund may be precluded from purchasing securities in certain foreign countries in which it otherwise would invest or the Fund may incur additional costs and delays in providing transportation and custody services for such securities outside of such countries. The Fund may encounter difficulties in effecting portfolio transactions on a timely basis with respect to any securities of issuers held outside their countries.

The economies of certain foreign markets may not compare favorably with the economy of the United States with respect to such issues as growth of gross national product, reinvestment of capital, resources and balance of payments position. Certain foreign economies may rely heavily on particular industries or foreign capital and are more vulnerable to diplomatic developments, the imposition of economic sanctions against a particular country or countries, changes in international trading patterns, trade barriers and other protectionist or retaliatory measures. Investments in foreign markets may also be adversely affected by governmental actions such as the imposition of capital controls, nationalization of companies or industries, expropriation of assets or the imposition of punitive taxes. In addition, the governments of certain countries may prohibit or impose substantial restrictions on foreign investments in their capital markets or in certain industries. Any of these actions could severely affect securities prices or impair the Fund's ability to purchase or sell non-U.S. securities or transfer the Fund's assets or income back into the United States, or otherwise adversely affect the Fund's operations. In addition, the U.S. government has from time to time in the past imposed restrictions, through penalties and otherwise, on foreign investments by U.S. investors such as the Fund. If such restrictions should be reinstated, it might become necessary for the Fund to invest all or substantially all of its assets in U.S. securities.

Other potential foreign market risks include foreign exchange controls, difficulties in pricing securities, defaults on foreign government securities, difficulties in enforcing legal judgments in foreign courts and political and social instability. Diplomatic and political developments, including rapid and adverse political changes, social instability, regional conflicts, terrorism and war, could affect the economies, industries and securities and currency markets, and the value of the Fund's investments, in non-U.S. countries. These factors are extremely difficult, if not impossible, to predict and take into account with respect to the Fund's investments.

In general, less information is publicly available with respect to foreign issuers than is available with respect to U.S. companies. Accounting standards in other countries are not necessarily the same as in the United States. If the accounting standards in another country do not require as much detail as U.S. accounting standards, it may be harder for the Advisers to completely and accurately determine a company's financial condition.

Many foreign governments do not supervise and regulate stock exchanges, brokers and the sale of securities to the same extent as such regulations exist in the United States. They also may not have laws to protect investors that are comparable to U.S. securities laws. For example, some foreign countries may have no laws or rules against insider trading. Insider trading occurs when a person buys or sells a company's securities based on material non-public information about that company. In addition, some countries may have legal systems that may make it difficult for the Fund to vote proxies, exercise shareholder rights, and pursue legal remedies with respect to its non-U.S. securities.

Settlement and clearance procedures in certain foreign markets differ significantly from those in the United States. Foreign settlement and clearance procedures and trade regulations also may involve certain risks (such as delays in payment for or delivery of securities) not typically associated with the settlement of U.S. investments. Communications between the United States and foreign countries may be unreliable, increasing the risk of delayed settlements or losses of security certificates in markets that still rely on physical settlement. At times, settlements in certain foreign countries have not kept pace with the number of securities transactions. These problems may make it difficult for the Fund to carry out transactions. If the Fund cannot settle or is delayed in settling a purchase of securities, it may miss attractive investment

opportunities and certain of its assets may be uninvested with no return earned thereon for some period. If the Fund cannot settle or is delayed in settling a sale of securities, it may lose money if the value of the security then declines or, if it has contracted to sell the security to another party, the Fund could be liable for any losses incurred.

While the volume of transactions effected on foreign stock exchanges has increased in recent years, it remains appreciably below that of U.S. exchanges. Accordingly, the Fund's non-U.S. securities may be less liquid and their prices may be more volatile than comparable investments in securities in U.S. companies.

A number of countries have authorized the formation of closed-end investment companies to facilitate indirect foreign investment in their capital markets. In accordance with the 1940 Act, the Fund may invest up to 10% of its total assets in securities of closed-end investment companies, not more than 5% of which may be invested in any one such company. This restriction on investments in securities of closed-end investment companies may limit opportunities for the Fund to invest indirectly in certain smaller capital markets. Shares of certain closed-end investment companies may at times be acquired only at market prices representing premiums to their NAVs. If the Fund acquires shares in closed-end investment companies, Shareholders would bear both their proportionate share of the Fund's expenses (including investment advisory fees) and, indirectly, the expenses of such closed-end investment companies. The Fund also may seek, at its own cost, to create its own investment entities under the laws of certain countries.

Foreign Currency Risk. Investments made by the Fund, and the income received by the Fund with respect to such investments, may be denominated in various non-U.S. currencies. However, the books of the Fund are maintained in U.S. dollars. Accordingly, changes in currency values may adversely affect the U.S. dollar value of portfolio investments, interest and other revenue streams received by the Fund, gains and losses realized on the sale of portfolio investments, and the amount of distributions, if any, made by the Fund. In addition, the Fund may incur substantial costs in converting investment proceeds from one currency to another. The Fund may enter into derivative transactions designed to reduce such currency risks. Furthermore, the portfolio companies in which the Fund invests may be subject to risks relating to changes in currency values. If a portfolio company suffers adverse consequences as a result of such changes, the Fund may also be adversely affected as a result.

Liquidity Risk. The Fund may invest without limitation in investments that, at the time of investment, are illiquid, as determined by using the SEC's standard applicable to registered investment companies (i.e., securities that cannot be disposed of by the Fund within seven days in the ordinary course of business at approximately the amount at which the Fund has valued the securities). The Fund may also invest in restricted securities. Investments in restricted securities could have the effect of increasing the amount of the Fund's assets invested in illiquid investments if qualified institutional buyers are unwilling to purchase these securities.

Illiquid investments and restricted securities may be difficult to dispose of at a fair price at the times when the Fund believes it is desirable to do so. The market price of illiquid investments and restricted securities generally is more volatile than that of more liquid investments, which may adversely affect the price that the Fund pays for or recovers upon the sale of such securities. Illiquid investments and restricted securities may also be more difficult to value, especially in challenging markets. The Advisers' judgment may play a greater role in the valuation process. Investment of the Fund's assets in illiquid investments and restricted securities may restrict the Fund's ability to take advantage of market opportunities. In order to dispose of an unregistered security, the Fund, where it has contractual rights to do so, may have to cause such security to be registered. A considerable period may elapse between the time the decision is made to sell the security and the time the security is registered, thereby enabling the Fund to sell it. Contractual restrictions on the resale of securities vary in length and scope and are generally the result of a negotiation between the issuer and acquirer of the securities. In either case, the Fund would bear market risks during that period.

To the extent that the traditional dealer counterparties that engage in debt trading do not maintain inventories of corporate bonds (which provide an important indication of their ability to "make markets") that keep pace with the growth of the bond markets over time, relatively low levels of dealer inventories could lead to decreased liquidity and increased volatility in the debt markets. Additionally, market participants other than the Fund may attempt to sell debt holdings at the same time as the Fund, which could cause downward pricing pressure and contribute to illiquidity.

Management Risk. The NAV of the Fund changes daily based on the performance of the securities in which it invests. The Sub-Adviser's judgments about the attractiveness, value and potential appreciation of particular asset class sector and securities in which the Fund invests may prove to be incorrect and may not produce the desired results.

MLP Risk. Investments in MLPs, which are limited partnerships or limited liability companies taxable as partnerships, involve some risks that differ from an investment in the common stock of a corporation, including risks related to limited control and limited rights to vote on matters affecting MLPs, risks related to potential conflicts of interest between an MLP and the MLP's general partner, cash flow risks, dilution risks and risks related to the general partner's right to require unit-holders to sell their common units at an undesirable time or price. MLPs may derive income and gains from the exploration, development, mining or production, processing, refining, transportation (including pipelines transporting gas, oil, or products thereof), or the marketing of any mineral or natural resources. MLPs may be subject to legal and other restrictions on resale or will otherwise be less liquid than publicly traded securities. Certain MLP securities may trade in lower volumes due to their smaller capitalizations. Accordingly, those MLPs may be subject to more abrupt or erratic price movements and may lack sufficient market liquidity to enable an Underlying Fund to effect sales at an advantageous time or without a substantial drop in price. As a result, these investments may be difficult to dispose of at a fair price at the times when an Underlying Fund believes it is desirable to do so. MLPs are generally considered interest-rate sensitive investments. During periods of interest rate volatility, these investments may not provide attractive returns, which may adversely impact the overall performance of the Fund or an Underlying Fund. The benefit an Underlying Fund will derive from its investment in MLPs will be largely dependent on the MLPs being treated as partnerships and not as corporations for federal income tax purposes. Therefore, treatment of an MLP as a corporation for federal income tax purposes would result in a reduction in the after-tax return to the holder. A change in current tax law or in the underlying business mix of a given MLP could result in an MLP being treated as a corporation for U.S. federal income tax purposes, which would result in such MLP being required to pay U.S. federal income tax on its taxable income.

Real Estate Industry Concentration Risk. The Fund does not invest in real estate directly, but because the Fund concentrates its investments in the broader real estate industry, its portfolio is significantly impacted by the performance of the real estate market and may experience more volatility and be exposed to greater risk than a more diversified portfolio. The Fund may be subject to risks similar to those associated with direct ownership in real property. The value of the Fund's shares is affected by factors affecting the value of real estate and the earnings of companies engaged in the real estate industry. These factors include, among others: (i) changes in general economic and market conditions; (ii) changes in the value of real estate properties; (iii) risks related to local economic conditions, overbuilding and increased competition; (iv) increases in property taxes and operating expenses; (v) changes in zoning laws; (vi) casualty and condemnation losses; (vii) variations in rental income, neighborhood values or the appeal of property to tenants; (viii) the availability of financing, and (ix) changes in interest rates. Many real estate companies utilize leverage, which increases investment risk and could adversely affect a company's operations and market value in periods of rising interest rates. The value of securities of companies in the real estate industry may go through cycles of relative under-performance and over-performance in comparison to equity securities markets in general. To the extent that the Fund invests in real estate securities designated as REITs, if a court were to disregard the limited liability legal structure of a REIT, the Fund could be liable for a portion of claims in excess of that REITs assets, such as claims arising from environmental problems. Failure to qualify as a REIT under the Internal Revenue Code would increase the REITs tax liability thereby reducing the REIT's net income available for investment or distribution; additionally, certain preferred tax treatment of distributions would no longer be passed through to investors.

There are also special risks associated with particular sectors, or real estate operations generally, as described below:

Retail Properties. Retail properties are affected by the overall health of the economy and may be adversely affected by, among other things, the growth of alternative forms of retailing, bankruptcy, departure or cessation of operations of a tenant, a shift in consumer demand due to demographic changes, changes in spending patterns and lease terminations.

Community Centers. Community center properties are dependent upon the successful operations and financial condition of their tenants, particularly certain of their major tenants, and could be adversely affected by bankruptcy of those tenants. In some cases, a tenant may lease a significant portion of the space in one center, and the filing of bankruptcy could cause significant revenue loss. Like others in the commercial real estate industry, community centers are subject to environmental risks and interest rate risk. They also face the need to enter into new leases or renew leases on favorable terms to generate rental revenues. Community center properties could be adversely affected by changes in the local markets where their properties are located, as well as by adverse changes in national economic and market conditions.

Office Properties. Office properties are affected by the overall health of the economy, and other factors such as a downturn in the businesses operated by their tenants, obsolescence and non-competitiveness.

Hotel Properties. The risks of hotel properties include, among other things, the necessity of a high level of continuing capital expenditures, competition, increases in operating costs which may not be offset by increases in revenues, dependence on business and commercial travelers and tourism, increases in fuel costs and other expenses of travel, and adverse effects of general and local economic conditions. Hotel properties tend to be more sensitive to adverse economic conditions and competition than many other commercial properties.

Healthcare Properties. Healthcare properties and healthcare providers are affected by several significant factors, including federal, state and local laws governing licenses, certification, adequacy of care, pharmaceutical distribution, rates, equipment, personnel and other factors regarding operations, continued availability of revenue from government reimbursement programs and competition on a local and regional basis. The failure of any healthcare operator to comply with governmental laws and regulations may affect its ability to operate its facility or receive government reimbursements.

Multifamily Properties. The value and successful operation of a multifamily property may be affected by a number of factors such as the location of the property, the ability of the management team, the level of mortgage rates, the presence of competing properties, adverse economic conditions in the locale, oversupply and rent control laws or other laws affecting such properties.

Self-Storage Properties. The value and successful operation of a self-storage property may be affected by a number of factors, such as the ability of the management team, the location of the property, the presence of competing properties, changes in traffic patterns and effects of general and local economic conditions with respect to rental rates and occupancy levels.

Other factors may contribute to the risk of real estate investments:

Development Issues. Certain real estate companies may engage in the development or construction of real estate properties. These companies in which the Fund invests (“portfolio companies”) are exposed to a variety of risks inherent in real estate development and construction, such as the risk that there will be insufficient tenant demand to occupy newly developed properties, and the risk that prices of construction materials or construction labor may rise materially during the development.

Lack of Insurance. Certain of the portfolio companies may fail to carry comprehensive liability, fire, flood, earthquake extended coverage and rental loss insurance, or insurance in place may be subject to various policy specifications, limits and deductibles. Should any type of uninsured loss occur, the portfolio company could lose its investment in, and anticipated profits and cash flows from, a number of properties and, as a result, adversely affect the Fund’s investment performance.

Dependence on Tenants. The value of the Fund’s portfolio companies’ properties and the ability to make distributions to their shareholders depend upon the ability of the tenants at their properties to generate enough income in excess of their operating expenses to make their lease payments. Changes beyond the control of our portfolio companies may adversely affect their tenants’ ability to make their lease payments and, in such event, would substantially reduce both their income from operations and ability to make distributions to our portfolio companies and, consequently, the Fund.

Financial Leverage. Real estate companies may be highly leveraged and financial covenants may affect the ability of real estate companies to operate effectively.

Environmental Issues. In connection with the ownership (direct or indirect), operation, management and development of real properties that may contain hazardous or toxic substances, a portfolio company may be considered an owner, operator or responsible party of such properties and, therefore, may be potentially liable for removal or remediation costs, as well as certain other costs, including governmental fines and liabilities for injuries to persons and property. The existence of any such material environmental liability could have a material adverse effect on the results of operations and cash flow of any such portfolio company and, as a result, the amount available to make distributions on shares of the Fund could be reduced. However, the Fund does not believe it would be liable for the actions of any entity in which it invests and that only its investment is at risk.

Financing Issues. Financial institutions in which the Fund may invest are subject to extensive government regulation. This regulation may limit both the amount and types of loans and other financial commitments a financial institution can make, and the interest rates and fees it can charge. In addition, interest and investment rates are highly sensitive and are determined by many factors beyond a financial institution's control, including general and local economic conditions (such as inflation, recession, money supply and unemployment) and the monetary and fiscal policies of various governmental agencies such as the Federal Reserve Board. These limitations may have a significant impact on the profitability of a financial institution since profitability is attributable, at least in part, to the institution's ability to make financial commitments such as loans. Profitability of a financial institution is largely dependent upon the availability and cost of the institution's funds, and can fluctuate significantly when interest rates change.

Recent Conditions. The decline in the broader credit markets related to the sub-prime mortgage dislocation caused the global financial markets to become more volatile and the United States homebuilding market was dramatically impacted as a result. The confluence of the dislocation in the real estate credit markets with broad-based stress in the United States real estate industry created a difficult operating environment for owners of real estate and investors should be aware that the general risks of investing in real estate may be magnified in the future.

Instability in credit markets may make it more difficult for borrowers to obtain financing or refinancing on attractive terms or at all. Borrowers may be subject to increased interest expenses for borrowed money and tightening underwriting standards. There is also a risk that a general lack of liquidity or other adverse events in the credit markets may adversely affect the ability of issuers in whose securities the Fund invests to finance real estate developments and projects or refinance completed projects.

Real estate securities that are not publicly-traded may be illiquid and may not provide periodic pricing or valuation information to investors. To the extent that the Fund invests in such real estate securities, the Fund will be subject to these additional risks.

REIT Tax Risks. Qualification as a REIT under the Internal Revenue Code of 1986, as amended, in any particular year is a complex analysis that depends on a number of factors. There can be no assurance that the entities in which the Fund invests with the expectation that they will be taxed as a REIT will qualify as a REIT. An entity that fails to qualify as a REIT would be subject to a corporate level tax, would not be entitled to a deduction for dividends paid to its shareholders and would not pass through to its shareholders the character of income earned by the entity. If the Fund were to invest in an entity that failed to qualify as a REIT, such failure could significantly reduce the Fund's yield on that investment. REITs can be classified as equity REITs, mortgage REITs and hybrid REITs. Equity REITs invest primarily in real property and earn rental income from leasing those properties. They may also realize gains or losses from the sale of properties. Equity REITs will be affected by conditions in the real estate rental market and by changes in the value of the properties they own. Mortgage REITs invest primarily in mortgages and similar real estate interests and receive interest payments from the owners of the mortgaged properties. Mortgage REITs will be affected by changes in creditworthiness of borrowers and changes in interest rates. Hybrid REITs invest both in real property and in mortgages. Equity and mortgage REITs are dependent upon management skills, may not be diversified and are subject to the risks of financing projects.

Distributions paid by REITs generally will not qualify for the reduced U.S. federal income tax rates applicable to qualified dividends under the Code. Such dividends, however, may qualify as Section 199A dividends. See "TAX ASPECTS — The Fund's Investments." Some or all of a REIT's annual distributions to its investors may constitute a non-taxable return of capital. Any such return of capital will generally reduce

the Fund's basis in the REIT investment, but not below zero. To the extent the distributions from a particular REIT exceed the Fund's basis in such REIT, the Fund will generally recognize gain. In part because REIT distributions often include a nontaxable return of capital, Fund distributions to shareholders may also include a nontaxable return of capital. Shareholders that receive such a distribution will also reduce their tax basis in their shares of the Fund, but not below zero. To the extent the distribution exceeds a shareholder's basis in the Fund's shares, such shareholder will generally recognize a capital gain. The Fund does not have any investment restrictions with respect to investments in REITs.

Underlying Funds/AIFs Risk. The Fund invests in ETFs, mutual funds, closed-end funds and AIFs. As a result, your cost of investing in the Fund will be higher than the cost of investing directly in ETFs, mutual funds, closed-end funds and AIFs and may be higher than other mutual funds that invest directly in stocks and bonds. You will indirectly bear fees and expenses charged by the Underlying Funds in addition to the Fund's direct fees and expenses. Additional risks of investing in ETFs, mutual funds, closed-end funds and AIFs, where noted, are described below:

- ***Strategies Risk:*** Each Underlying Fund and AIF is subject to specific risks, depending on the nature of the fund. These risks could include liquidity risk, sector risk, and foreign currency risk, as well as risks associated with fixed income securities and commodities. Inverse ETFs will limit the Fund's participation in market gains.
- ***ETF Tracking Risk:*** Investment in the Fund should be made with the understanding that the index-linked ETFs in which the Fund invests will not be able to replicate exactly the performance of the indices they track because the total return generated by the securities will be reduced by transaction costs incurred in adjusting the actual balance of the securities. In addition, the ETFs in which the Fund invests will incur expenses not incurred by their applicable indices. Certain securities comprising the indices tracked by the ETFs may, from time to time, temporarily be unavailable, which may further impede the ETFs' ability to track their applicable indices.
- ***Risk Related to NAV and Market Price:*** The market value of ETF and closed-end fund shares may differ from their NAV. This difference in price may be due to the fact that the supply and demand in the market for fund shares at any point in time is not always identical to the supply and demand in the market for the underlying basket of securities. Accordingly, there may be times when shares trades at a premium or discount to NAV. In addition, certain ETFs and closed-end funds traded on exchanges may be thinly traded and experience large spreads between the "ask" price quoted by a seller and the "bid" price offered by a buyer.
- ***Expense Risk:*** The Fund invests in Underlying Funds. As a result, your cost of investing in the Fund will be higher than the cost of investing directly in ETF, mutual fund and closed-end fund shares and may be higher than other mutual funds that invest directly in stocks and bonds. You will indirectly bear fees and expenses charged by the Underlying Funds in addition to the Fund's direct fees and expenses.
- ***Additional Risk:*** The strategy of investing in Underlying Funds could affect the timing, amount and character of distributions to you and therefore may increase the amount of taxes you pay. In addition, certain prohibitions on the acquisition of mutual fund shares by the Fund may prevent the Fund from allocating investments in the manner the Sub-Adviser considers optimal. Generally, the Fund may purchase in the aggregate only up to 3% of the total outstanding voting stock of any closed-end fund, mutual fund or ETF or AIF (if the ETF or AIF is an investment company). Additionally, in general, the Fund may not invest more than 5% of its total assets in one Underlying Fund or more than 10% in Underlying Funds, unless it complies with certain restrictions or is able to make purchases in reliance upon an Underlying Fund's exemptive order that permits investments in excess of the limits stated above.

Non-Principal Risks Relating to Fund Investments

U.S. Government Debt Securities Risk. U.S. Government debt securities historically have not involved the level of credit risks associated with investments in other types of debt securities, although, as a result, the yields available from U.S. government debt securities are generally lower than the yields available from other securities. However, in 2011 S&P downgraded its rating of U.S. government debt, suggesting an increased

credit risk. Shortly thereafter, S&P also downgraded the long-term credit ratings of U.S. government-sponsored enterprises. Further downgrades could have an adverse impact on the price and volatility of U.S. government debt instruments. Like other debt securities, the values of U.S. government debt securities change as interest rates fluctuate. Fluctuations in the value of portfolio securities will not affect interest income on existing portfolio securities but will be reflected in the Fund's NAV. Since the magnitude of these fluctuations will generally be greater at times when the Fund's average maturity is longer, under certain market conditions the Fund may, for temporary defensive purposes, accept lower current income from short-term investments rather than investing in higher yielding long-term securities. In addition, economic events within and outside of the United States may negatively affect the value of U.S. government debt securities. See “— Risks Relating to the Fund's Investment Program — U.S. Credit Rating and European Economic Crisis Risk.”

Equity Securities Risk. Stock markets are volatile, and the prices of equity securities fluctuate based on changes in a company's financial condition and overall market and economic conditions. Although common stocks have historically generated higher average total returns than fixed-income securities over the long term, common stocks also have experienced significantly more volatility in those returns and, in certain periods, have significantly under-performed relative to fixed income securities. An adverse event, such as an unfavorable earnings report, may depress the value of a particular common stock held by the Fund. A common stock may also decline due to factors which affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry. The value of a particular common stock held by the Fund may decline for a number of other reasons which directly relate to the issuer, such as management performance, financial leverage, the issuer's historical and prospective earnings, the value of its assets and reduced demand for its goods and services. Also, the prices of common stocks are sensitive to general movements in the stock market and a drop in the stock market may depress the price of common stocks to which the Fund has exposure. Common stock prices fluctuate for several reasons, including changes in investors' perceptions of the financial condition of an issuer or the general condition of the relevant stock market, or when political or economic events affecting the issuers occur. In addition, common stock prices may be particularly sensitive to rising interest rates, as the cost of capital rises and borrowing costs increase. Common equity securities in which the Fund may invest are structurally subordinated to preferred stock, bonds and other debt instruments in a company's capital structure in terms of priority to corporate income and are therefore inherently riskier than preferred stock or debt instruments of such issuers.

Dividends. The Fund may invest in equity securities. Dividends relating to these equity securities may not be fixed but may be declared at the discretion of a portfolio company's board of directors. There is no guarantee that a company in which the Fund invests will declare dividends in the future or that, if declared, the dividends will remain at current levels or increase over time. Therefore, there is the possibility that such companies could reduce or eliminate the payment of dividends in the future. Dividend producing equity securities, in particular those whose market price is closely related to their yield, may exhibit greater sensitivity to interest rate changes. The Fund's investments in dividend producing equity securities may also limit its potential for appreciation during a broad market advance.

The prices of dividend producing equity securities can be highly volatile. Investors should not assume that the Fund's investments in these securities will necessarily reduce the volatility of the Fund's NAV or provide “protection,” compared to other types of equity securities, when markets perform poorly.

Smaller Capitalization Company Risk. The Fund may invest from time to time in smaller and midsize companies. Smaller capitalization companies may have limited product lines or markets. They may be less financially secure than larger, more established companies. They may depend on a small number of key personnel. If a product fails or there are other adverse developments, or if management changes, the Fund's investment in a smaller capitalization company may lose substantial value. In addition, it is more difficult to get information on smaller companies, which tend to be less well known, have shorter operating histories, do not have significant ownership by large investors and are followed by relatively few securities analysts.

The securities of smaller capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization securities or the market as a whole. In addition, smaller capitalization securities may be particularly sensitive to changes in interest rates, borrowing costs and earnings. Investing in smaller capitalization securities requires a longer-term view.

Small and Mid-Cap Stock Risk. The Fund may invest in companies with small or medium capitalizations. Smaller and medium capitalization stocks can be more volatile than, and perform differently from, larger capitalization stocks. There may be less trading in a smaller or medium company's stock, which means that buy and sell transactions in that stock could have a larger impact on the stock's price than is the case with larger company stocks. Smaller and medium company stocks may be particularly sensitive to changes in interest rates, borrowing costs and earnings. Smaller and medium companies may have fewer business lines; changes in any one line of business, therefore, may have a greater impact on a smaller and medium company's stock price than is the case for a larger company. As a result, the purchase or sale of more than a limited number of shares of a small and medium company may affect its market price. The Fund may need a considerable amount of time to purchase or sell its positions in these securities. In addition, smaller or medium company stocks may not be well known to the investing public.

Investments in Unseasoned Companies Risk. The Fund may invest in the securities of smaller, less seasoned companies. These investments may present greater opportunities for growth but also involve greater risks than customarily are associated with investments in securities of more established companies. Some of the companies in which the Fund may invest will be start-up companies, which may have insubstantial operational or earnings history or may have limited products, markets, financial resources or management depth. Some may also be emerging companies at the research and development stage with no products or technologies to market or approved for marketing. In addition, it is more difficult to get information on smaller companies, which tend to be less well known, have shorter operating histories, do not have significant ownership by large investors and are followed by relatively few securities analysts. Securities of emerging companies may lack an active secondary market and may be subject to more abrupt or erratic price movements than securities of larger, more established companies or stock market averages in general. Competitors of certain companies, which may or may not be in the same industry, may have substantially greater financial resources than many of the companies in which the Fund may invest.

Securities of Smaller and Emerging Growth Companies. Investment in smaller or emerging growth companies involves greater risk than is customarily associated with investments in more established companies. The securities of smaller or emerging growth companies may be subject to more abrupt or erratic market movements than larger, more established companies or the market average in general. These companies may have limited product lines, markets or financial resources, or they may be dependent on a limited management group.

While smaller or emerging growth company issuers may offer greater opportunities for capital appreciation than large cap issuers, investments in smaller or emerging growth companies may involve greater risks and thus may be considered speculative. Full development of these companies and trends frequently takes time.

Small cap and emerging growth securities will often be traded only in the OTC market or on a regional securities exchange and may not be traded every day or in the volume typical of trading on a national securities exchange. As a result, the disposition by the Fund of portfolio securities may require the Fund to make many small sales over a lengthy period of time, or to sell these securities at a discount from market prices or during periods when, in Fund management's judgment, such disposition is not desirable.

The process of selection and continuous supervision by Fund management does not guarantee successful investment results. Careful initial selection is particularly important in this area as many new enterprises have promise but lack certain of the fundamental factors necessary to prosper.

The Fund may invest in securities of small issuers in the relatively early stages of business development that have a new technology, a unique or proprietary product or service, or a favorable market position. Such companies may not be counted upon to develop into major industrial companies.

Growth Stock Risk. Securities of growth companies may be more volatile since such companies usually invest a high portion of earnings in their business, and they may lack the dividends of value stocks that can cushion stock prices in a falling market. Stocks of companies the Advisers believe are fast growing may trade at a higher multiple of current earnings than other stocks. The values of these stocks may be more sensitive to changes in current or expected earnings than the values of other stocks. Earnings disappointments often lead to sharply falling prices because investors buy growth stocks in anticipation of

superior earnings growth. If the Adviser's assessment of the prospects for a company's earnings growth is wrong, or if the Adviser's judgment of how other investors will value the company's earnings growth is wrong, then the price of the company's stock may fall or may not approach the value that Destra has placed on it.

Value Stock Risk. The Advisers may be wrong in their assessment of a company's value and the stocks the Fund owns may not reach what the Advisers believe are their full values. A particular risk of the Fund's value stock investments is that some holdings may not recover and provide the capital growth anticipated or a stock judged to be undervalued may actually be appropriately priced. Further, because the prices of value-oriented securities tend to correlate more closely with economic cycles than growth-oriented securities, they generally are more sensitive to changing economic conditions, such as changes in interest rates, corporate earnings, and industrial production. The market may not favor value-oriented stocks and may not favor equities at all. During those periods, the Fund's relative performance may suffer.

Preferred Securities Risk. Traditional preferred securities generally pay fixed or adjustable rate dividends (or a combination thereof — e.g., a fixed rate that moves to an adjustable rate after some period of time) to investors and generally have a “preference” over common stock in the payment of dividends and the liquidation of a company's assets. This means that a company must pay dividends on preferred stock before paying any dividends on its common stock. In order to be payable, distributions on such preferred securities must be declared by the issuer's board of directors. Income payments on typical preferred securities currently outstanding are cumulative, causing dividends and distributions to accumulate even if not declared by the board of directors or otherwise made payable. In such a case all accumulated dividends must be paid before any dividend on the common stock can be paid. However, some traditional preferred stocks are non-cumulative, in which case dividends do not accumulate and need not ever be paid. A portion of the portfolio may include investments in non-cumulative preferred securities, whereby the issuer does not have an obligation to make up any arrearages to its shareholders. Should an issuer of a non-cumulative preferred stock held by the Fund determine not to pay dividends on such stock, the amount of dividends the Fund pays may be adversely affected. There are no assurances that dividends or distributions on the traditional preferred securities in which the Fund may invest will be declared or otherwise made payable.

Preferred stockholders usually have no right to vote for corporate directors or on other matters. Shares of traditional preferred securities have a liquidation value that generally equals the original purchase price at the date of issuance. The market value of preferred securities may be affected by favorable and unfavorable changes impacting companies in the utilities and financial services sectors, which are prominent issuers of preferred securities, and by actual and anticipated changes in tax laws, such as changes in corporate income tax rates or the “Dividends Received Deduction.” Because the claim on an issuer's earnings represented by traditional preferred securities may become onerous when interest rates fall below the rate payable on such securities, the issuer may redeem the securities. Thus, in declining interest rate environments in particular, the Fund's holdings of higher rate-paying fixed rate preferred securities may be reduced and the Fund may be unable to acquire securities of comparable credit quality paying comparable rates with the redemption proceeds.

There are special risks associated with investing in each type of preferred security, including:

Deferral Risk. Preferred securities may include provisions that permit the issuer, at its discretion, to defer distributions for a stated period without any adverse consequences to the issuer. If the Fund owns a preferred security that is deferring its distributions, the Fund may be required to report income for tax purposes although it has not yet received such income.

Subordination Risk. Preferred securities are subordinated to bonds and other debt instruments in a company's capital structure in terms of having priority to corporate income and liquidation payments, and therefore will be subject to greater credit risk than debt instruments.

Limited Voting Rights Risk. Generally, preferred security holders (such as the Fund) have no voting rights with respect to the issuing company unless preferred dividends have been in arrears for a specified number of periods, at which time the preferred security holders may elect a number of directors to the issuer's board. Generally, once all the arrearages have been paid, the preferred security holders no longer have voting rights.

Special Redemption Rights Risk. In certain varying circumstances, an issuer of preferred securities may redeem the securities prior to a specified date. For instance, for certain types of preferred securities, a redemption may be triggered by certain changes in U.S. federal income tax or securities laws. As with call provisions, a special redemption by the issuer may negatively impact the return of the security held by the Fund.

New Types of Securities Risk. From time to time, preferred securities have been, and may in the future be, offered having features other than those described herein. The Fund reserves the right to invest in these securities if the Advisers believe that doing so would be consistent with the Fund's investment objective and policies. Since the market for these instruments would be new, the Fund may have difficulty disposing of them at a suitable price and time. In addition to limited liquidity, these instruments may present other risks, such as high price volatility.

Risks Associated with Market Developments and Regulatory Changes

Market Developments Risk. In 2007, the global financial markets experienced stress, volatility, instability, illiquidity and disruption evidenced by a lack of liquidity in the debt capital markets, significant write-offs in the financial services sector, the re-pricing of credit risk in the broadly syndicated credit market and the failure of certain major financial institutions. While this volatility and disruption peaked in 2008 to 2009 and appears to have abated somewhat, these events contributed to general economic conditions that materially and adversely affected the broader financial and credit markets and reduced the availability of debt and equity capital for the market as a whole and financial services firms in particular. While recent conditions have improved, there can be no assurance that adverse market conditions will not repeat themselves or worsen in the future. If these adverse and volatile market conditions worsen, the capital markets, and, in particular, the market for debt obligations, may be subject to heightened volatility, increased risks of default, periods of illiquidity and other situations adverse to investors.

Instability in the credit markets has made it more difficult at certain times for a number of issuers of debt instruments to obtain financing or refinancing for their investment or lending activities or operations. In particular, because of volatile conditions in the credit markets, issuers of debt instruments may be subject to increased cost for debt, tightening underwriting standards and reduced liquidity for loans they make, securities they purchase and securities they issue. Certain borrowers may, due to macroeconomic conditions, be unable to repay their loans or other debt obligations because of these conditions. A borrower's failure to satisfy financial or operating covenants imposed by lenders could lead to defaults and, potentially, termination of the loans and foreclosure on the underlying secured assets, which could trigger cross-defaults under other agreements and jeopardize a borrower's ability to meet its obligations under its debt instruments. The Fund may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms with a defaulting borrower. The Fund may also experience a loss of principal.

These developments also (i) may make it more difficult for the Fund to accurately value its portfolio securities or to sell its portfolio securities on a timely basis; (ii) could adversely affect the ability of the Fund to use leverage for investment purposes and increase the cost of such leverage, which would reduce returns to the Shareholders; and (iii) may adversely affect the broader economy, which in turn may adversely affect the ability of issuers of securities owned by the Fund to make payments of principal and interest when due, lead to lower credit ratings of the issuer and increased defaults by the issuer. Such developments could, in turn, reduce the value of securities owned by the Fund and adversely affect the net asset value and market price of the Shares.

The Fund's investments, payment obligations and financing terms may be based on floating rates, such as London Interbank Offered Rate ("LIBOR"). LIBOR is used extensively in the U.S. and globally as a "benchmark" or "reference rate" for various commercial and financial contracts, including corporate and municipal bonds, bank loans, asset-backed and mortgage-related securities, interest rate swaps and other derivatives. On July 27, 2017, the head of the UK Financial Conduct Authority announced a desire to phase out the use of LIBOR by the end of 2021. Such announcement indicates that the continuation of LIBOR and other reference rates on the current basis cannot and will not be guaranteed after 2021. The transition away from reference rates may lead to increased volatility and illiquidity in markets that are tied to such reference rates and reduced values of reference rate-related investments. this announcement and any

additional regulatory or market changes that occur as a result of the transition away from reference rates may have an adverse impact on the Fund's investments, performance or financial conditions.

Government Intervention in the Financial Markets Risk. Instability in the financial markets has led the U.S. government, the U.S. Federal Reserve and foreign governments and central banks around the world to take a number of unprecedented actions designed to support certain financial institutions and segments of the financial markets that have experienced extreme volatility, and in some cases a lack of liquidity. U.S. federal and state and foreign governments, their regulatory agencies or self-regulatory organizations may take additional actions that affect the regulation of the securities, debt instruments or structured products in which the Fund invests, or the issuers of such securities or structured products, in ways that are unforeseeable or not fully understood or anticipated. Governments or their agencies may also acquire distressed assets from financial institutions and acquire ownership interests in those institutions. The implications of government ownership and disposition of these assets are unclear, and such programs may have positive or negative effects on the liquidity, valuation and performance of the Fund's portfolio holdings. Furthermore, volatile financial markets can expose the Fund to greater market and liquidity risk and potential difficulty in valuing portfolio instruments held by the Fund. Destra will monitor developments and seek to manage the Fund's portfolio in a manner consistent with achieving the Fund's investment objective, but there can be no assurance that it will be successful in doing so.

Legislation and Regulation Risk. On July 21, 2010, the Dodd-Frank Act was enacted. The Dodd-Frank Act, among other things, grants regulatory authorities such as the U.S. Commodity Futures Trading Commission (the "CFTC") and the SEC broad rulemaking authority to promulgate rules under the Dodd-Frank Act, including comprehensive regulation of the OTC derivatives market. It is unclear to what extent these regulators will exercise these revised and expanded powers and whether they will undertake rulemaking, supervisory or enforcement actions that would adversely affect the Fund or investments made by the Fund. Possible regulatory actions taken under these revised and expanded powers may include actions related to financial consumer protection, proprietary trading and derivatives.

While some rules have been promulgated by the CFTC and the SEC, a number of important rulemakings have not yet been finalized and there can be no assurance that future regulatory actions authorized by the Dodd-Frank Act will not significantly reduce the returns of the Fund. The implementation of the Dodd-Frank Act could adversely affect the Fund by increasing transaction and/or regulatory compliance costs and may affect the availability, liquidity and cost of entering into derivatives, including potentially limiting or restricting the ability of the Fund to use certain derivatives or certain counterparties as a part of its investment strategy, increasing the costs of using these instruments or making these instruments less effective. In addition, greater regulatory scrutiny may increase the Fund's and Destra's exposure to potential liabilities. Increased regulatory oversight can also impose administrative burdens on the Fund and Destra, including, without limitation, responding to examinations or investigations and implementing new policies and procedures.

On October 28, 2020, the SEC approved a new rule and rule amendments that regulate the use of derivatives by registered investment companies. The new rule imposes value-at-risk limits, requires the adoption of policies related to derivatives, mandates reporting to funds' boards, requires reporting to the SEC and regulates fund's use of reverse repurchase agreements and unfunded commitment agreements. The ultimate impact of the new rule remains unclear, but it may limit the Fund's ability to engage in derivatives transactions and/or increase the costs of such transactions.

At any time after the date of this prospectus, legislation by U.S. and foreign governments may be enacted that could negatively affect the assets of the Fund or the issuers of such assets. Changing approaches to regulation may have a negative impact on the entities in which the Fund invests. Legislation or regulation may also change the way in which the Fund itself is regulated. There can be no assurance that future legislation, regulation or deregulation will not have a material adverse effect on the Fund or will not impair the ability of the Fund to achieve its investment objective.

Defensive Investing Risk. In response to market conditions and for defensive purposes, the Fund may allocate assets into cash or short-term fixed income securities without limitation. In doing so, the Fund may succeed in avoiding losses but may otherwise fail to achieve its investment objective. Further, the value of

short-term fixed income securities may be affected by changing interest rates and by changes in credit ratings of the investments. If the Fund holds cash uninvested, it will be subject to the credit risk of the depository institution holding the cash.

Risks Relating to the Fund's Investment Program

Valuation Risk. There may be no central place or exchange for certain of the securities or instruments in which the Fund invests. Bonds and certain other debt securities, for example, generally trade on an OTC market which may be anywhere in the world where the buyer and seller can settle on a price. Due to the lack of centralized information and trading, the valuation of bonds and certain other debt securities may carry more risk than that of common stock which trades on national exchanges. Uncertainties in the conditions of the financial market, unreliable reference data, lack of transparency and inconsistency of valuation models and processes may lead to inaccurate asset pricing. In addition, other market participants may value securities differently than the Fund. As a result, the Fund may be subject to the risk that when a bond or other debt security is sold in the market, the amount received by the Fund is less than the value of such bond or other debt security carried on the Fund's books.

Leverage Risk. The Fund may use leverage to seek to achieve its investment objective. Leverage involves risks and special considerations for Shareholders, including (i) the likelihood of greater volatility of NAV and dividend rate of the Shares than a comparable portfolio without leverage; (ii) the risk that fluctuations in interest rates on borrowings and short-term debt or in the interest or dividend rates on any leverage that the Fund must pay will reduce the return to Shareholders; (iii) the effect of leverage in a declining market, which is likely to cause a greater decline in the NAV of the Shares than if the Fund were not leveraged; and (iv) the likelihood that leverage may increase operating costs, which may reduce total return.

Any decline in the NAV of the Fund's investments will be borne entirely by the Shareholders (as opposed to, e.g., holders of the Fund's preferred shares, if any). Therefore, if the market value of the Fund's portfolio declines, leverage will result in a greater decrease in NAV to Shareholders than if the Fund were not leveraged. This greater NAV decrease will also tend to cause a greater decline in the market price for Shares when and if Shares are ever listed on a national securities exchange. While the Fund may from time to time consider reducing any outstanding leverage in response to actual or anticipated changes in interest rates in an effort to mitigate the increased volatility of current income and NAV associated with leverage, there can be no assurance that the Fund will actually reduce any outstanding leverage in the future or that any reduction, if undertaken, will benefit the Shareholders. Changes in the future direction of interest rates are very difficult to predict accurately. If the Fund were to reduce any outstanding leverage based on a prediction about future changes to interest rates, and that prediction turned out to be incorrect, the reduction in any outstanding leverage would likely operate to reduce the income and/or total returns to Shareholders relative to the circumstance where the Fund had not reduced any of its outstanding leverage. The Fund may decide that this risk outweighs the likelihood of achieving the desired reduction to volatility in income and share price if the prediction were to turn out to be correct, and determine not to reduce any of its outstanding leverage as described above.

The 1940 Act generally limits the extent to which the Fund may utilize borrowings and "uncovered" transactions that may give rise to a form of leverage, including reverse repurchase agreements, swaps, options, the leverage incurred from securities lending transactions and other derivative transactions or short selling, together with any other senior securities representing indebtedness, to 33 1/3% of the Fund's total assets at the time utilized. In addition, the 1940 Act limits the extent to which the Fund may issue preferred shares to 50% of the Fund's total assets (less the Fund's obligations under senior securities representing indebtedness). "Covered" reverse repurchase agreements, swaps, options, securities lending arrangements and other derivative transactions or short selling will not be counted against the foregoing limits under the 1940 Act. The Fund will "cover" its derivative positions by segregating or earmarking an amount of cash and/or liquid assets to the extent required by the 1940 Act and applicable SEC or SEC staff interpretations and guidance from time to time.

Alternatively, the Fund may enter into an offsetting position or own positions covering its obligations with respect to the transaction; otherwise, this transaction will be considered "uncovered." The Fund may not cover an applicable derivative transaction if it does not need to do so to comply with the foregoing 1940 Act requirements and, in the view of the Advisers, the assets that would have been used to cover could be

better used for a different purpose. However, these transactions, even if covered, may represent a form of economic leverage and will create risks. The potential loss on derivative instruments may be substantial relative to the initial investment therein. In addition, these segregation/earmarking and coverage requirements could result in the Fund maintaining securities positions that it would otherwise liquidate, segregating/earmarking assets at a time when it might be disadvantageous to do so or otherwise restricting portfolio management. Such segregation/earmarking and coverage requirements will not limit or offset losses on related positions.

Certain types of leverage the Fund may use may result in the Fund being subject to covenants relating to asset coverage and portfolio composition requirements. The Fund may be subject to certain restrictions on investments imposed by guidelines of one or more rating agencies, which may issue ratings for any preferred shares issued by the Fund. The terms of any borrowings or these rating agency guidelines may impose asset coverage or portfolio composition requirements that are more stringent than those imposed by the 1940 Act.

The Fund may invest in the securities of other investment companies. Such investment companies may also be leveraged, and will therefore be subject to the leverage risks described above. This additional leverage may in certain market conditions reduce the NAV of the Shares and the returns to Shareholders.

Illustration. The following table illustrates the effect of leverage on returns from an investment in the Fund's shares, assuming various annual returns, net of expenses. The calculations in the table below are hypothetical and actual returns may be higher or lower than those appearing below. The calculation assumes (i) \$133.4 million in average total assets, (ii) a weighted average cost of funds of 2.49%, (iii) \$19.0 million in borrowings outstanding (i.e. assumes the Fund borrows funds equal to 17% of its average net assets during such period) and (iv) \$114.3 million in average net assets. In order to compute the corresponding return to shareholders, the "Assumed Return on the Fund's Portfolio (net of expenses)" is multiplied by the assumed average total assets to obtain an assumed return to the Fund. From this amount, the interest expense is calculated by multiplying the assumed weighted average cost of funds by the assumed borrowings outstanding, and the product is subtracted from the assumed return to the Fund in order to determine the return available to shareholders. The return available to shareholders is then divided by shareholders' equity to determine the corresponding return to shareholders. Actual interest payments may be different.

Assumed Return on the Fund's Portfolio (net of expenses)	-10%	-5%	0%	5%	10%
Corresponding return to Shareholders	(12.11)%	(6.26)%	(0.41)%	5.43%	11.28%

Similarly, the Fund's assets would need to yield an annual return (net of expenses) of approximately 0.41% in order to cover the annual interest payments on the Fund's outstanding borrowings.

Cost of Capital and Net Investment Income Risk. If the Fund uses debt to finance investments, its net investment income may depend, in part, upon the difference between the rate at which it borrows funds and the rate at which it invests those funds. As a result, the Fund can offer no assurance that a significant change in market interest rates will not have a material adverse effect on the Fund's net investment income. In periods of rising interest rates when it has debt outstanding, the Fund's cost of funds will increase, which could reduce the Fund's net investment income. The Fund may use interest rate risk management techniques in an effort to limit its exposure to interest rate fluctuations. These techniques may include various interest rate hedging activities to the extent permitted by the 1940 Act. These activities may limit its ability to participate in the benefits of lower interest rates with respect to the hedged portfolio. Adverse developments resulting from changes in interest rates or hedging transactions could have a material adverse effect on the Fund's business, financial condition and results of operations.

Prepayment and Maturity Extension Risk. Prepayment risk occurs when a debt investment held by the Fund can be repaid in whole or in part prior to its maturity. The amount of prepayable obligations in which the Fund invests from time to time may be affected by general business conditions, market interest rates, borrowers' financial conditions and competitive conditions among lenders. In a period of declining interest rates, borrowers may prepay investments more quickly than anticipated, reducing the yield to maturity and the average life of the relevant investment. Moreover, when the Fund reinvests the proceeds of a prepayment in these circumstances, it will likely receive a rate of interest that is lower than the rate of interest on the security that was prepaid. To the extent that the Fund purchases the relevant investment at a

premium, prepayments may result in a loss to the extent of the premium paid. If the Fund buys such investments at a discount, both scheduled payments and unscheduled prepayments will increase current and total returns and unscheduled prepayments will also accelerate the recognition of income, which may be taxable as ordinary income to investors. In a period of rising interest rates, prepayments of investments may occur at a slower than expected rate, creating maturity extension risk. This particular risk may effectively change an investment that was considered short- or intermediate-term at the time of purchase into a longer-term investment. Since the value of longer-term investments generally fluctuates more widely in response to changes in interest rates than shorter-term investments, maturity extension risk could increase the volatility of the Fund. When interest rates decline, the value of an investment with prepayment features may not increase as much as that of other fixed-income securities, and, as noted above, changes in market rates of interest may accelerate or delay prepayments and thus affect maturities.

Arbitrage Risk. The Fund may engage in arbitrage strategies. Arbitrage strategies entail various risks, including the risk that external events, regulatory approvals and other factors will impact the consummation of announced corporate events and/or the prices of certain positions.

U.S. Credit Rating and European Economic Crisis Risk. In August 2011, S&P lowered its long-term sovereign credit rating on the United States from “AAA” to “AA+,” which was re-affirmed by S&P in November 2016. In January 2012, S&P lowered its long-term sovereign credit ratings for France, Italy, Spain and six other European countries, which negatively impacted global markets and economic conditions. S&P subsequently raised its long-term sovereign credit rating on Spain to “BBB,” but its current credit rating still signifies significant ongoing risk. Furthermore, following the United Kingdom’s referendum to leave the European Union (“EU”), S&P lowered its long-term sovereign credit rating. In addition, the terms of the United Kingdom’s exit and any future referendums in other European countries may disrupt the global market. Recent U.S. budget deficit concerns, together with signs of deteriorating sovereign debt conditions in Europe, have increased the possibility of additional credit-rating downgrades and economic slowdowns. The impact of any further downgrades to sovereign credit ratings, or perceived creditworthiness, and the ability of certain countries to continue to service their sovereign debt obligations is inherently unpredictable and could adversely affect the U.S. and global financial markets and economic conditions. In addition, adverse economic conditions resulting from any further downgrade of sovereign credit ratings or an economic crisis could have a material adverse effect on the Fund’s business, financial condition and results of operations.

Eurozone and Redenomination Risk. The Fund will invest from time to time in European companies and companies that may be affected by the Eurozone economy. The United Kingdom (“UK”) left the European Union (“EU”) on January 31, 2020, and a transition period during which the UK and the EU negotiated terms of departure ended on December 31, 2020. This departure is commonly referred to as “Brexit.” There is significant uncertainty regarding the potential consequences of Brexit. The political divisions within the UK, as well as those between the UK and the EU, which the referendum vote has highlighted, coupled with the uncertain consequences of Brexit, may have a significant impact upon the UK and European economies as well as the broader global economy. The Fund and its investments may be exposed to risks related to Brexit, including volatile trading markets and significant and unpredictable currency fluctuations. Securities issued by companies domiciled in the UK could be subject to changing regulatory and tax regimes. Banking and financial services companies that operate in the UK or EU could be disproportionately impacted by these actions. Further insecurity in EU membership or the abandonment of the euro could exacerbate market and currency volatility and negatively impact investments in securities issued by companies located in EU countries. Brexit also may cause additional member states to contemplate departing the EU, which would likely perpetuate political and economic instability in the region and cause additional market disruption in global financial markets. As a result, markets in the UK, Europe and globally could experience increased volatility and illiquidity, and potentially lower economic growth which in return could potentially have an adverse effect on the value of the Fund’s investments.

In addition, ongoing concerns regarding the sovereign debt of various Eurozone countries, including the potential for investors to incur substantial write-downs, reductions in the face value of sovereign debt and/or sovereign defaults, as well as the possibility that one or more countries might leave the EU or the Eurozone create risks that could materially and adversely affect the Fund’s investments. Sovereign debt defaults and EU and/or Eurozone exits could have material adverse effects on the Fund’s investments in European

companies, including, but not limited to, the availability of credit to support such companies' financing needs, uncertainty and disruption in relation to financing, increased currency risk in relation to contracts denominated in Euros and wider economic disruption in markets served by those companies, while austerity and/or other measures introduced in order to limit or contain these issues may themselves lead to economic contraction and resulting adverse effects for the Fund. Legal uncertainty about the funding of Euro-denominated obligations following any breakup or exits from the Eurozone, particularly in the case of investments in companies in affected countries, could also have material adverse effects on the Fund. In addition, securities or other investments that are redenominated may be subject to foreign currency risk, liquidity risk and valuation risk to a greater extent than similar investments currently denominated in Euros. To the extent a currency used for redenomination purposes is not specified in respect of certain Eurozone-related investments, or should the Euro cease to be used entirely, the currency in which such investments are denominated may be unclear, making such investments particularly difficult to value or dispose of. The Fund may incur additional expenses to the extent it is required to seek judicial or other clarification of the denomination or value of such securities.

Market Developments. Although the U.S. and foreign markets are not currently experiencing the same levels of disruption as occurred during 2008 and 2009, extreme volatility or market disruption may occur in the future. Instability in the credit markets may make it more difficult for issuers of debt securities to obtain financing or refinancing for their investment or lending activities or operations. In particular, because of volatile conditions in the credit markets, issuers of debt securities may be subject to increased cost for debt, tightening underwriting standards and reduced liquidity for loans they make, securities they purchase and securities they issue.

These developments may increase the volatility of the value of securities owned by the Fund. These developments also may make it more difficult for the Fund to accurately value its securities or to sell its securities on a timely basis. These developments, including rising interest rates, could adversely affect the ability of the Fund to use leverage for investment purposes and increase the cost of such leverage, which would reduce returns to investors. These developments also may adversely affect the broader economy, which in turn may adversely affect the ability of issuers of securities owned by the Fund to make payments of principal and interest when due, leading to lower credit ratings of the issuer and increased defaults by the issuer. Such developments could, in turn, reduce the value of securities owned by the Fund and adversely affect the Fund's NAV.

Economic Recession or Downturn Risk. Many of the Fund's portfolio companies may be susceptible to economic slowdowns or recessions. Therefore, the Fund's non-performing assets are likely to increase, and the value of its portfolio is likely to decrease, during these periods. A prolonged recession may result in losses of value in the Fund's portfolio and a decrease in the Fund's revenues, net income and NAV.

Unfavorable economic conditions also could increase the Fund's funding costs, limit the Fund's access to the capital markets or result in a decision by lenders not to extend credit to it on terms it deems acceptable. These events could prevent the Fund from increasing investments and harm the Fund's operating results.

Market Disruption and Geopolitical Risk. The occurrence of events similar to those in recent years, such as the aftermath of the war in Iraq, instability in Afghanistan, Pakistan, Egypt, Libya, Syria, Russia, Ukraine and other parts of the Middle East, the outbreak of infectious diseases (including epidemics and pandemics) or other public health issues, terrorist attacks in the U.S. and around the world, social and political discord, debt crises (such as the recent Greek crisis), sovereign debt downgrades, or the exits or potential exits of one or more countries from the EU or various trade pacts, among others, may result in market volatility, may have long-term effects on the U.S. and worldwide financial markets, and may cause further economic uncertainties in the U.S. and worldwide. The Fund does not know how long the securities markets may be affected by these events and cannot predict the effects of these and similar events in the future on the U.S. economy and securities markets. The Fund may be adversely affected by abrogation of international agreements and national laws which have created the market instruments in which the Fund may invest, failure of the designated national and international authorities to enforce compliance with the same laws and agreements, failure of local, national and international organization to carry out the duties prescribed to them under the relevant agreements, revisions of these laws and agreements which dilute their effectiveness or conflicting interpretation of provisions of the same laws and agreements. The Fund may be adversely affected by uncertainties such as terrorism, international political developments, and changes in

government policies, taxation, restrictions on foreign investment and currency repatriation, currency fluctuations and other developments in the laws and regulations of the countries in which it is invested.

Government Intervention and Regulatory Risks. The instability in the financial markets discussed above led the U.S. government and certain foreign governments to take a number of unprecedented actions designed to support certain financial institutions and segments of the financial markets that have experienced extreme volatility, and in some cases a lack of liquidity, including through direct purchases of equity and debt securities. Federal, state, and other governments, their regulatory agencies or self-regulatory organizations may take actions that affect the regulation of the issuers in which the Fund invests in ways that are unforeseeable. Legislation or regulation may also change the way in which the Fund is regulated. Such legislation or regulation could limit or preclude the Fund's ability to achieve its investment objective.

The Dodd-Frank Act contains sweeping financial legislation regarding the operation of banks, private fund managers and other financial institutions. The Dodd-Frank Act includes provisions regarding, among other things, the regulation of derivatives, the identification, monitoring and prophylactic regulation of systemic risks to financial markets, and the regulation of proprietary trading and investment activity of banking institutions. The continuing implementation of the Dodd-Frank Act and any other regulations could adversely affect the Advisers and the Fund. The Advisers may attempt to take certain actions to lessen the impact of the Dodd-Frank Act and any other legislation or regulation affecting the Fund, although no assurances can be given that such actions would be successful and no assurances can be given that such actions would not have a significant negative impact on the Fund. The ultimate impact of the Dodd-Frank Act, and any additional future legislation or regulation, is not yet certain and the Advisers and the Fund may be affected by governmental action in ways that are unforeseeable.

The SEC and its staff have also engaged in various initiatives and reviews that seek to improve and modernize the regulatory structure governing investment companies. These efforts appear to be focused on risk identification and controls in various areas, including embedded leverage through the use of derivatives and other trading practices, cybersecurity, liquidity, enhanced regulatory and public reporting requirements and the evaluation of systemic risks. On October 13, 2016, the SEC adopted new rules and forms, and amended existing rules and forms, to modernize the reporting of information provided by funds and to improve the quality and type of information that funds provide to the SEC and investors. In part, the new and amended rules and forms amended Regulation S-X and require standardized, enhanced disclosure about derivatives in the Fund's financial statements, as well as other amendments. Any additional new rules, guidance or regulatory initiatives resulting from these efforts could increase the Fund's expenses and impact its returns to Shareholders or, in the extreme case, impact or limit the Fund's use of various portfolio management strategies or techniques and adversely impact the Fund.

In the aftermath of the late-2000s financial crisis, there appears to be a renewed popular, political and judicial focus on finance-related consumer protection. Financial institution practices are also subject to greater scrutiny and criticism generally. In the case of transactions between financial institutions and the general public, there may be a greater tendency toward strict interpretation of terms and legal rights in favor of the consuming public, particularly where there is a real or perceived disparity in risk allocation and/or where consumers are perceived as not having had an opportunity to exercise informed consent to the transaction. In the event of conflicting interests between retail investors holding common shares of a closed-end investment company such as the Fund and a large financial institution, a court may similarly seek to strictly interpret terms and legal rights in favor of retail investors.

Investment Terms and Timeframe Risk. Delays in investing the net proceeds of this Offering may impair the Fund's performance. The Fund cannot assure investors that it will be able to identify any investments that meet the Fund's investment objective or that any investment that the Fund makes will produce a positive return. The Fund may be unable to invest its assets on acceptable terms within the time period that it anticipates or at all, which could harm the Fund's financial condition and results of operations.

Prior to investing in securities of portfolio companies, the Fund may invest primarily in cash, cash equivalents, U.S. government securities, repurchase agreements and high-quality debt instruments maturing in one year or less from the time of investment, which may produce returns that are significantly lower than the returns which it expects to achieve when the Fund's portfolio is fully invested in securities meeting its investment objective. As a result, any distributions that the Fund pays while its portfolio is not fully invested

in securities meeting its investment objective may be lower than the distributions that the Fund may be able to pay when its portfolio is fully invested in securities meeting its investment objective.

Restrictions on Entering into Affiliated Transactions. The Fund is prohibited under the 1940 Act from participating in certain transactions with certain of its affiliates without relying on an available exemption or the prior approval of the SEC. For purposes of the 1940 Act, the following persons are considered an affiliate of the Fund and the Fund is generally prohibited from buying any securities from or selling any securities to such affiliate: (i) any person that owns, directly or indirectly, 5% or more of the Fund's outstanding voting securities; (ii) any person that owns, directly or indirectly, 5% or more of the outstanding voting securities of Destra or Validus (or either of their respective controlling entities); or (iii) any person in which Adviser or Sub-Adviser or a person controlling or under common control with Adviser or Sub-Adviser owns, directly or indirectly, 5% or more of such person's voting securities. The 1940 Act also prohibits certain "joint" transactions with certain of the Fund's affiliates, which could include investments in the same portfolio company (whether at the same or different times), without the prior approval of the SEC. If a person, directly or indirectly, holds more than 5% of the voting securities of the Fund, Adviser or Sub-Adviser (or either of their respective controlling entities), or is under common control with the Fund, Adviser or Sub-Adviser, the Fund is prohibited from buying any securities or other property from or selling any securities or other property to such person or certain of that person's affiliates, or entering into "joint" transactions with such person or certain of that person's affiliates, absent an available exemption or the prior approval of the SEC. Similar restrictions limit the Fund's ability to transact business with its officers or Trustees or their affiliates.

In addition, the Fund is not permitted to co-invest with certain entities affiliated with Destra or Validus in transactions originated by Destra or Validus or their respective affiliates unless it first obtains an exemptive order from the SEC or co-invests alongside Destra or Validus or their respective affiliates in accordance with existing regulatory guidance and the allocation policies of the Advisers and their respective affiliates, as applicable.

In addition, entering into certain transactions that are not deemed "joint" transactions (for purposes of the 1940 Act and relevant guidance from the SEC) may potentially lead to joint transactions within the meaning of the 1940 Act in the future. This may be the case, for example, with issuers who are near default and more likely to enter into restructuring or work-out transactions with their existing debt holders, which may include the Fund and its affiliates. In some cases, to avoid the potential of future joint transactions, the Advisers may avoid allocating an investment opportunity to the Fund that they would otherwise allocate, subject to the Advisers' then-current allocation policies and any applicable exemptive orders, and to the Advisers' obligations to allocate opportunities in a fair and equitable manner consistent with their fiduciary duties owed to the Fund and other accounts respectively advised by the Advisers and policies related to approval of investments.

Lack of Funds to Make Additional Investments Risk. The Fund may not have the funds or ability to make additional investments in its portfolio companies. After the Fund's initial investment in a portfolio company, it may be called upon from time to time to provide additional funds to such company or have the opportunity to increase its investment through the exercise of a warrant to purchase common stock. There is no assurance that the Fund will make, or will have sufficient funds to make, follow-on investments. Any decisions not to make a follow-on investment or any inability on the Fund's part to make such an investment may have a negative impact on a portfolio company in need of such an investment, may result in a missed opportunity for the Fund to increase its participation in a successful operation or may reduce the expected return on the investment.

Funding Future Capital Needs Risk. The net proceeds from this Offering may be used for the Fund's investment opportunities, operating expenses and for payment of various fees and expenses, such as the Management Fee and other fees. Any working capital reserves the Fund maintains may not be sufficient for investment purposes, and the Fund may require debt or equity financing to operate. Accordingly, in the event that the Fund develops a need for additional capital in the future for investments or for any other reason, these sources of funding may not be available to it. Consequently, if the Fund cannot obtain debt or equity financing on acceptable terms, or at all, the Fund's ability to acquire investments and to expand the Fund's operations will be adversely affected. As a result, the Fund would be less able to allocate its portfolio

among various issuers and industries and achieve its investment objective, which may negatively impact its results of operations and reduce its ability to make distributions.

Uncertain Exit Strategies. Due to the illiquid nature of some of the positions that the Fund may acquire, as well as the risks associated with the Fund's investment strategies, the Fund is unable to predict with confidence what the exit strategy may ultimately be for any given investment, or that one will definitely be available. Exit strategies which appear to be viable when an investment is initiated may be precluded by the time the investment is ready to be realized due to economic, legal, political or other factors.

Other Risks Relating to the Fund

Closed-End Interval Fund Structure; Liquidity Risks. The Fund has been organized as a non-diversified, closed-end management investment company structured as an "interval fund" and designed primarily for long-term investors. An investor should not invest in the Fund if the investor needs a liquid investment. Closed-end funds differ from open-end management investment companies (commonly known as mutual funds) in that investors in a closed-end fund do not have the right to redeem their shares on a daily basis. Unlike most closed-end funds, which typically list their shares on a securities exchange, the Fund does not list the Shares for trading on any securities exchange. Although the Fund intends to list the Shares on an exchange upon (i) obtaining the necessary Shareholder approval to list the Shares on an exchange, and (ii) meeting applicable listing eligibility requirements, the Fund's Shares might not be listed on an exchange in the foreseeable future, if at all. Unless the Fund's Shares are listed on an exchange, the Fund does not expect any secondary market to develop for the Shares. The Fund will provide limited liquidity to Shareholders by offering to repurchase a limited amount of the Fund's Shares (at least 5% but no more than 25%) annually. See "Annual Repurchases of Shares." The Fund, similar to a mutual fund, is subject to continuous asset inflows, although not subject to the continuous out-flows. Therefore, an investment in the Fund, unlike an investment in a mutual fund or listed closed-end fund, is not a liquid investment.

Large Shareholder Risk. To the extent a large proportion of the shares of the Fund are held by a small number of shareholders (or a single shareholder), including affiliates of the Fund, the Fund is subject to the risk that these shareholders will purchase or redeem Fund shares in large amounts rapidly. These transactions could adversely affect the ability of the Fund to conduct its investment program. Furthermore, it is possible that in response to a repurchase offer, the total amount of shares tendered by a small number of shareholders (or a single shareholder) may exceed the number of shares that the Fund has offered to repurchase. If a repurchase offer is oversubscribed by shareholders, the Fund will repurchase only a pro rata portion of shares tendered by each shareholder.

Competition for Investment Opportunities. The Fund competes for investments with other closed-end funds and investment funds, as well as traditional financial services companies such as commercial banks and other sources of funding. Moreover, alternative investment vehicles, such as hedge funds, have begun to invest in areas in which they have not traditionally invested. As a result of these new entrants, competition for investment opportunities may intensify. Many of the Fund's competitors are substantially larger and have considerably greater financial, technical and marketing resources than it does. For example, some competitors may have a lower cost of capital and access to funding sources that are not available to the Fund. In addition, some of the Fund's competitors may have higher risk tolerances or different risk assessments than it has. These characteristics could allow the Fund's competitors to consider a wider variety of investments, establish more relationships and pay more competitive prices for investments than it is able to do. The Fund may lose investment opportunities if it does not match its competitors' pricing. If the Fund is forced to match its competitors' pricing, it may not be able to achieve acceptable returns on its investments or may bear substantial risk of capital loss. A significant increase in the number and/or the size of the Fund's competitors could force it to accept less attractive investment terms. Furthermore, many of the Fund's competitors have greater experience operating under, or are not subject to, the regulatory restrictions that the 1940 Act imposes on it as a closed-end fund.

Systems Risks. The Fund depends on the Advisers to develop and implement appropriate systems for the Fund's activities. The Fund relies extensively on computer programs and systems to evaluate certain securities based on real-time trading information, to monitor its portfolio and net capital, and to generate risk management and other reports that are critical to oversight of the Fund's activities. In addition, certain of the Fund's and the Advisers' operations interface with or depend on systems operated by third parties,

including market counterparties and other service providers, and the Fund or the Advisers may not be in a position to verify the risks or reliability of such third-party systems. These programs or systems may be subject to certain defects, failures or interruptions, including, but not limited to, those caused by worms, viruses and power failures. Any such defect or failure could have a material adverse effect on the Fund. For example, such failures could cause settlement of trades to fail, lead to inaccurate accounting, recording or processing of trades and cause inaccurate reports, which may affect the Fund's ability to monitor its investment portfolio and its risks. Studies have shown that a lack of adequate systems is often a significant contributing factor to failures of funds like the Fund.

Cybersecurity Risk. As part of their business, the Advisers process, store and transmit large amounts of electronic information, including information relating to the transactions of the Fund and personally identifiable information of the Shareholders. Similarly, service providers of the Advisers or the Fund, especially the Fund's Administrator, may process, store and transmit such information. The Advisers have procedures and systems in place that they believe are reasonably designed to protect such information and prevent data loss and security breaches. However, such measures cannot provide absolute security. The techniques used to obtain unauthorized access to data, disable or degrade service, or sabotage systems change frequently and may be difficult to detect for long periods of time. Hardware or software acquired from third parties may contain defects in design or manufacture or other problems that could unexpectedly compromise information security. Network connected services provided by third parties to the Advisers may be susceptible to compromise, leading to a breach of the Advisers' networks. The Advisers' systems or facilities may be susceptible to employee error or malfeasance, government surveillance, or other security threats. Online services provided by the Advisers to the Shareholders may also be susceptible to compromise. Breach of the Advisers' information systems may cause information relating to the transactions of the Fund and personally identifiable information of the Shareholders to be lost or improperly accessed, used or disclosed.

The service providers of the Advisers and the Fund are subject to the same electronic information security threats as the Advisers. If a service provider fails to adopt or adhere to adequate data security policies, or in the event of a breach of its networks, information relating to the transactions of the Fund and personally identifiable information of the Shareholders may be lost or improperly accessed, used or disclosed.

The loss or improper access, use or disclosure of the Advisers' or the Fund's proprietary information may cause the Advisers or the Fund to suffer, among other things, financial loss, the disruption of its business, liability to third parties, regulatory intervention or reputational damage. Any of the foregoing events could have a material adverse effect on the Fund and the Shareholders' investments therein.

Operational Risk. The Fund depends on the Advisers to develop the appropriate systems and procedures to control operational risk. Operational risks arising from mistakes made in the confirmation or settlement of transactions, from transactions not being properly booked, evaluated or accounted for or other similar disruption in the Fund's operations may cause the Fund to suffer financial loss, the disruption of its business, liability to clients or third parties, regulatory intervention or reputational damage. The Fund relies heavily on its financial, accounting and other data processing systems. The ability of its systems to accommodate an increasing volume of transactions could also constrain the Fund's ability to properly manage the portfolio.

Purchase Price Risk. The purchase price at which an investor purchases Shares will be determined at each daily closing and will equal the NAV per Share of the applicable class as of such date, plus the applicable Sales Load. As a result, in the event of an increase in the NAV per Share of an applicable class, an investor's purchase price may be higher than the prior daily closing price per Share of the applicable class, and therefore an investor may receive fewer Shares than if an investor had subscribed at the prior daily closing price.

"Best-Efforts" Offering Risk. This Offering is being made on a best-efforts basis, whereby Destra Capital Investments LLC (the "Distributor") is only required to use its best efforts to sell the Shares and has no firm commitment or obligation to purchase any of the Shares. To the extent that less than the maximum number of Shares is subscribed for, the opportunity for the allocation of the Fund's investments among various

issuers and industries may be decreased, and the returns achieved on those investments may be reduced as a result of allocating all of the Fund's expenses over a smaller capital base.

Potentially Inadequate Broker-Dealer Network Risk. The success of the Fund's continuous offering, and correspondingly the Fund's ability to implement its investment objective and strategies, depends upon the ability of the Distributor to establish, operate and maintain a network of Selected Broker-Dealers (defined below) to sell the Shares. If the Distributor fails to perform, the Fund may not be able to raise adequate proceeds through the Fund's continuous offering to implement the Fund's investment objective and strategies. If the Fund is unsuccessful in implementing its investment objective and strategies, an investor could lose all or a part of his or her investment in the Fund. "Selected Broker-Dealers" refers to other broker-dealers authorized by the Distributor to sell Shares that are members of The Financial Industry Regulatory Authority, Inc. ("FINRA") or other properly licensed agents.

Fluctuations in Results. The Fund could experience fluctuations in its operating results due to a number of factors, including the Fund's ability or inability to make investments that meet the Fund's investment objective, the interest or dividend rates payable on the securities it acquires, the level of the Fund's expenses, variations in and the timing of the recognition of realized and unrealized gains or losses, the degree to which it encounters competition in its markets and general economic conditions. As a result of these and other factors, results for any previous period should not be relied upon as being indicative of performance in future periods.

Repurchase Risks. Annual repurchases by the Fund of its Shares typically will be funded from available cash or sales of portfolio securities. However, payment for repurchased Shares may require the Fund to liquidate portfolio holdings earlier than the Advisers otherwise would liquidate such holdings, potentially resulting in losses, and may increase the Fund's portfolio turnover. Destra may take measures to attempt to avoid or minimize such potential losses and turnover, and instead of liquidating portfolio holdings, may borrow money to finance repurchases of Shares. If the Fund borrows to finance repurchases, interest on any such borrowing will negatively affect Shareholders who do not tender their Shares in a repurchase offer by increasing the Fund's expenses and reducing any net investment income. To the extent the Fund finances repurchase proceeds by selling investments, the Fund may hold a larger proportion of its net assets in less liquid securities. The Fund's investments are subject to liquidity risk. Liquidity risk exists when particular investments of the Fund would be difficult to purchase or sell, possibly preventing the Fund from selling such illiquid investments at an advantageous time or price, or possibly requiring the Fund to dispose of other investments at unfavorable times or prices in order to satisfy its obligations. Funds with principal investment strategies that involve securities of companies with smaller market capitalizations, derivatives or securities with substantial market and/or credit risk tend to have the greatest exposure to liquidity risk. The sale of securities to fund repurchases could reduce the market price of those securities, which in turn would reduce the Fund's NAV. Also, because the Fund's investments may include securities denominated in foreign currencies, changes in currency values between the date a repurchase offer terminates and the repurchase date may also adversely affect the value of the Fund's shares. Additionally, to the extent the Fund consistently is in a "net repurchase" position, its assets will likely decline, which will in turn increase the Fund's expense ratio and could place the continued viability of the Fund in jeopardy. If the Fund were to liquidate after a period of net repurchases, the assets left in the Fund would likely be the Fund's more illiquid assets, which may result in remaining Shareholders being required to hold their investment in the Fund, and be subject to changes (including declines) in value, for a prolonged period of time while the Fund seeks to liquidate its remaining investments. In such a scenario, a Shareholder could lose the entire value of his or her investment in the Fund.

Distribution Payment Risk. The Fund cannot assure investors that it will achieve investment results that will allow it to make a specified level of cash distributions or year-to-year increases in cash distributions. All distributions will be paid at the discretion of the Board and may depend on the Fund's earnings, the Fund's net investment income, the Fund's financial condition, maintenance of the Fund's RIC status, compliance with applicable regulations and such other factors as the Board may deem relevant from time to time.

In the event that the Fund encounters delays in locating suitable investment opportunities, all or a substantial portion of the Fund's distributions to Shareholders may constitute a return of capital to

Shareholders and will lower an investor's tax basis in his or her Shares. A return of capital generally is a return of an investor's investment rather than a return of earnings or gains derived from the Fund's investment activities.

Investment Dilution Risk. The Fund's investors do not have preemptive rights to any Shares that the Fund may issue in the future. The Fund's Amended and Restated Agreement and Declaration of Trust ("Declaration of Trust") authorizes it to issue an unlimited number of Shares. A majority of the Board may amend the Fund's Declaration of Trust. After an investor purchases Shares, the Board may elect to sell additional Shares or other classes of Shares in the future or issue equity interests in private offerings. To the extent the Fund issues additional equity interests after an investor purchases its Shares, such investor's percentage ownership interest in the Fund will be diluted.

Anti-Takeover Risk. The Fund's Declaration of Trust and bylaws, as well as certain statutory and regulatory requirements, contain certain provisions that may have the effect of discouraging a third party from attempting to acquire it or from attempting to change the composition of the Board. Under the Fund's Declaration of Trust, the Fund is not required to hold annual meetings of Shareholders. The Trustees are elected for indefinite terms and do not stand for reelection. Subject to the limitations of the 1940 Act, the Board may, without Shareholder action, authorize the issuance of Shares in one or more classes or series, including preferred shares; and the Board may, without Shareholder action, amend the Fund's Declaration of Trust. These anti-takeover provisions may inhibit a change of control in circumstances that could give Shareholders the opportunity to realize a premium over the value of the Shares.

Conflicts of Interest Risk. The Advisers and certain of their affiliates may experience conflicts of interest in connection with the management of the Fund, including, but not limited to: the allocation of the Advisers' time and resources between the Fund and other investment activities; compensation payable by the Fund to Destra and its affiliates; competition with certain affiliates of the Advisers for investment opportunities; investments at different levels of an entity's capital structure by the Fund and other clients of the Advisers, subject to the limitations of the 1940 Act; differing recommendations given by the Advisers to the Fund versus other clients; restrictions on the Advisers' existing business relationships or use of material non-public information with respect to potential investments by the Fund; the formation of additional investment funds or entrance into other investment banking, advisory, investment advisory, and other relationships by the Advisers or their affiliates; and limitations on purchasing or selling securities to other clients of the Advisers or their respective affiliates and on entering into "joint" transactions with certain of the Fund's, Destra's or Validus' affiliates. See "Conflicts of Interest."

Portfolio Fair Value Risk. Under the 1940 Act, the Fund is required to carry its portfolio investments at market value or, if there is no readily available market value, at fair value. There is not a public market for the securities of the privately-held companies in which the Fund may invest. Certain of the Fund's investments may not be exchange-traded, but may, instead, be traded on a privately negotiated OTC secondary market for institutional investors. As a result, the Board has adopted methods for determining the fair value of such securities and other assets, and has delegated the responsibility for applying the valuation methods to Destra. On a quarterly basis, the Board reviews the valuation determinations made with respect to the Fund's investments during the preceding quarter and evaluates whether such determinations were made in a manner consistent with the Fund's valuation process. See "Determination of Net Asset Value."

Certain factors that may be considered in determining the fair value of the Fund's investments include dealer quotes for securities traded on the OTC secondary market for institutional investors, the nature and realizable value of any collateral, the portfolio company's earnings and its ability to make payments on its indebtedness, the markets in which the portfolio company does business, comparison to comparable publicly traded companies, discounted cash flow and other relevant factors. Because such valuations, and particularly valuations of private securities and private companies, are inherently uncertain, may fluctuate over short periods of time and may be based on estimates, determinations of fair value may differ materially from the values that would have been used if an exchange-traded market for these securities existed. Due to this uncertainty, the Fund's fair value determinations may cause the Fund's NAV on a given date to materially understate or overstate the value that it may ultimately realize upon the sale of one or more of its investments. Additionally, fair valuation processes for certain securities necessarily involve subjective judgments and assumptions about the value of an asset or liability and these judgments and assumptions may ultimately be incorrect.

ASC 820 and Other Changes in Accounting Rules. The Fund's assets and liabilities are valued in accordance with the valuation policies set forth herein, subject to the policies and control of the Board. However, for purposes of preparing the Fund's annual audited financial statements, which are prepared in accordance with GAAP, certain of the Fund's assets and liabilities may be valued in a manner that while consistent with GAAP, is different from the manner in which such assets are valued in accordance with the valuation policies set forth herein.

Specifically, for purposes of GAAP-compliant financial reporting, the Fund is required to follow a specific framework for measuring the fair value of its assets and liabilities, and is required to provide certain additional disclosures regarding the use of fair value measurements in their audited financial statements. Many of these requirements are set forth in ASC 820, Fair Value Measurements and Disclosures ("ASC 820"), which defines and establishes a framework for measuring fair value under GAAP and expands financial statement disclosure requirements relating to fair value measurements. Other valuation-related requirements are contained in other provisions of GAAP, and other related Financial Accounting Standards Board ("FASB") Statements and guidance. Additional FASB Statements and guidance, and additional provisions of GAAP, that may be adopted in the future may also impose additional, or different, specific requirements as to the valuation of assets and liabilities for purposes of GAAP-compliant financial reporting.

The Fund may determine in certain instances to value a particular asset at a different value for financial reporting purposes than the value of that same asset as determined in accordance with the valuation policies set forth herein. For example, the Fund may determine that ASC 820 may require the Fund, for purposes of GAAP-compliant financial reporting, to value its investments at values that are at a discount to the values that are determined in accordance with the valuation policies set forth herein. Conversely, under other accounting guidelines, such as those set forth in ASC No. 805, "Business Combinations," GAAP may require investments to be priced at values that would be different than values assigned under the valuation policies.

Accordingly, to the extent that GAAP would require any of the Fund's assets or liabilities to be valued in a manner that differs from the valuation policies set forth herein, such assets or liabilities will be valued (x) in accordance with GAAP, solely for purposes of preparing the Fund's GAAP-compliant annual audited financial statements, and (y) in accordance with the valuation policies set forth herein, subject to the policies and control of the Board (without regard to any GAAP requirements relating to the determination of fair value), for all other purposes.

Generally, ASC 820 and other accounting rules applicable to investment funds and various assets they invest in are evolving. Such changes may adversely affect the Fund. For example, the evolution of rules governing the determination of the fair market value of assets to the extent such rules become more stringent would tend to increase the cost and/or reduce the availability of third-party determinations of fair market value. This may in turn increase the costs associated with selling assets or affect their liquidity due to inability to obtain a third-party determination of fair market value.

ASC 740 — Accounting Changes; Effect on NAV. Pursuant to FASB ASC 740, formerly known as FIN 48 ("ASC 740"), which provides guidance for how uncertain tax positions should be recognized, measured, presented and disclosed in financial statements, the Fund is required to determine whether a tax position, based on its technical merits, meets a more-likely-than-not recognition threshold that the position will be sustained upon examination. As a result of such a determination, the Fund may be required to recognize a contingent tax liability in its NAV calculation if the related tax position meets the recognition criterion in ASC 740 and, conversely, may be required to unrecognize a contingent tax liability in its NAV calculation if the related tax position does not meet the recognition criterion in ASC 740. In addition, the NAV of the Fund may be adjusted if an uncertain tax position is settled. Recognition and measurement of each tax position, including any tax position for which there is a lack of authority and audit experience, is determined by the Board, in its sole discretion, based on discussions with the Advisers, tax advisers and the auditor and based on the facts and circumstances known at the time. There can be no assurance that any such determination will not change over time. Adjustments made to the NAV of the Fund in connection with the recognition or unrecognition of contingent tax liabilities may have a material positive or negative effect on certain Shareholders and prospective investors, depending on the circumstances.

Non-Diversification Risk. The Fund is classified as "non-diversified" under the 1940 Act. As a result, it can invest a greater portion of its assets in obligations of a single issuer than a "diversified" fund. The

Fund may therefore be more susceptible than a diversified fund to being adversely affected by any single corporate, economic, political or regulatory occurrence.

Risks Relating to the Fund's RIC Status. To qualify and remain eligible for the special tax treatment accorded to RICs and their shareholders under the Code, the Fund must, among other things, meet certain source-of-income, asset diversification and annual distribution requirements. Very generally, in order to qualify as a RIC, the Fund must derive at least 90% of its gross income for each tax year from dividends, interest, payments with respect to certain securities loans, gains from the sale or other disposition of stock, securities or foreign currencies, other income derived with respect to its business of investing in stock or other securities, or net income from “qualified publicly traded partnerships” (as defined in the Code). The Fund must also meet certain asset diversification requirements at the end of each quarter of each of its tax years. As a result of these diversification requirements, the Fund may have to dispose of certain investments quickly in order to prevent the loss of RIC status. Any such dispositions could be made at disadvantageous prices or times, and may result in substantial losses to the Fund. In addition, in order to be eligible for the special tax treatment accorded RICs, the Fund must meet the annual distribution requirement, requiring it to distribute with respect to each tax year at least 90% of the sum of its “investment company taxable income” (generally its taxable ordinary income and the excess, if any, of its net short-term capital gains over its net long-term capital losses) and its net tax-exempt income (if any), to Shareholders. If the Fund fails to qualify for taxation as a RIC for any reason, it would be subject to regular corporate-level U.S. federal income taxes on all of its taxable income and gains, and the resulting corporate taxes could substantially reduce its net assets, the amount of income available for distribution and the amount of its distributions. Such a failure would have a material adverse effect on the Fund and Shareholders. In addition, the Fund could be required to recognize unrealized gains, pay substantial taxes and interest and make substantial distributions in order to re-qualify as a RIC.

RIC-Related Risks of Investments Generating Non-Cash Taxable Income. Certain of the Fund's investments may require the Fund to recognize taxable income in a tax year in excess of the cash generated on those investments during that year. In particular, the Fund may invest in loans and other debt obligations that will be treated as having “market discount” and/or original issue discount (“OID”) for U.S. federal income tax purposes. Because the Fund may be required to recognize income in respect of these investments before, or without receiving, cash representing such income, the Fund may have difficulty satisfying the annual distribution requirements applicable to RICs and avoiding Fund-level U.S. federal income or excise taxes. Accordingly, the Fund may be required to sell assets, including at potentially disadvantageous times or prices, raise additional debt or equity capital, make taxable distributions of Shares or debt securities, or reduce new investments, to obtain the cash needed to make these distributions. If the Fund liquidates assets to raise cash, the Fund may realize gain or loss on such liquidations, which may further increase the amount that the Fund must distribute to maintain RIC status or avoid Fund-level U.S. federal income or excise taxes.

Instruments that are treated as having OID for U.S. federal income tax purposes may have unreliable valuations because their continuing accruals require judgments about the collectability of the deferred payments and the value of any collateral. Loans that are treated as having OID generally represent a significantly higher credit risk than coupon loans. Accruals on such instruments may create uncertainty about the source of Fund distributions to Shareholders. OID creates the risk of non-refundable cash payments to Destra based on accruals that may never be realized. In addition, the deferral of paid-in-kind (“PIK”) interest also reduces a loan's loan-to-value ratio at a compounding rate.

Uncertain Tax Treatment. The Fund may invest a portion of its net assets in below investment grade instruments. Investments in these types of instruments may present special tax issues for the Fund. U.S. federal income tax rules are not entirely clear about issues such as when the Fund may cease to accrue interest, OID or market discount, when and to what extent deductions may be taken for bad debts or worthless instruments, how payments received on obligations in default should be allocated between principal and income and whether exchanges of debt obligations in a bankruptcy or workout context are taxable. These and other issues will be addressed by the Fund to the extent necessary in order to seek to ensure that it distributes sufficient income so that it does not become subject to U.S. federal income or excise tax.

MANAGEMENT OF THE FUND

General

Under the Fund's Declaration of Trust and bylaws, the Fund's business and affairs are managed under the direction of the Board, which has overall responsibility for monitoring and overseeing the Fund's management and operations. The Board consists of four members, three of whom are considered Independent Trustees. The Trustees are subject to removal or replacement in accordance with the laws of the State of Delaware ("Delaware law") and the Fund's Declaration of Trust. The Trustees serving on the Board were elected by the organizational Shareholders of the Fund. The Statement of Additional Information provides additional information about the Trustees.

Destra, located at 444 West Lake Street, Suite 1700, Chicago, IL, serves as the Fund's investment adviser pursuant to the terms of the Investment Management Agreement and subject to the authority of, and any policies established by, the Board. Under the Investment Management Agreement, Destra manages the Fund's investment portfolio, directs and/or oversees the investment and allocation of the portfolio and reports thereon to the Fund's officers and Trustees regularly. Destra has engaged Validus to act as the Fund's investment sub-adviser and make investment decisions for the Fund's portfolio, subject to Destra's oversight.

The Board, including a majority of the Independent Trustees, oversees and monitors the Fund's investment performance and, beginning with the second anniversary of the effective date of the Investment Management Agreement, reviews annually the Investment Management Agreement and the Sub-Advisory Agreement to determine, among other things, whether the fees payable under such agreements are reasonable in light of the services provided.

Investment Personnel

The portfolio managers primarily responsible for the day-to-day management of the Fund are Aaron Rosen and Mark C. Scalzo, each employees of Validus. The portfolio managers are not employed by the Fund and receive no direct compensation from the Fund in connection with their portfolio management activities. The portfolio managers' management of the Fund is subject to Destra's oversight. See "Management Fee" for additional information regarding the compensation payable to Destra and Validus.

Below is biographical information of the members of Validus who serve as the portfolio managers of the Fund:

Aaron Rosen — Co-Portfolio Manager — Mr. Rosen is the Fund's Co-Portfolio Manager and serves as the Sub-Adviser's Portfolio Manager and Managing Director. Mr. Rosen has been employed by the Sub-Adviser since November 2014, has served the Fund as Co-Portfolio Manager since October 2017, and is responsible for portfolio management and security selection, as well as due diligence, research, valuation, and sourcing of investments. Mr. Rosen also served as the Assistant Portfolio Manager for the Fund from January 2016 until October 2017, and Director of Due Diligence for Lucia Securities, LLC from November 2014 to September 2016. Prior to joining the Sub-Adviser, Mr. Rosen served as Senior Alternative Investment Analyst for AIG Advisor Group, focusing specifically on illiquid alternatives. Before that, Mr. Rosen served as the Senior Analyst for Irongate Capital Management, LLC, where he provided an extensive range of investment management services, including research and allocation decisions on investments for a family office. Mr. Rosen graduated magna cum laude from Honors Program of Boston University with a BSBA in Finance and a minor in Economics. He holds the Series 7, 63 and 66 licenses, and he holds the Chartered Financial Analyst (CFA) designation from the CFA Institute. Mr. Rosen was elected to the 2017-2021 Editorial Advisory Board of Real Assets Adviser magazine, and is a member of Mensa.

Mark C. Scalzo — Co-Portfolio Manager — Mr. Scalzo, Chief Investment Officer of the Sub-Adviser, is the Fund's Co-Portfolio Manager. Mr. Scalzo has been employed by the Sub-Adviser since November 2012, has served the Fund as a Portfolio Manager since March 2015 and is responsible for investment management, investment strategy creation, and security-specific research. Mr. Scalzo founded Validus in 2012 and serves as its Managing Partner. From June 2014 to July 2020, Mr. Scalzo was also the Chief Investment Officer of Validus' affiliated registered investment adviser, Pinhook. Prior to joining the Sub-Adviser, Mr. Scalzo was Executive Vice President, Co-Portfolio Manager and Director of Research,

from November 2008 to October 2012, for Aletheia Research & Management. Prior to that, he served as Group Vice President, Mergers & Acquisitions, for Fisher Asset Management, LLC, a registered investment adviser. Mr. Scalzo graduated cum laude from The Wharton School at the University of Pennsylvania with a B.S. in Economics. Mr. Scalzo is Series 7, Series 24, Series 65 and Series 79 licensed.

The Fund's Statement of Additional Information provides additional information about the portfolio managers' compensation, other accounts managed, and ownership of the Fund's shares.

Control Persons and Principal Holders of Securities

A control person generally is a person who beneficially owns more than 25% of the voting securities of a company or has the power to exercise control over the management or policies of such company. As of June 1, 2021, LPL Financial is deemed to control the Fund because it had voting authority with respect to more than 25% of the value of the outstanding interests in the Fund on such date.

Administrative Services

The Fund has retained the Administrator, UMB Fund Services, Inc., ("UMBFS" or the "Administrator") located at 235 West Galena Street, Milwaukee, WI 53212, to provide administrative services, provide accounting services, serve as the Fund's distribution paying agent, transfer agent, registrar and to assist with operational needs. UMBFS provides such services to the Fund pursuant to a fund services agreement between the Fund and the UMBFS (the "Fund Services Agreement"). The Administrator is responsible directly or through its agents for, among other things, providing the following services to each of the Fund; (1) maintaining a list of Shareholders and generally performing all actions related to the issuance and repurchase of Shares of the Fund, if any, including delivery of trade confirmations and capital statements; (2) providing certain administrative, clerical and bookkeeping services; (3) providing transfer agency services, services related to the payment of distributions, and accounting services; (4) computing the NAV of the Fund in accordance with U.S. generally accepted accounting principles ("GAAP") and procedures defined in consultation with Destra; (5) overseeing the preparation of semi-annual and annual financial statements of the Fund in accordance with GAAP, quarterly reports of the operations of the Fund and information required for tax returns; (6) supervising regulatory compliance matters and preparing certain regulatory filings; and (7) performing additional services, as agreed upon, in connection with the administration of the Fund. The Administrator may from time to time delegate its responsibilities under the Administration Agreement to one or more parties selected by the Administrator, including its affiliates or affiliates of the Advisers.

In consideration for these services, the Fund pays the Administrator a minimum monthly administration fee of \$5,750, or \$69,000 on an annualized basis (the "Administration Fee"). The Administration Fee is paid to the Administrator out of the assets of the Fund and therefore decreases the net profits or increases the net losses of the Fund. The Administrator is also reimbursed by the Fund for out-of-pocket expenses relating to services provided to the Fund, and receives a fee for transfer agency services, fund accounting and tax services. The Administration Fee and the other terms of the Administration Agreement may change from time to time as may be agreed to by the Fund and the Administrator.

The Administration Agreement provides that, in the absence of bad faith, gross negligence, fraud or willful misconduct in the performance of its duties and obligations under the Administration Agreement, the Administrator will not be liable to the Fund for any error of judgment, for any mistake of law or for any act or omission in connection with the performance of administration services for the Fund. The Administration Agreement also provides for indemnification of the Administrator against any liability or expense to which the person may be liable that arises in connection with the performance of services to the Fund, so long as the liability or expense is not incurred by reason of the Administrator's bad faith, gross negligence, fraud, reckless disregard or willful misconduct in the performance of its duties to the Fund.

Custodian

UMB Bank, N.A., with principal offices at 928 Grand Boulevard, Kansas City, MO 64106, serves as custodian for the Fund.

FUND EXPENSES

The Fund will pay all of its expenses, or reimburse the Advisers or their affiliates to the extent they have previously paid such expenses on behalf of the Fund. The expenses of the Fund include, but are not limited to, any fees and expenses in connection with the offering and issuance of Shares; all fees and expenses reasonably incurred in connection with the operation of the Fund; all fees and expenses directly related to portfolio transactions and positions for the Fund's account such as direct and indirect expenses associated with the Fund's investments, and enforcing the Fund's rights in respect of such investments; quotation or valuation expenses; the Management Fee and the Administration Fee; brokerage commissions; interest and fees on any borrowings by the Fund; professional fees; research expenses (including, without limitation, expenses of consultants who perform fund manager due diligence research); fees and expenses of outside legal counsel (including fees and expenses associated with the review of documentation for prospective investments by the Fund), including foreign legal counsel; accounting, auditing and tax preparation expenses; fees and expenses in connection with repurchase offers and any repurchases or redemptions of Shares; taxes and governmental fees (including tax preparation fees); fees and expenses of any custodian, subcustodian, transfer agent, and registrar, and any other agent of the Fund; all costs and charges for equipment or services used in communicating information regarding the Fund's transactions with any custodian or other agent engaged by the Fund; bank services fees; costs and expenses relating to any amendment of the Declaration of Trust or other organizational documents of the Fund; expenses of preparing, amending, printing, and distributing the Prospectus and any other sales material (and any supplements or amendments thereto), reports, notices, other communications to Shareholders, and proxy materials; expenses of preparing, printing, and filing reports and other documents with government agencies; expenses of Shareholders' meetings, including the solicitation of proxies in connection therewith; expenses of corporate data processing and related services; shareholder recordkeeping and account services, fees, and disbursements; expenses relating to investor and public relations; fees and expenses of the members of the Board who are not employees of the Advisers or their affiliates; insurance premiums; Extraordinary Expenses (as defined below); and all costs and expenses incurred as a result of dissolution, winding-up and termination of the Fund. The Fund may need to sell portfolio securities to pay fees and expenses, which could cause the Fund to realize taxable gains.

"Extraordinary Expenses" means all expenses incurred by the Fund outside of the ordinary course of its business, including, without limitation, costs incurred in connection with any claim, litigation, arbitration, mediation, government investigation or dispute and the amount of any judgment or settlement paid in connection therewith, or the enforcement of the rights against any person or entity; costs and expenses for indemnification or contribution payable to any person or entity; expenses of a reorganization, restructuring or merger, as applicable; expenses of holding, or soliciting proxies for, a meeting of shareholders (except to the extent relating to items customarily addressed at an annual meeting of a registered closed-end management investment company); and the expenses of engaging a new administrator, custodian, transfer agent or escrow agent.

Class A Shares, Class T Shares and Class C Shares are subject to a monthly shareholder servicing fee at an annual rate of up to 0.25% of the average daily net assets of the Fund attributable to the respective share class. Class T Shares and Class C Shares pay a Distribution Fee that accrues at an annual rate equal to 0.50% for Class T Shares and 0.75% for Class C Shares of the Fund's average daily net assets attributable to the applicable class of Shares and is payable on a monthly basis. Class I shares are not subject to monthly shareholder servicing fees or a Distribution Fee.

The Advisers will bear all of their expenses and costs incurred in providing investment advisory services to the Fund, including travel and other expenses related to the selection and monitoring of investments. In addition, the Advisers are responsible for the payment of the compensation and expenses of those officers of the Fund affiliated with the Advisers, and making available, without expense to the Fund, the services of such individuals, subject to their individual consent to serve and to any limitations imposed by law.

The Fund will bear directly certain ongoing offering costs associated with any periodic offers of Shares which will be expensed as they are incurred. Offering costs cannot be deducted by the Fund or the Shareholders.

The Fund's fees and expenses will decrease the net profits or increase the net losses of the Fund that are credited to Shareholders.

Destra and the Fund have entered into the Expense Limitation Agreement under which, until November 30, 2022, Destra has agreed to reduce its fees and/or absorb expenses of the Fund to ensure that total fund operating expenses after fee waiver and/or reimbursement (excluding any front-end or contingent deferred loads, brokerage fees and commissions, acquired fund fees and expenses, fees and expenses associated with instruments in other collective investment vehicles or derivative instruments (including, for example, options and swap fees and expenses), borrowing costs (such as interest and dividend expense on securities sold short), taxes and extraordinary expenses, such as litigation expenses (which may include indemnification of Fund officers and Trustees and contractual indemnification of Fund service providers (other than the Adviser)) will not exceed 1.95% of Class A Shares' net assets, 2.45% of Class T Shares' net assets, 2.70% of Class C Shares' net assets, and 1.70% of Class I Shares' net assets (the "Expense Limitation"). In consideration of Destra's agreement to limit the Fund's expenses, the Fund has agreed to repay Destra pro rata in the amount of any Fund expense paid or waived by Destra, subject to the limitations that: (1) the reimbursement for expenses will be made only if payable not more than three years following the date such payment or waiver was made; and (2) the reimbursement may not be made if it would cause the Fund's then-current Expense Limitation, if any, and the Expense Limitation that was in effect at the time when Destra reimbursed, paid or absorbed the ordinary operating expenses that are the subject of the repayment, to be exceeded. The Expense Limitation agreement may be terminated before November 30, 2022 only by the Fund's Board of Trustees, on 60 days' written notice to the Adviser.

Offering Costs

The Fund, either directly or through reimbursement to Destra or its affiliates, is responsible for its offering costs. Offering costs primarily include legal, accounting, printing and other expenses relating to this Offering, including costs associated with technology integration between the Fund's systems and those of its distribution partners, marketing expenses, salaries and direct expenses of the Advisers' personnel, employees of their affiliates and others while engaged in registering and marketing the Shares, including the development of marketing materials and presentations, training and educational meetings, and generally coordinating the marketing process for the Fund. The Offering costs cannot be deducted by the Fund or the Fund's shareholders. Therefore, for tax purposes, the expenses incident to the Offering and issuance of shares will be recorded as a reduction of capital of the Fund attributable to the shares.

MANAGEMENT FEES

Management Fee

Under the Investment Management Agreement, Destra is entitled to a Management Fee, calculated and payable monthly in arrears, at the annual rate of 1.35% of the Fund's average daily net assets during such period.

The Sub-Advisory Agreement provides that Validus is entitled to receive an annual sub-advisory fee from Destra equal to 50% of the net revenue received by Destra after any fee waivers, subject to a maximum sub-advisory fee of 0.675% of the Fund's average daily net assets. Validus is paid by Destra out of the Management Fee Destra is paid by the Fund. Pinhook served as the investment sub-adviser to the Fund until August 3, 2020.

Investment Management Agreement and Sub-Advisory Agreement

The Investment Management Agreement and Sub-Advisory Agreement were approved by the Board and the Fund's Shareholders and became effective February 11, 2021, and will continue in effect for a period of two years from its effective date. Thereafter, the Investment Management Agreement will continue in effect from year to year provided such continuance is specifically approved at least annually by (i) the vote of a majority of the outstanding voting securities of the Fund or a majority of the Board, and (ii) the vote of a majority of the Independent Trustees of the Fund, cast in person at a meeting called for the purpose of voting on such approval. Such approvals were made in accordance with, and on the basis of an evaluation satisfactory to the Board as required by, Section 15(c) of the 1940 Act and the applicable rules and regulations

thereunder. A discussion regarding the basis for the approval of the Investment Management Agreement is available in the Fund's annual report to Shareholders for the fiscal year ended February 28, 2021 and a discussion regarding the Sub-Advisory Agreement will be available in the Fund's semi-annual report to Shareholders for the fiscal period ending August 31, 2021.

The Investment Management Agreement may be terminated at any time, without the payment of any penalty, upon 60 days' written notice by Destra or, if the Board or the holders of a majority of the Fund's outstanding voting securities determine that the Investment Management Agreement with Destra should be terminated, by the Fund. The Investment Management Agreement will automatically terminate in the event of its assignment (as such term is defined for purposes of Section 15(a)(4) of the 1940 Act).

The Sub-Advisory Agreement may be terminated at any time, without the payment of any penalty, upon 60 days' written notice by Validus or, if the Board or the holders of a majority of the Fund's outstanding voting securities determine that the Sub-Advisory Agreement with Validus should be terminated. The Sub-Advisory Agreement will automatically terminate in the event of its assignment (as such term is defined for purposes of Section 15(a)(4) of the 1940 Act) or the termination of the Investment Management Agreement.

DETERMINATION OF NET ASSET VALUE

The Fund determines the NAV of Shares on each day that the NYSE is open for business as of the close of the regular trading session. Each Class A Share and Class T Share will be offered at NAV plus the applicable Sales Load, and each Class I Share and Class C Share will be offered at NAV. The Fund calculates NAV per Share on a class-specific basis. The NAV of a class of Shares depends on the number of shares of the applicable class outstanding at the time the NAV of the applicable share class is determined. As such, the NAV of each class of Shares may vary if the Fund sells different amounts of Shares per class. The Fund's assets and liabilities are valued in accordance with the principles set forth below.

Destra values the Fund's assets in good faith pursuant to the Fund's valuation policy and consistently applied valuation process, which was approved by the Board. Portfolio securities and other assets for which market quotes are readily available are valued at market value or NAV in the case of mutual funds. In circumstances where market quotes are not readily available, the Board has adopted methods for determining the fair value of such securities and other assets, and has delegated the responsibility for applying the valuation methods to Destra. On a quarterly basis, the Board reviews the valuation determinations made with respect to the Fund's investments during the preceding quarter and evaluates whether such determinations were made in a manner consistent with the Fund's valuation process.

Accounting Standards Codification Topic 820, *Fair Value Measurements and Disclosure* ("ASC Topic 820"), issued by the Financial Accounting Standards Board, clarifies the definition of fair value and requires companies to expand their disclosure about the use of fair value to measure assets and liabilities in interim and annual periods subsequent to initial recognition. ASC Topic 820 defines fair value as the price that would be received from the sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. ASC Topic 820 also establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers include: Level 1, defined as observable inputs such as quoted prices in active markets; Level 2, which includes inputs such as quoted prices for similar securities in active markets and quoted prices for identical securities where there is little or no activity in the market; and Level 3, defined as unobservable inputs for which little or no market data exists, therefore requiring an entity to develop its own assumptions.

When determining the fair value of an asset, Destra seeks to determine the price that would be received from the sale of the asset in an orderly transaction between market participants at the measurement date, in accordance with ASC Topic 820. Fair value determinations are based upon all available inputs that Destra deems relevant, with input from the Sub-Adviser, which may include indicative dealer quotes, values of like securities, recent portfolio company financial statements and forecasts, and valuations prepared by third-party valuation services. However, determination of fair value involves subjective judgments and estimates. Accordingly, the notes to the Fund's financial statements refer to the uncertainty with respect to the possible effect of such valuations and any change in such valuations on the Fund's financial statements.

For purposes of calculating NAV, Destra uses the following valuation methods:

In determining net asset value, portfolio instruments generally are valued using prices provided by independent pricing services or obtained from other sources, such as broker-dealer quotations. Exchange-traded instruments generally are valued at the last reported sales price or official closing price on an exchange, if available. Independent pricing services typically value non-exchange-traded instruments utilizing a range of market-based inputs and assumptions, including readily available market quotations obtained from broker-dealers making markets in such instruments, cash flows, and transactions for comparable instruments. In pricing certain instruments, the pricing services may consider information about an instrument's issuer or market activity provided by the Fund's Sub-Adviser. Non-U.S. securities and currency are valued in U.S. dollars based on non-U.S. currency exchange rate quotations supplied by an independent quotation service.

For non-U.S. traded securities whose principal local markets close before the close of the NYSE, the Fund may adjust the local closing price based upon such factors as developments in non-U.S. markets, the performance of U.S. securities markets and the performance of instruments trading in U.S. markets that represent non-U.S. securities. The Fund may rely on an independent fair valuation service in making any such fair value determinations. If the Fund holds portfolio instruments that are primarily listed on non-U.S.

exchanges, the value of such instruments may change on days when shareholders will not be able to purchase or redeem the Fund's shares.

In certain situations, Destra, with input from Validus, may use the fair value of a portfolio instrument if such portfolio instrument is not priced by a pricing service, if the pricing service's price is deemed unreliable or if events occur after the close of a securities market (usually a foreign market) and before the Fund values its assets that would materially affect NAV. A portfolio instrument that is fair valued may be valued at a price higher or lower than actual market quotations or the value determined by other funds using their own fair valuation procedures. Because non-U.S. portfolio instruments may trade on days when Fund shares are not priced, the value of portfolio instruments held by the Fund can change on days when Fund shares cannot be redeemed. Destra expects to use fair value pricing primarily when a portfolio instrument is not priced by a pricing service or a pricing service's price is deemed unreliable.

Due to the subjective nature of fair value pricing, the Fund's value for a particular portfolio instrument may be different from the last price determined by the pricing service or the last bid or ask price in the market.

Other portfolio instruments held by the Fund are generally valued at market value. Certain short-term instruments maturing within 60 days or less are valued at amortized cost, which approximates market value. The value of the securities of other open-end funds held by the Fund, if any, will be calculated using the NAV of such open-end funds, and the prospectuses for such open-end funds explain the circumstances under which they use fair value pricing and the effects of using fair value pricing.

Below is a description of factors that may be considered when valuing securities for which no active secondary market exists.

Valuation of fixed income investments, such as loans and debt securities, depends upon a number of factors, including prevailing interest rates for like securities, expected volatility in future interest rates, call features, put features and other relevant terms of the debt. For investments without readily available market prices, these factors may be incorporated into discounted cash flow models to arrive at fair value. Other factors that may be considered include the borrower's ability to adequately service its debt, the fair market value of the portfolio company in relation to the face amount of its outstanding debt and the quality of the collateral securing its debt investments.

For convertible debt securities, fair value will generally approximate the fair value of the debt plus the fair value of an option to purchase the underlying security (the security into which the debt may convert) at the conversion price. To value such an option, a standard option pricing model may be used.

For equity interests, various factors may be considered in determining fair value, including but not limited to multiples of earnings before interest, taxes, depreciation and amortization ("EBITDA"), cash flows, net income, revenues or, in limited instances, book value or liquidation value. All of these factors may be subject to adjustments based upon the particular circumstances of a portfolio company or the Fund's actual investment position. For example, adjustments to EBITDA may take into account compensation to previous owners or an acquisition, recapitalization, restructuring or other related items.

Other factors that may be considered in valuing securities include private merger and acquisition statistics, public trading multiples discounted for illiquidity and other factors, valuations implied by third-party investments in the portfolio companies, the acquisition price of such investment or industry practices in determining fair value. Destra may also consider the size and scope of a portfolio company and its specific strengths and weaknesses, and may apply discounts or premiums, where and as appropriate, due to the higher (or lower) financial risk and/ or the size of the portfolio company relative to comparable firms, as well as such other factors as Destra, in consultation with any third-party valuation or pricing service, if applicable, may consider relevant in assessing fair value.

If the Fund receives warrants or other equity securities at nominal or no additional cost in connection with an investment in a debt security, the cost basis in the investment will be allocated between the debt securities and any such warrants or other equity securities received at the time of origination. Such warrants or other equity securities will subsequently be valued at fair value.

Portfolio securities that carry certain restrictions on sale will typically be valued at a discount from the public market value of the security, where applicable.

If events materially affecting the price of foreign portfolio securities occur between the time when their price was last determined on such foreign securities exchange or market and the time when the Fund's NAV was last calculated (for example, movements in certain U.S. securities indices which demonstrate strong correlation to movements in certain foreign securities markets), such securities may be valued at their fair value as determined in good faith in accordance with procedures established by the Board. For purposes of calculating NAV, all assets and liabilities initially expressed in foreign currencies will be converted into U.S. dollars at prevailing exchange rates as may be determined in good faith by Destra, under the supervision of the Board.

Swaps typically will be valued using valuations provided by a third-party pricing service. Such pricing service valuations generally will be based on the present value of fixed and projected floating rate cash flows over the term of the swap contract and, in the case of credit default swaps, generally will be based on credit spread quotations obtained from broker-dealers and expected default recovery rates determined by the third-party pricing service using proprietary models. Future cash flows will be discounted to their present value using swap rates provided by electronic data services or by broker-dealers.

While the Fund's policy is intended to result in a calculation of the Fund's NAV that fairly reflects security values as of the time of pricing, the Fund cannot ensure that fair values determined by Destra would accurately reflect the price that the Fund could obtain for a security if it were to dispose of that security as of the time of pricing (for instance, in a forced or distressed sale). The prices used by the Fund may differ from the value that would be realized if the securities were sold. The Fund will periodically benchmark the bid and ask prices received from the third-party pricing service and/or dealers, as applicable, and valuations received from the third-party valuation service against the actual prices at which it purchases and sells its investments. The Fund believes that these prices will be reliable indicators of fair value.

CONFLICTS OF INTEREST

The Adviser, the Sub-Adviser and the portfolio managers of the Fund have interests which may conflict with the interests of the Fund. In particular, the Adviser and the Sub-Adviser each manages and/or advises other investment funds or accounts with the same or similar investment objective and strategies as the Fund. As a result, the Adviser, the Sub-Adviser and the Fund's portfolio managers may devote unequal time and attention to the management of the Fund and those other funds and accounts, and may not be able to formulate as complete a strategy or identify equally attractive investment opportunities as might be the case if they were to devote substantially more attention to the management of the Fund. The Adviser, the Sub-Adviser and the Fund's portfolio managers may identify a limited investment opportunity that may be suitable for multiple funds and accounts, and the opportunity may be allocated among these several funds and accounts, which may limit the Fund's ability to take full advantage of the investment opportunity. Additionally, transaction orders may be aggregated for multiple accounts for purposes of execution, which may cause the price or brokerage costs to be less favorable to the Fund than if similar transactions were not being executed concurrently for other accounts. Furthermore, it is theoretically possible that a portfolio manager could use the information obtained from managing a fund or account to the advantage of other funds or accounts under management, and also theoretically possible that actions could be taken (or not taken) to the detriment of the Fund. At times, a portfolio manager may determine that an investment opportunity may be appropriate for only some of the funds and accounts for which he or she exercises investment responsibility, or may decide that certain of the funds and accounts should take differing positions with respect to a particular security. In these cases, the portfolio manager may place separate transactions for one or more funds or accounts which may affect the market price of the security or the execution of the transaction, or both, to the detriment or benefit of one or more other funds and accounts. For example, a portfolio manager may determine that it would be in the interest of another account to sell a security that the Fund holds, potentially resulting in a decrease in the market value of the security held by the Fund.

Conflicts potentially limiting the Fund's investment opportunities may also arise when the Fund and other clients of the Adviser or Sub-Adviser invest in, or even conduct research relating to, different parts of an issuer's capital structure. In such circumstances, decisions over whether to trigger an event of default, over the terms of any workout, or how to exit an investment may result in conflicts of interest. In order to minimize such conflicts, a portfolio manager may avoid certain investment opportunities that would potentially give rise to conflicts with other clients of the Adviser or Sub-Adviser (as applicable) or result in

the Adviser or Sub-Adviser receiving material, non-public information, or the Adviser and Sub-Adviser may enact internal procedures designed to minimize such conflicts, which could have the effect of limiting the Fund's investment opportunities. Additionally, if the Adviser or Sub-Adviser acquires material non-public confidential information in connection with its business activities for other clients, a portfolio manager or other investment personnel may be restricted from purchasing securities or selling certain securities for the Fund or other clients.

The portfolio managers also may engage in cross trades between funds and accounts, may select brokers or dealers to execute securities transactions based in part on brokerage and research services provided to the Adviser or the Sub-Adviser which may not benefit all funds and accounts equally and may receive different amounts of financial or other benefits for managing different funds and accounts. Finally, the Adviser, the Sub-Adviser and their affiliates may provide more services to some types of funds and accounts than others.

To address the types of conflicts referred to above, Destra and Validus have adopted policies and procedures under which they will detect, manage or mitigate the conflicts.

ANNUAL REPURCHASES OF SHARES

No Right of Redemption

No Shareholder will have the right to require the Fund to redeem its Shares. No public market exists for the Shares, and none is expected to develop. Consequently, investors will not be able to liquidate their investment other than as a result of repurchases of Shares by the Fund, as described below.

Repurchases of Shares

The Fund operates as an interval fund under Rule 23c-3 of the 1940 Act and, as such, provides a limited degree of liquidity to Shareholders. As an interval fund, the Fund has adopted a fundamental policy to offer to repurchase a specified percentage of its outstanding Shares at the NAV at regular intervals.

Once each year, the Fund will offer to repurchase at NAV no less than 5% and no more than 25% of the outstanding Shares of the Fund, unless such offer is suspended or postponed in accordance with regulatory requirements (as discussed below). The offer to purchase Shares is a fundamental policy that may not be changed without the vote of the holders of a majority of the Fund's outstanding voting securities (as defined in the 1940 Act). Shareholders will be notified in writing of each annual repurchase offer, how they may request that the Fund repurchase their Shares and the date the repurchase offer ends (the "Repurchase Request Deadline"). Shares will be repurchased at the NAV per share determined as of the close of regular trading on the NYSE no later than the 14th day after the Repurchase Request Deadline, or the next business day if the 14th day is not a business day (each a "Repurchase Pricing Date").

Shares tendered for repurchase by Shareholders prior to any Repurchase Request Deadline will be repurchased subject to the aggregate repurchase amounts established for that Repurchase Request Deadline. The time between the notification to Shareholders and the Repurchase Request Deadline may vary from no more than 42 days to no less than 21 days. Payment pursuant to the repurchase will be made by checks to the Shareholder's address of record, or credited directly to a predetermined bank account on the purchase payment date (each a "Purchase Payment Date"), which will be no more than seven days after the Repurchase Pricing Date. The Board may establish other policies for repurchases of Shares that are consistent with the 1940 Act, regulations thereunder and other pertinent laws.

Determination of Repurchase Offer Amount

The Board, or a committee thereof, in its sole discretion, will determine the number of Shares of each Share class that the Fund will offer to repurchase (the "Repurchase Offer Amount") for a given Repurchase Request Deadline. The Repurchase Offer Amount, however, will be no less than 5% and no more than 25% of the total number of Shares outstanding on the Repurchase Request Deadline.

Notice to Shareholders

No less than 21 days and no more than 42 days before each Repurchase Request Deadline, the Fund shall send to each Shareholder of record and to each beneficial owner of Shares that are the subject of the repurchase offer a notification (“Shareholder Notification”). The Shareholder Notification will contain information Shareholders should consider in deciding whether to tender their Shares for repurchase. The notice also will include detailed instructions on how to tender Shares for repurchase, state the Repurchase Offer Amount and identify the dates of the Repurchase Request Deadline, the scheduled Repurchase Pricing Date, and the date the repurchase proceeds are scheduled for payment (the “Repurchase Payment Deadline”). The notice also will set forth the NAV that has been computed no more than seven days before the date of notification, and how Shareholders may ascertain the NAV after the notification date.

Repurchase Price

The repurchase price of the Shares will be the NAV of the respective Share class as of the close of regular trading on the NYSE on the Repurchase Pricing Date. You may call 844-9DESTRA (933-7872) to learn the NAV. The notice of the repurchase offer also will provide information concerning the NAV, such as the NAV as of a recent date or a sampling of recent NAVs, and a toll-free number for information regarding the repurchase offer.

Repurchase Amounts and Payment of Proceeds

Shares tendered for repurchase by Shareholders prior to any Repurchase Request Deadline will be repurchased subject to the aggregate Repurchase Offer Amount established for that Repurchase Request Deadline. Payment pursuant to the repurchase will be made by check to the Shareholder’s address of record, or credited directly to a predetermined bank account on the Purchase Payment Date, which will be no more than seven days after the Repurchase Pricing Date. The Board may establish other policies for repurchases of Shares that are consistent with the 1940 Act, regulations thereunder and other pertinent laws.

If Shareholders tender for repurchase more than the Repurchase Offer Amount for a given repurchase offer, the Fund may, but is not required to, repurchase an additional amount of Shares not to exceed 2.00% of the outstanding Shares of the Fund on the Repurchase Request Deadline. If the Fund determines not to repurchase more than the Repurchase Offer Amount, or if Shareholders tender Shares in an amount exceeding the Repurchase Offer Amount plus 2.00% of the outstanding Shares on the Repurchase Request Deadline, the Fund will repurchase the Shares on a *pro rata* basis. However, the Fund may accept all Shares tendered for repurchase by Shareholders who own less than one hundred Shares and who tender all of their Shares, before prorating other amounts tendered. In addition, the Fund will accept the total number of Shares tendered in connection with required minimum distributions from an IRA or other qualified retirement plan. It is the Shareholder’s obligation to both notify and provide the Fund supporting documentation of a required minimum distribution from an IRA or other qualified retirement plan.

Suspension or Postponement of Repurchase Offer

The Fund may suspend or postpone a repurchase offer only: (a) if making or effecting the repurchase offer would cause the Fund to lose its status as a regulated investment company under the Code; (b) for any period during which the NYSE or any market on which the securities owned by the Fund are principally traded is closed, other than customary weekend and holiday closings, or during which trading in such market is restricted; (c) for any period during which an emergency exists as a result of which disposal by the Fund of securities owned by it is not reasonably practicable, or during which it is not reasonably practicable for the Fund fairly to determine the value of its net assets; or (d) for such other periods as the Commission may by order permit for the protection of Shareholders of the Fund.

Liquidity Requirements

The Fund must maintain liquid assets equal to the Repurchase Offer Amount from the time that the notice is sent to Shareholders until the Repurchase Pricing Date. The Fund will ensure that a percentage of its net assets equal to at least 100% of the Repurchase Offer Amount consists of assets (including cash and borrowings) that can be sold or disposed of in the ordinary course of business at approximately the price

at which the Fund has valued the investment within the time period between the Repurchase Request Deadline and the Repurchase Payment Deadline. The Board has adopted procedures that are reasonably designed to ensure that the Fund's assets are sufficiently liquid so that the Fund can comply with the repurchase offer and the liquidity requirements described in the previous paragraph. If, at any time, the Fund falls out of compliance with these liquidity requirements, the Board will take whatever action it deems appropriate to ensure compliance.

Consequences of Repurchase Offers

Repurchase offers will typically be funded from available cash or sales of portfolio securities. Payment for repurchased Shares, however, may require the Fund to liquidate portfolio holdings earlier than Destra otherwise would, thus increasing the Fund's portfolio turnover and potentially causing the Fund to realize losses. Destra intends to take measures to attempt to avoid or minimize such potential losses and turnover, and instead of liquidating portfolio holdings, may borrow money to finance repurchases of Shares. If the Fund borrows to finance repurchases, interest on that borrowing will negatively affect Shareholders who do not tender their Shares in a repurchase offer by increasing the Fund's expenses and reducing any net investment income. To the extent the Fund finances repurchase amounts by selling Fund investments, the Fund may hold a larger proportion of its assets in less liquid securities. The sale of portfolio securities to fund repurchases also could reduce the market price of those underlying securities, which in turn would reduce the Fund's NAV.

Repurchase of the Fund's Shares will tend to reduce the amount of outstanding Shares and, depending upon the Fund's investment performance, its net assets. A reduction in the Fund's net assets would increase the Fund's expense ratio, to the extent that additional Shares are not sold, and expenses otherwise remain the same (or increase). In addition, the repurchase of Shares by the Fund will be a taxable event to Shareholders.

The Fund is intended as a long-term investment. The Fund's annual repurchase offers are a Shareholder's only means of liquidity with respect to his or her Shares. Shareholders have no rights to redeem or transfer their Shares. No secondary market is expected to develop for the Fund's Shares unless the Shares are listed on a securities exchange, if at all.

DESCRIPTION OF CAPITAL STRUCTURE AND SHARES

The following description is based on relevant portions of the Delaware Statutory Trust Act and on the Fund's Amended and Restated Agreement and Declaration of Trust and bylaws. This summary is not intended to be complete. Please refer to the Delaware Statutory Trust Act and the Fund's Declaration of Trust and bylaws, copies of which are filed with the books and records of the Fund, for a more detailed description of the provisions summarized below.

Shares of Beneficial Interest

The Fund is authorized to issue an unlimited number of shares of beneficial interest, par value \$0.001 per share. The Fund's Declaration of Trust permits the Board to classify or reclassify any of the Fund's unissued Shares into one or more classes or series by setting or changing the preferences, conversion or other rights, voting powers, limitations as to dividends, or terms or conditions of redemption of each class or series of Shares. A majority of the Board, without action by the Fund's Shareholders, may amend the Fund's Declaration of Trust from time to time to increase or decrease the aggregate number of Shares or may increase or decrease the number of Shares of any class or series that the Fund has authority to issue; provided, that any such amendment or Board action may not change the preferences, conversion or other rights, voting powers, limitations as to dividends, or terms or conditions of redemption of any issued and outstanding Shares.

The Fund offers four classes of Shares: Class I Shares, Class A Shares, Class T Shares and Class C Shares.

The Fund has been granted exemptive relief by the SEC permitting the Fund to offer multiple classes of Shares. An investment in any Share class of the Fund represents an investment in the same assets of the

Fund. However, the minimum investment amounts, sales loads, and ongoing fees and expenses for each Share class are different. The fees and expenses for the Fund are set forth in “Summary of Fees and Expenses.” The details of each Share class are set forth in “Distribution of Shares.”

There is currently no market for the Shares, including Class I Shares, Class A Shares, Class T Shares and Class C Shares. Pursuant to the Fund’s Declaration of Trust and as permitted by Delaware law, Shareholders generally will not be personally liable for the Fund’s debts or obligations.

Set forth below is a chart describing the classes of the Fund’s securities outstanding as of June 1, 2021:

(1) Title of Class	(2) Amount Authorized	(3) Amount Held by the Fund or for its Account	(4) Amount Outstanding Exclusive of Amount Under Column (3)
Class I Shares	Unlimited*	None	2,813,083
Class A Shares	Unlimited*	None	5,228,373
Class T Shares	Unlimited*	None	274,621
Class C Shares	Unlimited*	None	810,465

* subject to a \$5 billion limit on the Fund

Common Shares. Under the terms of the Fund’s Declaration of Trust, all issued Shares will be fully paid and non-assessable. Distributions may be paid to the holders of the Fund’s Class I Shares, Class A Shares, Class T Shares and Class C Shares (which shall be done pro rata among the Shareholders of a specific class) at the same time and in different per share amounts on such Class I Shares, Class A Shares, Class T Shares and Class C Shares if, as and when authorized and declared by the Board. Each class of Shares shall represent beneficial interests in all of the Fund’s assets and shall have the same preferences, conversion and other rights, voting powers, restrictions, limitations as to dividends, qualifications and terms and conditions of redemption (if any) as each other class of Shares except for such differences as are set forth in the Fund’s Declaration of Trust or any resolution of the Board. Except as may be provided by the Board in setting the terms of classified or reclassified Shares, Shares will have no preference, preemptive, appraisal, conversion, exchange or redemption rights, and will be freely transferable, except where their transfer is restricted by law or contract. The Fund’s Declaration of Trust provides that the Board shall have the power to repurchase or redeem Shares. In addition, the Shares are not subject to any mandatory redemption obligations by the Fund. In the event of the Fund’s liquidation, dissolution or winding up, each share of a class of Shares would be entitled to be paid, out of the Fund’s assets that are legally available for distribution to the Shareholders after the Fund pays or makes reasonable provision for the payment of all claims and obligations and subject to any preferential rights of holders of the Fund’s preferred shares, if any preferred shares are outstanding at such time, a liquidation payment equal to the NAV per share of such class; provided, however, that if the Fund’s available assets are insufficient to pay in full the above described liquidation payment, then such assets, or the proceeds thereof, shall be distributed among the holders of Shares of each class of Shares ratably in the same proportion as the respective amounts that would be payable on such Shares of each class of Shares if all amounts payable thereon were paid in full. Class I Shares, Class A Shares, Class T Shares and Class C Shares will vote together as a single class, and each Share will be entitled to one vote on all matters submitted to a vote of Shareholders, including the election of trustees, and subject to the express terms of any class or series of preferred shares, Shareholders shall have the exclusive right to vote on all matters as to which a Shareholder is entitled to vote pursuant to applicable law at all meetings of Shareholders; provided, however, that the holders of a class of Shares will have (i) exclusive voting rights on any matter that affects only the interests of such class of Shares, and (ii) voting rights as set forth in Rule 18f-3(a)(2)-(3) promulgated under the 1940 Act. There will be no cumulative voting in the election of trustees or on any other matter. Under the Fund’s Declaration of Trust, the Fund is not required to hold annual meetings of Shareholders. The Fund only expects to hold Shareholder meetings to the extent required by the 1940 Act or pursuant to special meetings called by the Board or a majority of Shareholders, or in the future in compliance with the requirements of any exchange on which Shares may be listed in the future.

Preferred Shares and Other Securities. The Fund’s Declaration of Trust provides that the Board may, subject to the Fund’s investment policies and restrictions and the requirements of the 1940 Act, authorize

and cause the Fund to issue securities of the Fund other than Shares (including preferred shares, debt securities or other senior securities), by action of the Board without the approval of Shareholders. The Board may determine the terms, rights, preferences, privileges, limitations and restrictions of such securities as the Board sees fit.

Preferred shares could be issued with rights and preferences that would adversely affect Shareholders. Preferred shares could also be used as an anti-takeover device. Every issuance of preferred shares will be required to comply with the requirements of the 1940 Act. The 1940 Act requires, among other things, that (i) immediately after issuance and before any distribution is made with respect to the shares and before any purchase of shares is made, the total asset value of the Fund's portfolio is at least 200% of the liquidation value of the outstanding preferred shares, and (ii) the holders of preferred shares, if any are issued, must be entitled as a class to elect two Trustees at all times and to elect a majority of the Trustees if distributions on such preferred shares are in arrears by two years or more. Certain matters under the 1940 Act require the separate vote of the holders of any issued and outstanding preferred shares.

Limitation on Liability of Trustees and Officers; Indemnification and Advance of Expenses

Under the Fund's Declaration of Trust, Trustees and officers of the Fund will not be subject in such capacity to any personal liability to the Fund or Shareholders, unless the liability arises from bad faith, willful misfeasance, gross negligence or reckless disregard for the Trustee's or officer's duty.

Except as otherwise provided in the Fund's Declaration of Trust, the Fund will indemnify and hold harmless any current or former Trustee or officer of the Fund against any liabilities and expenses (including amounts paid in satisfaction of judgments, in compromise, as fines and penalties, and expenses including reasonable accountants' and counsel fees), while and with respect to acting in the capacity of a Trustee or officer of the Fund, except with respect to matters in which such person did not act in good faith in the reasonable belief that his or her action was in the best interest of the Fund. In accordance with the 1940 Act, the Fund will not indemnify any Trustee or officer for any liability to which such person would be subject by reason of his or her willful misfeasance, bad faith, gross negligence or reckless disregard of the duties of his or her position.

The Fund has entered into the Investment Management Agreement with Destra. The Investment Management Agreement provides that, in the absence of willful misfeasance, gross negligence or reckless disregard for its obligations and duties thereunder, Destra and any of its affiliates and controlling persons will not be liable for any error of judgment or mistake of law or for any loss the Fund suffers.

Destra has entered into the Sub-Advisory Agreement with Validus. The Sub-Advisory Agreement provides that, in the absence of willful misconduct, bad faith, reckless disregard or gross negligence for its obligations and duties thereunder, Validus is not liable for any error of judgment or mistake of law or for any loss the Fund suffers. In addition, the Sub-Advisory Agreement provides that Validus will indemnify the Fund, Destra and any of their respective affiliates and controlling persons for any and all losses, claims, damages, liabilities or litigation (including reasonable legal and other expenses), which the Fund, Destra or any of their respective affiliates and controlling persons may sustain as a result of Validus' willful misconduct, bad faith, gross negligence or reckless disregard for its obligations and duties thereunder or violation of applicable law.

Number of Trustees; Appointment of Trustees; Vacancies; Removal

The Fund's Declaration of Trust provides that the number of Trustees shall be no less than one. As set forth in the Declaration of Trust, a Trustee's term of office shall continue until his or her death, resignation, is declared bankrupt or incompetent by a court of appropriate jurisdiction, or removal. Subject to the provisions of the 1940 Act, individuals may be appointed by the Trustees at any time to fill vacancies on the Board by the appointment of such persons by a majority of the Trustees then in office. Each Trustee shall hold office until his or her successor shall have been duly elected and qualified pursuant to the Fund's Declaration of Trust. To the extent that the 1940 Act requires that Trustees be elected by Shareholders, any such Trustees will be elected by a plurality of all Shares voted at a meeting of Shareholders at which a quorum is present.

The Fund's Declaration of Trust provides that any Trustee may be removed (provided that after the removal the aggregate number of Trustees is not less than the minimum required by the Declaration of Trust) without cause only by a written instrument signed or adopted by a majority of the remaining Trustees or by a vote of the holders of at least two-thirds of the shares of the Fund that are entitled to elect a Trustee and that are entitled to vote on the matter.

As of the date of this Prospectus, the Fund has a total of four members of the Board, each of whom are Independent Trustees. Pursuant to the 1940 Act, at least 40% of the members of the Board must be Independent Trustees.

Action by Shareholders

The Fund's Declaration of Trust provides that Shareholder action can be taken only at a meeting of Shareholders or by unanimous written consent in lieu of a meeting. Subject to the 1940 Act, the Fund's Declaration of Trust or a resolution of the Board specifying a greater or lesser vote requirement, the affirmative vote of a majority of Shares present in person or represented by proxy at a meeting and entitled to vote on the subject matter shall be the act of the Shareholders with respect to any matter submitted to a vote of the Shareholders.

Amendment of Declaration of Trust and Bylaws

Subject to the provisions of the 1940 Act, pursuant to the Fund's Declaration of Trust, the Board may amend the Declaration of Trust without any vote of Shareholders, except Shareholders shall have the right to vote: (i) on any amendment that would adversely affect to a material degree the rights and preferences of the Shares of any series or class already issued; (ii) on any amendment for which such vote is required by law; and (iii) on any amendment submitted to Shareholders by the Board. Pursuant to the Fund's Declaration of Trust and bylaws, the Board has the exclusive power to amend or repeal the bylaws or adopt new bylaws at any time.

Conflict with Applicable Laws and Regulations

The Fund's Declaration of Trust provides that if and to the extent that any provision of the Fund's Declaration of Trust conflicts with any provision of the 1940 Act, the provisions under the Code applicable to the Fund as a RIC or other applicable laws and regulations, the conflicting provision shall be deemed never to have constituted a part of the Fund's Declaration of Trust from the time when such provisions became inconsistent with such laws or regulations; provided, however, that such determination shall not affect any of the remaining provisions of the Declaration of Trust or affect the validity of any action taken or omitted to be taken prior to such determination.

TAX ASPECTS

The following discussion is a general summary of U.S. federal income tax considerations generally applicable to the Fund and its investors. Except as otherwise noted, this discussion assumes you are a taxable U.S. person (as defined for U.S. federal income tax purposes) and that you hold your Shares as capital assets for U.S. federal income tax purposes (generally, assets held for investment). This discussion is based upon current provisions of the Code, the regulations promulgated thereunder and judicial and administrative authorities, all of which are subject to change or differing interpretations by the courts or the Internal Revenue Service (the "IRS"), possibly with retroactive effect. No attempt is made to present a detailed explanation of all U.S. federal income tax concerns affecting the Fund and Shareholders (including Shareholders subject to special rules under U.S. federal income tax law).

The discussions set forth herein do not constitute tax advice. The Fund has not sought and will not seek any ruling from the IRS regarding any matters discussed herein. No assurance can be given that the IRS would not assert, or that a court would not sustain, a position contrary to those set forth below. This summary does not discuss any aspects of foreign, state or local tax. Prospective investors must consult their own tax advisers as to the U.S. federal income tax consequences (including the alternative minimum tax consequences) of acquiring, holding and disposing of the Fund's Shares, as well as the effects of state, local and non-U.S. tax laws.

Taxation of the Fund

The Fund intends to elect to be treated and to qualify to be taxed as a RIC under Subchapter M of the Code. In order to qualify as a RIC, the Fund must, among other things, satisfy certain requirements relating to the sources of its income, diversification of its assets, and distribution of its income to Shareholders. First, the Fund must derive at least 90% of its annual gross income from (a) dividends, interest (including tax-exempt interest), payments with respect to certain securities loans, gains from the sale or other disposition of stock, securities or foreign currencies, or other income (including gains from options) derived with respect to its business of investing in such stock, securities or foreign currencies, and (b) net income derived from interests in “qualified publicly traded partnerships” (as defined below). Second, the Fund must diversify its holdings so that, at the close of each quarter of its taxable year, (i) at least 50% of the value of its total assets consists of cash, cash items, U.S. government securities, the securities of other RICs and other securities, with such other securities limited in respect of any one issuer to an amount not greater in value than 5% of the value of the Fund’s total assets and to not more than 10% of the outstanding voting securities of such issuer, and (ii) not more than 25% of the value of the total assets of the Fund is invested in the securities (other than U.S. government securities and the securities of other RICs) of any one issuer, any two or more issuers controlled by the Fund and that are determined to be engaged in the same, similar or related trades or businesses, or any one or more “qualified publicly traded partnerships.” Generally, a qualified publicly traded partnership is a partnership the interests of which are traded on an established securities market or readily tradable on a secondary market (or the substantial equivalent thereof) and that derives less than 90% of its gross income from the items described in clause (a) above. Income from the Fund’s investments in equity interests of other entities treated as partnerships for U.S. federal income tax purposes will be qualifying income for purposes of the income test described above to the extent it is attributable to items of partnership income that would be qualifying income if earned directly by the Fund.

As long as the Fund qualifies as a RIC, the Fund will generally not be subject to corporate-level U.S. federal income tax on income and gains that it distributes each taxable year to Shareholders, provided that in such taxable year it distributes at least 90% of the sum of (i) its “investment company taxable income” (which includes, among other items, dividends, taxable interest, income from securities lending, net short-term capital gain in excess of net long-term capital loss, and any other taxable income other than “net capital gain” (as defined below), reduced by deductible expenses) determined without regard to the deduction for dividends paid, and (ii) the Fund’s net tax-exempt interest (the excess of its gross tax-exempt interest over certain disallowed deductions), if any. The Fund may retain for investment its net capital gain (which consists of the excess of its net long-term capital gain over its net short-term capital loss). However, if the Fund retains any net capital gain or any investment company taxable income, it will be subject to tax at regular corporate rates on the amount retained.

The Code imposes a 4% nondeductible excise tax on the Fund to the extent the Fund does not distribute by the end of any calendar year at least the sum of (i) 98% of its ordinary income (not taking into account any capital gain or loss) for the calendar year and (ii) 98.2% of its capital gain in excess of its capital loss (adjusted for certain ordinary losses) for a one-year period generally ending on October 31 of the calendar year. In addition, the minimum amounts that must be distributed in any year to avoid the excise tax will be increased or decreased to reflect any under-distribution or over-distribution, as the case may be, from the previous year. For purposes of the excise tax, the Fund will be deemed to have distributed any income on which it paid U.S. federal income tax. Although the Fund intends to distribute any income and capital gain in a manner necessary to minimize the imposition of the 4% nondeductible excise tax, there can be no assurance that sufficient amounts of the Fund’s taxable income and capital gain will be distributed to entirely avoid the imposition of the excise tax. In that event, the Fund will be liable for the excise tax only on the amount by which it does not meet the foregoing distribution requirement.

If in any taxable year the Fund should fail to qualify under Subchapter M of the Code for tax treatment as a RIC, the Fund would incur a regular corporate U.S. federal income tax upon all of its taxable income (including net capital gain) for that year, and all distributions to Shareholders (including distributions of net capital gain) would be taxable to Shareholders as ordinary dividend income for U.S. federal income tax purposes to the extent of the Fund’s current or accumulated earnings and profits. Provided that certain holding period and other requirements are met, such dividends would, however, be eligible (i) to be treated as qualified dividend income eligible to be taxed at long-term capital gain rates in the case

individual Shareholders and (ii) for the dividends-received deduction in the case of corporate Shareholders. To qualify again to be taxed as a RIC in a subsequent year, the Fund would be required to distribute to Shareholders its earnings and profits attributable to non-RIC years. In addition, if the Fund failed to qualify as a RIC for a period greater than two taxable years, then, in order to qualify as a RIC in a subsequent year, the Fund would be required to elect to recognize and pay tax on any net built-in gain (the excess of aggregate gain, including items of income, over aggregate loss that would have been realized if the Fund had been liquidated) or, alternatively, be subject to taxation on such built-in gain recognized for a period of five years.

The remainder of this discussion assumes that the Fund qualifies for taxation as a RIC.

The Fund's Investments

Any investment by the Fund in equity securities of REITs may result in the Fund's receipt of cash in excess of the REIT's earnings; if the Fund distributes these amounts, these distributions could constitute a return of capital to Fund Shareholders for U.S. federal income tax purposes. Investments in REIT equity securities also may require the Fund to accrue and to distribute income not yet received. To generate sufficient cash to make the requisite distributions, the Fund may be required to sell securities in its portfolio (including when it is not advantageous to do so) that it otherwise would have continued to hold. Dividends received by the Fund from a REIT generally will not constitute qualified dividend income. Fund distribution payments that are attributable to qualified REIT dividends received by the Fund may be designated by the Fund as Section 199A dividends, which may be taxed to individuals and other non-corporate Shareholders at a reduced effective federal income tax rate.

The Fund may invest in REITs that hold residual interests in real estate mortgage investment conduits ("REMICs"). Under Treasury regulations that have not yet been issued, but may apply retroactively, a portion of the Fund's income from a REIT that is attributable to the REIT's residual interest in a REMIC (referred to in the Code as an "excess inclusion") will be subject to federal income tax in all events. These regulations are also expected to provide that excess inclusion income of a regulated investment company, such as the Fund, will be allocated to Shareholders of the regulated investment company in proportion to the dividends received by such Shareholders, with the same consequences as if the Shareholders held the related REMIC residual interest directly. The IRS in Notice 2006-97 set forth some basic principles for the application of these rules until such regulations are issued. In general, the applicable rules under the Code and expected rules under the regulations will provide that the excess inclusion income allocated to Shareholders (i) cannot be offset by net operating losses (subject to a limited exception for certain thrift institutions), (ii) will constitute unrelated business taxable income to entities (including a qualified pension plan, an individual retirement account, a 401(k) plan, a Keogh plan or other tax-exempt entity) subject to tax on unrelated business income, thereby potentially requiring such an entity that is allocated excess inclusion income, and otherwise might not be required to file a tax return, to file a tax return and pay tax on such income, and (iii) in the case of a foreign shareholder, will not qualify for any reduction in U.S. federal withholding tax. In addition, if at any time during any taxable year a "disqualified organization" (as defined in the Code to include governmental units, tax-exempt entities and certain cooperatives) is a record holder of a share in a regulated investment company, then the regulated investment company will be subject to a tax equal to that portion of its excess inclusion income for the taxable year that is allocable to the disqualified organization, multiplied by the highest federal income tax rate imposed on corporations.

Certain debt securities acquired by the Fund may be treated as debt securities that were originally issued at a discount. Generally, the amount of the original issue discount is treated as interest income and is included in taxable income (and required to be distributed by the Fund in order to qualify as a RIC and avoid U.S. federal income tax or the 4% excise tax on undistributed income) over the term of the security, even though payment of that amount is not received until a later time, usually when the debt security matures.

If the Fund purchases a debt security on a secondary market at a price lower than its adjusted issue price, the excess of the adjusted issue price over the purchase price is "market discount." Unless the Fund makes an election to accrue market discount on a current basis, generally, any gain realized on the disposition of, and any partial payment of principal on, a debt security having market discount is treated as ordinary income to the extent the gain, or principal payment, does not exceed the "accrued market discount" on the debt security. Market discount generally accrues in equal daily installments. If the Fund ultimately collects less

on the debt instrument than its purchase price plus the market discount previously included in income, the Fund may not be able to benefit from any offsetting loss deductions.

The Fund may invest in preferred securities or other securities the U.S. federal income tax treatment of which may not be clear or may be subject to recharacterization by the IRS. To the extent the tax treatment of such securities or the income from such securities differs from the tax treatment expected by the Fund, it could affect the timing or character of income recognized by the Fund, potentially requiring the Fund to purchase or sell securities, or otherwise change its portfolio, in order to comply with the tax rules applicable to RICs under the Code.

The Fund may invest a portion of its assets in below investment grade securities, commonly known as “junk” securities. Investments in these types of securities may present special tax issues for the Fund. U.S. federal income tax rules are not entirely clear about issues such as when the Fund may cease to accrue interest, original issue discount or market discount, when and to what extent deductions may be taken for bad debts or worthless securities, how payments received on obligations in default should be allocated between principal and income and whether modifications or exchanges of debt obligations in a bankruptcy or workout context are taxable. These and other issues could affect the Fund’s ability to distribute sufficient income to preserve its status as a RIC or to avoid the imposition of U.S. federal income or excise tax.

Gain or loss on the sale of securities by the Fund will generally be long-term capital gain or loss if the securities have been held by the Fund for more than one year. Gain or loss on the sale of securities held for one year or less will generally be short-term capital gain or loss.

Because the Fund may invest in foreign securities, its income from such securities may be subject to non-U.S. taxes. The Fund does not expect that it will be eligible to elect to “pass through” to Shareholders the ability to use the foreign tax deduction or foreign tax credit for foreign taxes paid by the Fund with respect to qualifying taxes.

Income from options on individual securities written by the Fund will not be recognized by the Fund for tax purposes until an option is exercised, lapses or is subject to a “closing transaction” (as defined by applicable regulations) pursuant to which the Fund’s obligations with respect to the option are otherwise terminated. If the option lapses without exercise, the premiums received by the Fund from the writing of such options will generally be characterized as short-term capital gain. If the Fund enters into a closing transaction, the difference between the premiums received and the amount paid by the Fund to close out its position will generally be treated as short-term capital gain or loss. If an option written by the Fund is exercised, thereby requiring the Fund to sell the underlying security, the premium will increase the amount realized upon the sale of the security, and the character of any gain on such sale of the underlying security as short-term or long-term capital gain will depend on the holding period of the Fund in the underlying security. With respect to a put or call option that is purchased by the Fund, if the option is sold, any resulting gain or loss will be a capital gain or loss, and will be short-term or long-term, depending upon the holding period for the option. If the option expires, the resulting loss is a capital loss and is short-term or long-term, depending upon the holding period for the option. If the option is exercised, the cost of the option, in the case of a call option, is added to the basis of the purchased security and, in the case of a put option, reduces the amount realized on the underlying security in determining gain or loss. Because the Fund will not have control over the exercise of the options it writes, such exercises or other required sales of the underlying securities may cause the Fund to realize gains or losses at inopportune times.

Options on indices of securities and sectors of securities that qualify as “section 1256 contracts” will generally be “marked-to-market” for U.S. federal income tax purposes. As a result, the Fund will generally recognize gain or loss on the last day of each taxable year equal to the difference between the value of the option on that date and the adjusted basis of the option. The adjusted basis of the option will consequently be increased by such gain or decreased by such loss. Any gain or loss with respect to options on indices and sectors that qualify as “section 1256 contracts” will be treated as short-term capital gain or loss to the extent of 40% of such gain or loss and long-term capital gain or loss to the extent of 60% of such gain or loss. Because the mark-to-market rules may cause the Fund to recognize gain in advance of the receipt of cash, the Fund may be required to dispose of investments in order to meet its distribution requirements. “Mark-to-market” losses may be suspended or otherwise limited if such losses are part of a straddle or similar transaction.

The Fund's transactions in foreign currencies, options (including options on foreign currencies) and short sales, to the extent permitted, will be subject to special provisions of the Code (including provisions relating to "hedging transactions," "straddles" and "constructive sales") that may, among other things, affect the character of gains and losses realized by the Fund (i.e., may affect whether gains or losses are ordinary or capital), accelerate recognition of income to the Fund and defer Fund losses. These rules could therefore affect the character, amount and timing of distributions to Shareholders.

Taxation of Shareholders

The Fund may either distribute or retain for reinvestment all or part of its net capital gain. If any such gain is retained, the Fund will be subject to a corporate income tax on such retained amount. In that event, the Fund may report the retained amount as undistributed capital gain in a notice to Shareholders, each of whom, if subject to U.S. federal income tax on long-term capital gains, (i) will be required to include in income for U.S. federal income tax purposes as long-term capital gain its share of such undistributed amounts, (ii) will be entitled to credit its proportionate share of the tax paid by the Fund against its U.S. federal income tax liability and to claim refunds to the extent that the credit exceeds such liability and (iii) will increase its basis in its Shares by the amount of undistributed capital gains included in the Shareholder's income less the tax deemed paid by the Shareholder under clause (ii).

Distributions paid to you by the Fund from its net capital gain, if any, that the Fund properly reports as capital gain dividends ("capital gain dividends") are taxable as long-term capital gains, regardless of how long you have held your Shares.

Distributions of "qualifying dividends" will also generally be taxable to you at long-term capital gain rates, as long as certain requirements are met. In general, if 95% or more of the gross income of a Fund (other than net capital gain) consists of dividends received from domestic corporations or "qualified" foreign corporations ("qualifying dividends") and when certain other requirements are met, then all distributions paid by the Fund to individual, trust or estate Shareholders will be treated as qualifying dividends. But if less than 95% of the gross income of a Fund (other than net capital gain) consists of qualifying dividends, then distributions paid by the Fund to individual, trust or estate Shareholders will be qualifying dividends only to the extent they are derived from qualifying dividends earned by the Fund. For the lower rates to apply, you must have owned your Fund Shares for at least 61 days during the 121-day period beginning on the date that is 60 days before the Fund's ex-dividend date (and the Fund will need to have met a similar holding period requirement with respect to the shares of the corporation paying the qualifying dividend). The amount of the Fund's distributions that qualify for this favorable treatment may be reduced as a result of the Fund's securities lending activities (if any), a high portfolio turnover rate or investments in debt securities or "non-qualified" foreign corporations.

A portion of distributions paid by the Fund to Shareholders who are corporations also may qualify for the dividends received deduction for corporations, subject to certain holding period requirements and debt financing limitations. The amount of the dividends qualifying for this deduction may, however, be reduced as a result of the Fund's securities lending activities (if any), by a high portfolio turnover rate or by investments in debt securities or foreign corporations.

To the extent that the Fund invests a portion of its assets in entities that qualify as REITs for U.S. federal income tax purposes, master limited partnerships, or foreign corporations that are not "qualified" foreign corporations, distributions attributable to the dividends from those entities will generally not constitute qualifying dividends. Accordingly, except as provided below, investors in the Fund should anticipate that all or a portion of the dividends they receive may be taxable at the higher rates generally applicable to ordinary income. In addition, a portion of gains distributed attributable to distributions of "unrecaptured" Section 1250 gain of master limited partnerships is subject to tax at a maximum rate of 25%.

The Fund may make distributions to you of "Section 199A dividends" with respect to qualified dividends that it receives with respect to its investments in REITs. A Section 199A dividend is any dividend or part of such dividend that a Fund pays to its Shareholders and reports as a Section 199A dividend in written statements furnished to its Shareholders. Distributions paid by the Fund that are eligible to be treated as Section 199A dividends for a taxable year may not exceed the "qualified REIT dividends" received by the Fund from REITs reduced by the Fund's allocable expenses. Section 199A dividends may be taxed

to individuals and other non-corporate Shareholders at a reduced effective federal income tax rate, provided the Shareholder receiving the dividends has satisfied a holding period requirement for the Fund's Shares and satisfied certain other conditions. For the lower rates to apply, you must have owned your Fund Shares for at least 46 days during the 91-day period beginning on the date that is 45 days before the Fund's ex-dividend date, but only to the extent that the Shareholder is not under an obligation (under a short-sale or otherwise) to make related payments with respect to positions in substantially similar or related property.

Any distributions you receive that are in excess of your share of the Fund's current and accumulated earnings and profits will be treated as a tax-free return of capital to the extent of your adjusted tax basis in your Shares, and thereafter as capital gain from the sale of your Shares. The amount of any Fund distribution that is treated as a tax-free return of capital will reduce your adjusted tax basis in your Shares, thereby increasing your potential gain or reducing your potential loss on any subsequent sale or other disposition of your Shares.

Shareholders may be entitled to offset their capital gain dividends (but not dividends treated as qualified dividend income) with capital losses. The Code contains a number of statutory provisions affecting when capital losses may be offset against capital gain, and limiting the use of losses from certain investments and activities. Accordingly, Shareholders that have capital losses are urged to consult their tax advisers.

Dividends and other taxable distributions are taxable to you even though they are reinvested in additional Shares of the Fund. Dividends and other distributions paid by the Fund are generally treated under the Code as received by you at the time the dividend or distribution is made. If, however, the Fund pays you a dividend in January that was declared in the previous October, November or December to Shareholders of record on a specified date in one of such months, then such dividend will be treated for U.S. federal income tax purposes as being paid by the Fund and received by you on December 31 of the year in which the dividend was declared. In addition, certain other distributions made after the close of the Fund's taxable year may be "spilled back" and treated as paid by the Fund (except for purposes of the 4% nondeductible excise tax) during such taxable year. In such case, you will be treated as having received such dividends in the taxable year in which the distributions were actually made.

The price of Shares purchased at any time may reflect the amount of a forthcoming distribution. Those purchasing Shares just prior to the record date of a distribution will receive a distribution which will be taxable to them even though it represents, economically, a return of invested capital.

The Fund will send you information after the end of each year setting forth the amount and tax status of any distributions paid to you by the Fund.

Except as discussed below in the case of a repurchase of Shares, the sale or other disposition of Shares will generally result in capital gain or loss to you and will be long-term capital gain or loss if you have held such Shares for more than one year at the time of sale. Any loss upon the sale or other disposition of Shares held for six months or less will be treated as long-term capital loss to the extent of any capital gain dividends received (including amounts credited as an undistributed capital gain dividend) by you with respect to such Shares. Any loss you recognize on a sale or other disposition of Shares will be disallowed if you acquire other identical Shares (whether through the automatic reinvestment of dividends or otherwise) within a 61-day period beginning 30 days before and ending 30 days after your sale or exchange of the Shares. In such case, your tax basis in the Shares acquired will be adjusted to reflect the disallowed loss.

In general, a repurchase of Shares should be treated as a sale or exchange of such Shares under section 302 of the Code, if the receipt of cash (a) is "substantially disproportionate" with respect to the Shareholder, (b) results in a "complete redemption" of the Shareholder's interest, or (c) is "not essentially equivalent to a dividend" with respect to the Shareholder. A "substantially disproportionate" distribution generally requires a reduction of at least 20% in the Shareholder's proportionate interest in the Fund and where the Shareholder owns less than 50% of the voting power of all classes entitled to vote. A "complete redemption" of a Shareholder's interest generally requires that all Shares of the Fund owned by such Shareholder be disposed of. A distribution "not essentially equivalent to a dividend" requires that there be a "meaningful reduction" in the Shareholder's proportionate interest in the Fund, which should result if the Shareholder has a minimal interest in the Fund, exercises no control over Fund affairs and suffers a reduction

in his proportionate interest in the Fund. In determining whether any of these tests has been met, any Shares actually owned, as well as Shares considered to be owned by the Shareholder by reason of certain constructive ownership rules set forth in section 318 of the Code, generally must be taken into account.

Current U.S. federal income tax law taxes both long-term and short-term capital gain of corporations at the rates applicable to ordinary income. For non-corporate taxpayers, short-term capital gain is currently taxed at rates applicable to ordinary income while long-term capital gain generally is taxed at a reduced maximum rate.

Certain U.S. holders who are individuals, estates or trusts and whose income exceeds certain thresholds will be required to pay a 3.8% Medicare tax on all or a part of their “net investment income,” which includes dividends received from the Fund and capital gains from the sale or other disposition of the Fund’s stock.

A Shareholder that is a nonresident alien individual or a foreign corporation (a “foreign investor”) generally will be subject to U.S. federal withholding tax at the rate of 30% (or possibly a lower rate provided by an applicable tax treaty) on ordinary income dividends (except as discussed below). In general, U.S. federal withholding tax and U.S. federal income tax will not apply to any capital gain realized by a foreign investor in respect of any distribution of net capital gain (including amounts credited as an undistributed capital gain dividend) or upon the sale or other disposition of Shares of the Fund. Different tax consequences may result if the foreign investor is engaged in a trade or business in the United States or, in the case of an individual, is present in the United States for 183 days or more during a taxable year and certain other conditions are met. Foreign investors should consult their tax advisers regarding the tax consequences of investing in the Fund’s Shares.

Ordinary income dividends properly reported by a RIC are generally exempt from U.S. federal withholding tax where they (i) are paid in respect of the RIC’s “qualified net interest income” (generally, its U.S.-source interest income, other than certain contingent interest and interest from obligations of a corporation or partnership in which the RIC is at least a 10% shareholder, reduced by expenses that are allocable to such income) or (ii) are paid in respect of the RIC’s “qualified short-term capital gains” (generally, the excess of the RIC’s net short-term capital gain over its long-term capital loss for such taxable year). Depending on its circumstances, the Fund may report all, some or none of its potentially eligible dividends as qualified net interest income or as qualified short-term capital gains, and/or treat such dividends, in whole or in part, as ineligible for this exemption from withholding. In order to qualify for this exemption from withholding, a foreign investor needs to comply with applicable certification requirements relating to its non-U.S. status (including, in general, furnishing an IRS Form W-8BEN, W-8BEN-E or substitute Form). In the case of Shares held through an intermediary, the intermediary may withhold even if the Fund reports the payment as qualified net interest income or qualified short-term capital gain. Foreign investors should contact their intermediaries with respect to the application of these rules to their accounts. There can be no assurance as to what portion of the Fund’s distributions will qualify for favorable treatment as qualified net interest income or qualified short-term capital gains.

In addition, with respect to Shares held by certain foreign financial institutions (including investment funds), a U.S. withholding at a rate of 30% will be imposed on dividends unless such institution enters into an agreement with the U.S. Treasury to report, on an annual basis, information with respect to Shares in, and accounts maintained by, the institution to the extent such Shares or accounts are held by certain U.S. persons and by certain non-U.S. entities that are wholly or partially owned by U.S. persons and to withhold on certain payments. Accordingly, the entity through which Shares of the Fund are held will affect the determination of whether such withholding is required. Similarly, dividends in respect of Shares of the Fund held by an investor that is a non-financial foreign entity that does not qualify under certain exemptions will be subject to withholding at a rate of 30%, unless such entity either (i) certifies that such entity does not have any “substantial United States owners” or (ii) provides certain information regarding the entity’s “substantial United States owners,” which the Fund or applicable withholding agent will in turn provide to the Secretary of the Treasury. An intergovernmental agreement between the United States and an applicable foreign country, or future Treasury regulations or other guidance, may modify these requirements. The Fund will not pay any additional amounts to Shareholders in respect of any amounts withheld. Foreign investors are encouraged to consult with their tax advisers regarding the possible implications of these rules on their investment in the Fund’s Shares.

U.S. federal backup withholding tax may be required on dividends, distributions and sale or redemption proceeds payable to certain non-exempt Shareholders who fail to supply their correct taxpayer identification number (in the case of individuals, generally, their social security number) or to make required certifications, or who are otherwise subject to backup withholding. Backup withholding is not an additional tax and any amount withheld may be refunded or credited against your U.S. federal income tax liability, if any, provided that you timely furnish the required information to the IRS.

Ordinary income dividends, capital gain dividends, and gain from the sale, redemption or other disposition of Shares of the Fund also may be subject to state, local, and/or foreign taxes. Shareholders are urged to consult their own tax advisers regarding specific questions about U.S. federal, state, local or foreign tax consequences to them of investing in the Fund.

The foregoing is a general and abbreviated summary of certain provisions of the Code and the Treasury Regulations presently in effect as they directly govern the taxation of the Fund and Shareholders. For complete provisions, reference should be made to the pertinent Code sections and Treasury Regulations. The Code and the Treasury Regulations are subject to change by legislative or administrative action, and any such change may be retroactive with respect to Fund transactions. Prospective investors are advised to consult their own tax advisers for more detailed information concerning the tax consequences of an investment in the Fund.

ERISA CONSIDERATIONS

Employee benefit plans and other plans subject to ERISA or Section 4975 of the Code, including corporate savings and 401(k) plans, IRAs and Keogh Plans (each, an “ERISA Plan”) may purchase Shares. ERISA imposes certain general and specific responsibilities on persons who are fiduciaries with respect to an ERISA Plan, including prudence, diversification, prohibited transactions and other standards. Because the Fund is registered as an investment company under the 1940 Act, the underlying assets of the Fund will not be considered to be “plan assets” of any ERISA Plan investing in the Fund for purposes of the fiduciary responsibility and prohibited transaction rules under Title I of ERISA or Section 4975 of the Code. Thus, none of the Fund nor Destra, nor Validus will be a fiduciary under and within the meaning of ERISA or Section 4975 of the Code with respect to the assets of any ERISA Plan that becomes a Shareholder, solely as a result of the ERISA Plan’s investment in the Fund.

The provisions of ERISA are subject to extensive and continuing administrative and judicial interpretation and review. The discussion of ERISA contained herein is, of necessity, general and may be affected by future publication of regulations and rulings. Potential investors should consult their legal advisers regarding the consequences under ERISA of an investment in the Fund through an ERISA Plan.

DISTRIBUTION OF SHARES

This is a continuous offering of Class I Shares, Class A Shares, Class T Shares and Class C Shares as permitted by the federal securities laws. Destra Capital Investments LLC located at 444 West Lake Street, Suite 1700, Chicago, Illinois 60606, serves as the Fund’s principal underwriter, within the meaning of the 1940 Act, and acts as the distributor of the Fund’s Shares on a best efforts basis, subject to various conditions. The Fund’s Shares are offered for sale through the Distributor at NAV plus, in the case of the Class A Shares and Class T Shares, the applicable sales load. The Distributor also may enter into agreements with Financial Intermediaries for the sale and servicing of Shares. In reliance on Rule 415, the Fund intends to offer to sell up to 18,666,666.66 Shares, on a continuous basis, through the Distributor. No arrangement has been made to place funds received in an escrow, trust or similar account. The Distributor is not required to sell any specific number or dollar amount of the Fund’s Shares, but will use its best efforts to solicit orders for the sale of the Shares. Shares of the Fund will not be listed on any national securities exchange and the Distributor will not act as a market maker in the Shares. The Class T Shares and Class C Shares will pay the Distributor a Distribution Fee that will accrue at an annual rate equal to 0.50% for Class T Shares and 0.75% for Class C Shares of the Fund’s average daily net assets attributable to the applicable share class and is payable on a monthly basis. Class I Shares and Class A Shares are not currently subject to a Distribution Fee. The Distributor will seek to market and otherwise promote the Fund through various “wholesale” distribution channels.

Destra or its affiliates, in Destra's discretion and from their own resources, may pay additional compensation to Financial Intermediaries in connection with the sale and servicing of Fund Shares (the "Additional Compensation"). In return for the Additional Compensation, the Fund may receive certain marketing advantages including access to a Financial Intermediary's registered representatives, placement on a list of investment options offered by a Financial Intermediary, or the ability to assist in training and educating the Financial Intermediaries. The Additional Compensation may differ among Financial Intermediaries in amount or in the manner of calculation: payments of Additional Compensation may be fixed dollar amounts, or based on the aggregate value of outstanding Shares held by Shareholders introduced by the Financial Intermediary, or determined in some other manner. The receipt of Additional Compensation by a selling Financial Intermediary may create potential conflicts of interest between an investor and its Financial Intermediary who is recommending the Fund over other potential investments. Additionally, Destra or its affiliates may pay a servicing fee to financial industry professionals or firms for providing ongoing services in respect of clients with whom they have distributed certain classes of Shares of the Fund. Such services may include electronic processing of client orders, electronic fund transfers between clients and the Fund, account reconciliations with the Fund's transfer agent, facilitation of electronic delivery to clients of Fund documentation, monitoring client accounts for back-up withholding and any other special tax reporting obligations, maintenance of books and records with respect to the foregoing, and such other information and ongoing liaison services as may be necessary with respect to such accounts.

The Fund has agreed to indemnify the Distributor against certain liabilities, including liabilities under the Securities Act, or to contribute to payments the Distributor may be required to make because of any of those liabilities. Such agreement does not include indemnification of the Distributor against liability resulting from willful misfeasance, bad faith, or gross negligence on the part of the Distributor in the performance of its duties or from reckless disregard by the Distributor of its obligations and duties under the Distribution Agreement. The Distributor may, from time to time, perform services for Destra and its affiliates in the ordinary course of business.

Automatic Investment Plan — Subsequent Investments

You may participate in the Fund's Automatic Investment Plan, an investment plan that automatically moves money from your bank account and invests it in the Fund through the use of electronic funds transfers or automatic bank drafts. You may elect to make subsequent investments by transfers of a minimum of \$25 into your established Fund account on specified days on a monthly, quarterly, semi-annual or annual basis. Please contact the Fund at 844-9DESTRA (933-7872) or Destra Multi-Alternative Fund, c/o UMB Fund Services, Inc., 235 W. Galena Street, Milwaukee, WI 53212 for more information about the Fund's Automatic Investment Plan.

Purchase Terms

The minimum initial investment by a shareholder is \$1,000,000 for Class I Shares and \$2,500 for Class A Shares, Class T Shares and Class C Shares, respectively. There is no minimum for subsequent investments. All Share purchases are subject to approval by Destra. The Fund reserves the right to waive investment minimums. The Fund may permit a Financial Intermediary to waive the initial minimum per Shareholder for Class I Shares in the following situations: broker-dealers purchasing Class I Shares for clients in broker-sponsored fee-based advisory programs; Financial Intermediaries with clients of a registered investment advisor (RIA) purchasing Class I Shares in fee-based advisory accounts with a \$1,000,000 aggregated initial investment across multiple clients; and certain other situations deemed appropriate by the Fund. The Fund's Shares are offered for sale through the Distributor at NAV plus the applicable sales load, if any. The price of the Shares during the Fund's continuous offering will fluctuate over time with the NAV of the Shares.

Share Class Considerations

When selecting a Share class, you should consider the following:

- which Share classes are available to you;
- how much you intend to invest;

- how long you expect to own the Shares; and
- total costs and expenses associated with a particular Share class.

Each investor's financial considerations are different. You should speak with your financial advisor to help you decide which Share class is best for you. Not all Financial Intermediaries offer all classes of Shares. If your Financial Intermediary offers more than one class of Shares, you should carefully consider which class of Shares to purchase. Investors should consult with their Financial Intermediary regarding the sales load and any additional fees or charges their Financial Intermediary might impose on each class of shares.

Class I Shares

Class I Shares are sold at the then-current NAV per Class I Share and are not subject to any upfront sales charge. While Class I Shares are not subject to a sales load, investors may be required to pay a brokerage commission and/or other forms of compensation on purchases of Class I Shares to their Financial Intermediary. The following additional feature should be taken into account when purchasing Class I Shares:

- a minimum initial investment of \$1,000,000 (the Fund reserves the right to waive investment minimums).

Class I Shares may only be available through certain Financial Intermediaries. Because the Class I Shares of the Fund are sold at the prevailing NAV per Class I Share without an upfront Sales Load, the entire amount of your purchase is invested immediately.

Class A Shares

Investors purchasing Class A Shares will pay a Sales Load based on the amount of their investment in the Fund. The Sales Load payable by each investor depends upon the amount invested by such investor in the Fund, but may range from 1.50% to 5.75%, as set forth in the table below. A reallowance to participating broker dealers will be made by the Distributor from the Sales Load paid by each investor. The following Sales Loads apply to your purchases of Class A Shares of the Fund:

<u>Amount Purchased</u>	<u>Dealer Reallowance*</u>	<u>Distribution Fee</u>	<u>Sales Load as a % of Offering Price</u>	<u>Sales Load as a % of Amount Invested</u>
Under \$100,000	5.00%	None	5.75%	6.10%
\$100,000 – \$249,999	4.00%	None	4.75%	4.99%
\$250,000 – \$499,999	3.00%	None	3.75%	3.90%
\$500,000 – \$999,999	2.00%	None	2.50%	2.56%
\$1,000,000 and Above	1.00%	None	1.50%	1.52%

* Gross Dealer Concession paid to participating broker-dealers.

The following are additional features that should be taken into account when purchasing Class A Shares of the Fund:

- a minimum initial investment of \$2,500 (the Fund reserves the right to waive investment minimums); and
- a monthly shareholder servicing fee at an annual rate of up to 0.25% of the average daily net assets of the Fund attributable to Class A Shares.

Class T Shares

Investors purchasing Class T Shares will pay a Sales Load based on the amount of their investment in the Fund. The Sales Load payable by each investor depends upon the amount invested by such investor in the Fund, but may range from 1.00% to 3.00%, as set forth in the table below. A reallowance to participating broker dealers will be made by the Distributor from the Sales Load paid by each investor. The following Sales Loads apply to your purchases of Class T Shares of the Fund:

<u>Amount Purchased</u>	<u>Dealer Reallowance*</u>	<u>Distribution Fee</u>	<u>Sales Load as a % of Offering Price</u>	<u>Sales Load as a % of Amount Invested</u>
Under \$250,000	3.00%	0.50%	3.00%	3.09%
\$250,000 – \$999,999	2.00%	0.50%	2.00%	2.04%
\$1,000,000 and Above	1.00%	0.50%	1.00%	1.01%

* Gross Dealer Concession paid to participating broker-dealers.

The following are additional features that should be taken into account when purchasing Class T Shares:

- a minimum initial investment of \$2,500 (the Fund reserves the right to waive investment minimums);
- a monthly shareholder servicing fee at an annual rate of up to 0.25% of the average daily net assets of the Fund attributable to Class T Shares; and
- a monthly Distribution Fee which will accrue at an annual rate equal to 0.50% of the average daily net assets of the Fund attributable to Class T Shares.

Class C Shares

Class C Shares are sold at the then-current NAV per Class C Share and are not subject to any upfront sales charge. While Class I Shares are not subject to a sales load, investors may be required to pay a brokerage commission and/or other forms of compensation on purchases of Class C Shares to their Financial Intermediary. The following additional feature should be taken into account when purchasing Class C Shares:

The following are additional features that should be taken into account when purchasing Class C Shares:

- a minimum initial investment of \$2,500 (the Fund reserves the right to waive investment minimums);
- a monthly shareholder servicing fee at an annual rate of up to 0.25% of the average daily net assets of the Fund attributable to Class C Shares; and
- a monthly Distribution Fee which will accrue at an annual rate equal to 0.75% of the average daily net assets of the Fund attributable to Class C Shares.

Potential Sales Charge Waiver

Purchases of Class A Shares and Class T Shares may be made without a sales charge (i.e., “load-waived”) when they are:

- reinvesting distributions through the DRP. See “Distributions”;
- purchases by (i) directors, officers and employees of Destra and its affiliates, (ii) Trustees and officers of the Fund, and (iii) directors and officers of any sub-adviser to a fund advised by Destra, including retired persons who formerly held such positions and immediate family members of such purchasers (immediate family members are defined as spouses, domestic partners, parents and children);
- purchases:
- for eligible retirement or benefit plans made through Financial Intermediaries that perform participant recordkeeping or other administrative services for the plans;
- as a trustee or custodian of any pension or profit sharing plan or payroll deduction IRA for the employees of any consenting securities dealer having a sales agreement with the Distributor; or
- for certain employee benefits or retirement plans, other than employee benefits or retirement plans that purchase Class A shares through brokerage relationships in which sales charges are customarily imposed;
- purchasing Shares through the Distributor;

- participating in an eligible investment advisory or agency commission program under which the investor pays a fee to an investment advisor or other firm for portfolio management or brokerage services;
- purchases by investors maintaining a self-directed brokerage account with a registered broker-dealer that has entered into an agreement with the Distributor to offer Class A shares through a load-waived network or platform, which may or may not charge transaction fees;
- exchanging an investment in Class A or Class T (or equivalent type) Shares of another fund for an investment in the Fund.

To the extent the Distributor offers Shares with reduced sales charges through an arrangement with (i) eligible retirement or benefit plans; (ii) securities dealers, brokers or Financial Intermediaries having a sales agreement with the Distributor; (iii) investment advisors that administer eligible investment advisory or agency commission programs; and (iv) any other entity, such arrangements will be disclosed via an appendix to the Fund's prospectus.

In addition, concurrent purchases of Class A or Class T by related accounts may be combined to determine the application of the Sales Load (i.e., available breakpoints or volume discounts). The Fund will combine purchases made by an investor, the investor's spouse or domestic partner, and dependent children when it calculates the Sales Load.

It is the investor's responsibility to determine whether a reduced Sales Load would apply. The Fund is not responsible for making such a determination. To receive a reduced Sales Load, notification must be provided at the time of the purchase order. If you purchase Class A or Class T Shares directly from the Fund, you must notify the Fund in writing. Otherwise, notice should be provided to the Financial Intermediary through whom the purchase is made so they can notify the Fund.

Letters of Intent

You may be eligible for a reduced sales charge if you assure the Fund in writing that you intend to invest at least \$100,000 in the Fund over the next 13 months in exchange for a reduced sales charge ("Letter of Intent"). By signing a Letter of Intent, you can purchase Class A or Class T at a lower sales charge level. Your individual purchases will be made at the applicable sales charge based on the amount you intend to invest over a 13-month period as stated in the Letter of Intent. Any Shares purchased within 90 days prior to the date you sign the Letter of Intent may be used as credit toward completion of the stated amount, but the reduced sales charge will only apply to new purchases made on or after the date of the Letter of Intent. Purchases resulting from the reinvestment of dividends and capital gains do not apply toward fulfillment of the Letter of Intent. Shares equal to 5.75% for Class A Shares and 3.00% for Class T Shares of the Fund, respectively, of the amount stated in the Letter of Intent will be held in escrow during the 13-month period. If, at the end of the period, the total net amount invested is less than the amount stated in the Letter of Intent, you will be required to pay the difference between the reduced sales charge and the sales charge applicable to the individual net amounts invested had the Letter of Intent not been in effect. This amount will be obtained from redemption of the escrowed Shares. Any remaining escrowed Shares after payment to the Fund of the difference in applicable sales charges will be released to you. If you establish a Letter of Intent with the Fund, you can aggregate your accounts as well as the accounts of your immediate family members. You will need to provide written instructions with respect to the other accounts whose purchases should be considered in fulfillment of the Letter of Intent.

Right of Accumulation

For the purposes of determining the applicable reduced sales charge, the right of accumulation may allow you to include prior purchases of Class A or Class T Shares of the Fund, as well as reinvested distributions, as part of your current investment.

In order for your purchases and holdings to be aggregated for purposes of qualifying for such discount, they must have been made through one Financial Intermediary and you must provide sufficient information to your Financial Intermediary at the time of initial purchase of shares that qualify for the right of accumulation to permit verification that the purchase qualifies for the reduced sales charge.

Minimum Account Balances

The Fund reserves the right to annually request that intermediaries close Fund accounts that are valued at less than \$500, other than as a result solely of depreciation in share value. Please note that you may incur a tax liability as a result of your account closure and associated redemption. Certain accounts held through Financial Intermediaries may not be subject to closure due to the policies of the Financial Intermediaries. You may receive written notice from your Financial Intermediary to increase your account balance to the required minimum to avoid having your account closed. If you hold Shares directly with the Fund, you may receive written notice prior to the closure of your Fund account so that you may increase your account balance to the required minimum. The Fund reserves the right to change the amount of these minimums or maximums from time to time or to waive them in whole or in part.

Share Class Conversions

Upon request, the Fund may, in its discretion, permit a current Shareholder to convert Shares held by them to another class of Fund Shares in a non-taxable transaction; provided that such Shareholder meets the requirements of the new Share class.

Distribution Fee

The Fund, with respect to its Class T Shares and Class C Shares, is authorized under a “Distribution Plan” to pay to the Distributor a Distribution Fee for certain activities relating to the distribution of shares to investors and maintenance of shareholder accounts. These activities include marketing and other activities to support the distribution of the Class T Shares and Class C Shares. The Plan operates in a manner consistent with Rule 12b-1 under the 1940 Act, which regulates the manner in which an open-end investment company may directly or indirectly bear the expenses of distributing its shares. Although the Fund is not an open-end investment company, it has undertaken to comply with the terms of Rule 12b-1 as a condition of an exemptive order under the 1940 Act which permits it to have asset based distribution fees. Under a Distribution Plan, the Fund pays the Distributor a Distribution Fee at an annual rate of 0.50% for Class T Shares and 0.75% for Class C Shares of average daily net assets attributable to the applicable share classes.

Shareholder Servicing Fees

The Fund has adopted a “Shareholder Servicing Plan” with respect to its Class A Shares, Class T Shares and Class C Shares under which the Fund may compensate financial industry professionals or firms for providing ongoing services in respect of clients with whom they have distributed shares of the Fund. Such services may include (i) responding to Shareholder inquiries of a general nature regarding the Fund; (ii) crediting distributions from the Fund to Shareholder accounts; (iii) arranging for bank wire transfer of funds to or from a Shareholder’s account; (iv) responding to Shareholder inquiries and requests regarding the Statement of Additional information, shareholder reports, notices, proxies and proxy statements, and other Fund documents; (v) forwarding the prospectus, Statement of Additional Information, tax notices and annual and semi-annual reports to beneficial owners of Fund Shares; (vi) assisting the Fund in establishing and maintaining Shareholder accounts and records; (vii) assisting Shareholder in changing account options, account designations and account addresses, and (viii) providing such other similar services as the Fund may reasonably request to the extent permitted to do so under applicable statutes, rules, or regulations. Under the Shareholder Servicing Plan, the Fund, with respect Class A Shares, Class T Shares and Class C Shares may incur expenses on an annual basis up to 0.25% of its average daily net assets attributable to Class A Shares, Class T Shares and Class C Shares, respectively.

Financial Intermediaries

The Fund has authorized one or more Financial Intermediaries to receive on its behalf purchase orders and repurchase requests. Such Financial Intermediaries are authorized to designate other intermediaries to receive purchase orders and repurchase requests on the Fund’s behalf. The Fund will be deemed to have received a purchase order or repurchase request when a Financial Intermediary or, if applicable, a Financial Intermediary’s authorized designee, receives the order or request. Customer orders will be priced at the Fund’s net asset value next computed after they are received by a Financial Intermediary or the Financial

Intermediary's authorized designee. Investors may be charged a fee if they effect transactions through a Financial Intermediary or authorized designee. Investors who purchase Shares through Financial Intermediaries will be subject to the procedures of those Intermediaries through which they purchase Shares, which may include charges, investment minimums, cutoff times and other restrictions in addition to, or different from, those listed herein. Information concerning any charges or services will be provided to customers by the Financial Intermediary through which they purchase Shares. Investors purchasing Shares of the Fund through Financial Intermediaries should acquaint themselves with their Financial Intermediary's procedures and should read the prospectus in conjunction with any materials and information provided by their Financial Intermediary. The Financial Intermediary, and not its customers, will be the Shareholder of record, although customers may have the right to vote Shares depending upon their arrangement with the Financial Intermediary.

Payments to Financial Intermediaries

Destra, out of its own resources and without additional cost to the Fund or its Shareholders, may provide additional cash payments to Financial Intermediaries, which may include affiliates of Destra, for the sale of Fund shares and related services. These payments and compensation are in addition to shareholder servicing fees paid by the Fund, if any. Payments are generally made to Financial Intermediaries that provide shareholder servicing, marketing and related sales support or access to sales meetings, sales representatives and management representatives of the Financial Intermediary. Payments may also be paid to Financial Intermediaries for inclusion of the Fund on a sales list, including a preferred or select sales list or in other sales programs. Compensation may be paid as an expense reimbursement in cases in which the Financial Intermediary provides shareholder services to the Fund.

DISTRIBUTIONS

Subject to the Board's discretion and applicable legal restrictions, the Fund intends to pay ordinary cash distributions to Shareholders on a monthly basis. Such regular distributions are expected to be paid using all or a portion of the Fund's Available Operating Funds, which are defined as the Fund's net investment income after the application of the Expense Limitation, net capital gains and dividends and other distributions, including those treated as a return of capital, paid to the Fund on account of preferred and common equity investments in portfolio companies (to the extent such amounts are not included in net investment income or net capital gains). From time to time, to maintain a stable level of distributions, the Fund may also pay distributions from offering proceeds or borrowings. A distribution from offering proceeds is treated as a return of capital (shareholders' original investment in the Fund) and generally will reduce a shareholder's basis in his or her Shares, which may increase the capital gain or reduce the capital loss realized upon the sale of such Shares. Any amounts received in excess of a shareholder's basis are generally treated as capital gain, assuming the Shares are held as capital assets.

Subject to the Board's discretion and applicable legal restrictions, the Fund from time to time may also pay special interim distributions in the form of cash or Shares. At least annually, the Fund intends to authorize and declare special cash distributions of net long-term capital gains, if any.

The Expense Limitation will have the effect of increasing the Available Operating Funds available to fund regular distributions. The Fund's future repayments of amounts reimbursed or waived by Destra pursuant to the Expense Limitation will in turn reduce the Available Operating Funds available to fund regular distributions. There can be no assurance that the Fund will achieve the performance necessary to sustain its distributions or that it will be able to pay distributions at a specific rate or at all. Destra has no obligation to waive fees and expenses or otherwise reimburse expenses in future periods.

Each year a statement on Form 1099-DIV identifying the character of the distributions (i.e., as ordinary income, "qualified dividend income," "capital gain dividends," "Section 199A dividends," and/or a tax-free return of capital) will be mailed to Shareholders. Fund distributions to Shareholders may exceed the Fund's earnings and profits for U.S. federal income tax purposes, especially during the period before the Fund has substantially invested the proceeds from this Offering. As a result, a portion of such distributions may constitute a return of capital and will lower an investor's tax basis in his or her Shares. A return of capital generally is a return of an investor's investment rather than a return of earnings or gains derived from the Fund's investment activities. In addition, certain investments the Fund makes, including preferred and

common equity investments, may generate dividends and other distributions to the Fund that are treated for tax purposes as a return of capital, and a portion of the Fund's distributions to Shareholders may also be deemed to constitute a return of capital for tax purposes to the extent that the Fund may use such dividends or other distribution proceeds to fund its distributions to Shareholders. There can be no assurance that the Fund will be able to pay distributions at a specific rate or at all.

To qualify for and maintain RIC tax treatment, the Fund must distribute on a timely basis with respect to each tax year an amount at least equal to the sum of 90% of its "investment company taxable income" and its net tax-exempt interest income, if any, for such tax year. In order to avoid certain excise taxes imposed on RICs, the Fund must distribute during each calendar year an amount at least equal to the sum of (i) 98% of its ordinary taxable income (taking into account certain deferrals and elections) for the calendar year, (ii) 98.2% of its capital gain net income for the one-year period ending on October 31 of the calendar year and (iii) any ordinary income and capital gains for previous years that were not distributed during such years and on which the Fund paid no federal income tax. The Fund can offer no assurance that it will achieve results that will permit the payment of any cash distributions. If the Fund issues senior securities, the Fund will be prohibited from making distributions if doing so causes it to fail to maintain the asset coverage ratios stipulated by the 1940 Act or if distributions are limited by the terms of any of the Fund's borrowings. Any such limitations would adversely impact the Fund's ability to make distributions to Shareholders.

Distribution Reinvestment Plan

The Fund will operate under a DRP administered by the Fund's Administrator. Pursuant to the plan, the Fund's cash distributions are reinvested in the same class of Shares of the Fund.

Shareholders automatically participate in the DRP, unless and until an election is made to withdraw from the plan on behalf of such participating Shareholder. Registered Shareholders who do not wish to have cash distributions automatically reinvested should so notify the Fund in writing at Destra Multi-Alternative Fund, c/o UMB Fund Services, Inc., 235 W. Galena Street, Milwaukee, WI 53212. Such written notice must be received by the Administrator no later than 15 days prior to the record date of the cash distribution or the Shareholder will receive such cash distribution in Shares through the DRP. If Shares are held by a broker or other financial intermediary, a Shareholder may elect to withdraw from the DRP by notifying their broker or other financial intermediary of their election. Under the DRP, the Fund's cash distributions to Shareholders are reinvested in full and fractional Shares as described below.

When the Fund declares a cash distribution, the Administrator, on the Shareholder's behalf, will receive additional authorized, newly-issued Shares from the Fund. The number of Shares to be received when cash distributions are reinvested will be determined by dividing the total dollar amount of the distribution payable by the NAV per Share of the applicable class.

Although Shares issued pursuant to the DRP will not be subject to any Sales Load, such Shares will be subject to the shareholder servicing fee and Distribution Fee, as applicable.

The Administrator will maintain all Shareholder accounts and furnish written confirmations of all transactions in the accounts, including information needed by Shareholders for personal and tax records. The Administrator will hold Shares in the account of the Shareholders in non-certificated form in the name of the participant, and each Shareholder's proxy, if any, will include those Shares purchased pursuant to the DRP. Each participant, nevertheless, has the right to request certificates for whole and fractional Shares owned. The Fund will issue certificates in its sole discretion. The Administrator, or another entity selected by a financial intermediary, as the case may be, will distribute all proxy solicitation materials, if any, to participating Shareholders.

In the case of Shareholders, such as banks, brokers or nominees, that hold Shares for others who are beneficial owners participating under the DRP, the Administrator will administer the DRP on the basis of the number of Shares certified from time to time by the record Shareholder as representing the total amount of Shares registered in the Shareholder's name and held for the account of beneficial owners participating under the DRP.

Neither the Administrator nor the Fund shall have any responsibility or liability beyond the exercise of ordinary care for any action taken or omitted pursuant to the DRP, nor shall they have any duties, responsibilities or liabilities except such as expressly set forth herein. Neither shall they be liable hereunder for any act done in good faith or for any good faith omissions to act, including, without limitation, failure to terminate a participant's account prior to receipt of written notice of his or her death or with respect to prices at which Shares are purchased or sold for the participants account and the terms on which such purchases and sales are made, subject to applicable provisions of the federal securities laws.

The automatic reinvestment of cash distributions will not relieve participants of any federal, state or local income tax that may be payable (or required to be withheld) on such distributions. See "Tax Aspects."

The Fund reserves the right to amend, suspend or terminate the DRP. There is no direct service charge to participants with regard to purchases under the DRP; however, the Fund reserves the right to amend the DRP to include a service charge payable by participants.

All correspondence concerning the DRP should be directed to the plan administrator by mail at Destra Multi-Alternative Fund, c/o UMB Fund Services, Inc., 235 W. Galena Street, Milwaukee, WI 53212. A Shareholder may obtain a copy of the DRP by request to the plan administrator or by contacting the Fund.

FISCAL YEAR; REPORTS

For accounting purposes, the Fund's fiscal year ends on February 28 (or, in applicable years, February 29). After the end of each calendar year, the Fund will furnish to Shareholders a statement on Form 1099-DIV identifying the sources of the distributions paid by the Fund to Shareholders for U.S. federal income tax purposes. In addition, the Fund will make available to Shareholders an unaudited semi-annual and an audited annual report within 60 days after the close of the period for which the report is being made, or as otherwise required by the 1940 Act.

PRIVACY NOTICE

The Fund is committed to protecting the privacy of Shareholders. This privacy notice explains the privacy policies of the Fund and its affiliates. This notice supersedes any other privacy notice Shareholders may have received from the Fund.

The Fund will safeguard, according to strict standards of security and confidentiality, all information the Fund receives about Shareholders. The only information the Fund collects from Shareholders is their name, address, number of Shares held and their social security number.

This information is used only so that the Fund can send Shareholders annual reports, semi-annual reports and other information about the Fund, and send Shareholders other information required by law.

The Fund does not share this information with any non-affiliated third party except as described below.

- *Authorized employees of Destra.* It is the Fund's policy that only authorized employees of Destra who need to know a Shareholder's personal information will have access to it.
- *Service providers.* The Fund may disclose a Shareholder's personal information to companies that provide services on the Fund's behalf, such as record keeping, processing the Shareholder's trades and mailing the Shareholder information. These companies are required to protect the Shareholder's information and use it solely for the purpose for which they received it.
- *Courts and government officials.* If required by law, the Fund may disclose a Shareholder's personal information in accordance with a court order or at the request of government regulators. Only that information required by law, subpoena or court order will be disclosed.

LEGAL MATTERS

Certain legal matters in connection with the shares will be passed upon for the Fund by Faegre Drinker Biddle & Reath LLP, One Logan Square, Ste. 2000, Philadelphia, PA 19103-6996.
